Descriptors—*Curriculum Development, Educational Research, Elementary Secondary Education, *Evaluation, *Literature Reviews, *Mathematics Curriculum, *Mathematics Education

Identifiers—Cockcroft Report, England, *Mathematics Education Research, Mathematics History

This third volume of a review prepared for the Cockcroft Committee of Inquiry into the Teaching of Mathematics in Schools in Great Britain concerns research with relevance to the mathematics curriculum. The role of history is discussed briefly in the introduction, and has an impact throughout the report. The 13 chapters consider: (1) introduction; (2) early curriculum development and theories; (3) curriculum development in England in the early 20th century; (4) the Consultative Committee and mathematics; (5) later development of curriculum theories; (6) strands of curriculum development; (7) lessons to be learned; (8) evaluation in Britain; (9) evaluation in the United States; (10) the management of curriculum development; (11) centers and networks for curriculum development in mathematics; (12) common problems; and (13) the teacher's role in curriculum development. A bibliography is found at the end of the report. (MNS)

Identifiers—*Alternative Energy Sources, *Energy Education

This set of 25 instructional modules was produced by a group of industrial arts teacher educators, local teachers, and supervisors from eastern United States. Topic areas of these modules include: societal implications of the energy situation; awareness of energy terms, supply, and use; assessment of conventional and selected renewable alternative energy sources (terms, criteria, availability, consumption, and environment); economic aspects of energy sources; conserving energy through changes in habits, attitudes, and gaining self-sufficiency; energy conservation through the selection and application of renewable alternatives; energy use and reduction in small buildings and homes; principles, practices, and measurement of heat loss and gain; calculating electrical usage; and design criteria for passive solar energy efficient residential construction and other efficiency systems. Additional topics include: energy efficient materials (insulation, vapor barriers, caulking, weatherstripping, doors, windows, storm doors and windows, floors, ceilings, attics, and lighting); energy conservation in private and public transportation; conserving energy through driving habits, automobile maintenance, and automobile engine modification; energy efficiencies in the total automobile operation; home energy management systems; principles and practices of re-using energy supplies; and careers in energy conservation. Modules include objectives, activities, and assessment instruments (with answers). (BC)

Descriptors—Computer Oriented Programs, Computers, Educational Research, Elementary Secondary Education, Higher Education, *Learning Activities, *Mathematics Curriculum, *Mathematics Education, *Mathematics Instruction, *Microcomputers, Programming

This updated bibliography was prepared to provide a source of current information on general aspects of instructional computing, and to give particular attention to computing in mathematics education. The general information it contains will provide a starting point for educators who are beginning their work in instructional computing. The references to applications of computing in the mathematics curriculum provide information to beginners as well as to those with more advanced backgrounds. Efforts have been made to be selective, with the major criteria being how relevant the items appear in relation to the purposes of the guide and the currentness of the items. The guide is on a word-processing system, and will be updated and revised semiannually. Section 1 contains sources of hardware, software, and other information. Section 2 contains the bibliographical references, categorized by instructional computing, computer literacy, computer science, management of computer resources, and research summaries. (MNS)

Identifiers—*Africa, Kenya, *Mathematics Education Research

This study concerns the goals of school mathematics in the curricula of African schools. Concerns about the state of mathematics education are noted: not only is achievement declining, but also there has been (1) a student population explosion, so that goals formulated two decades ago are no longer applicable, and (2) rapid growth of informatics (use of calculators and computers) and increased use of mathematics. Five questions were considered: (1) Who were the main agents of curriculum change? (2) What factors led to the changes? (3) What actual changes took place? (4) What were some of the major constraints? (5) What minimum competencies are expected? A questionnaire was mailed to 41 mathematicians or mathematics educators in 30 African countries, seeking information on educational structure and student population, major general goals of education, goals of mathematics at the primary and secondary levels, content of primary and secondary mathematics, curriculum changes of the 1960s and 1970s, the most important goals (minimum competencies), agents of curriculum change, time devoted to mathematics teaching, and language of instruction. Data from reporting countries are presented and discussed under these headings. (MNS)

Vitamin C: A Selective Bibliography. Second Edition. Bibliography Series Eleven.

California Polytechnic State Univ., San Luis Obispo. Library.

Pub Date—84

Note—34p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Biochemistry, Books, *Cancer, Diagnostic Tests, Government Publications, *Medical Research, *Metabolism, *Nutrition, *Pharmacology

Identifiers—Journal Articles, *Vitamin C

Vitamin C is an important vitamin. Since its dis-

covery in 1937, it has been acclaimed as a possible preventive or cure for the common cold, the flu, and even cancer. Others believe vitamin C is harmful if taken in megadoses. As the controversy continues, facts and research results become increasingly important. This bibliography, which provides some sources for these facts and theories, is arranged alphabetically within four types of materials: (1) journal articles; (2) books; (3) newspaper articles; and (4) government documents. Entries, representing the 14-year period 1970 to 1983, are arranged consecutively from 1 to 290 within these categories. An attempt has been made to balance the references to popular articles and books with more technical ones, so that both the general reader and scientist can find something of interest. A subject index keyed to entry numbers is included. (BC)

This book introduces scientists, health professionals, and engineers to principles of communicating with the public and to practical aspects of dealing with the press. Part I focuses on the advantages, principles, and problems of communicating with the public. Part II discusses the nature of science reporting and offers advice for presenting science through the mass media. Topics covered include: recognizing who reports on science; understanding how journalists select topics and prepare stories; problems in presenting science in the mass media; understanding why journalists do interviews; preparing for interviews; what to do during interviews; knowing how the media differ; working with public information offices; and what to do following interaction with journalists. Part III deals with presenting science directly to the public. Topics considered include: writing articles, publishing books, and broadcasting; selecting topics and gathering information (focusing on conducting and using interviews); effective science writing; book preparation; making oral presentations; and pursuing a career in science communication. Information provided will be of value to science, scientists, physicians, and other professionals who have already completed their training; to journalists and other communications professionals who deal with technical topics, and to students in science journalism and science and technical writing courses. Launched by Unesco in cooperation with the United Nations Environmental Programme (UNEP) in 1975, the International Environmental Education Programme (IEEP) will enter its fourth phase during 1984-85. Anticipated IEEP activities are described in this newsletter. They include ex-

change of information and experimental data, promotion of research and experimentation, training of various categories of personnel, preparation and adaptation of educational materials, production and dissemination of experimental teaching materials for general environmental education, and regional and international cooperative efforts. Also presented are reports on: (1) an international symposium on incorporation of the environmental dimension into school curricula and teacher training (Plovdiv, Bulgaria); (2) a seminar for the European region on universities and environmental education (EE); (3) Pan Arab youth meeting on environment and EE (Cairo, Egypt); (4) an environmental training workshop in China; (5) EE activities in Cuba; (6) initiation and development of nonformal education in Portugal; and (7) a summary of the First International Congress of Biosphere Reserves (Minsk, Byelorussia). Brief news announcements on various topics and descriptions of four new EE publications are included. (BC)

Identifiers—*Zimbabwe Secondary School Science Project

The Zimbabwe Secondary School Science Project (ZIM-SCI) developed student study guides, corresponding teaching guides, and science kits for a low-cost science course which could be taught during the third year of secondary school without the aid of qualified teachers and conventional laboratories. This ZIM-SCI study guide is a four-part unit providing activities and experiments which build on concepts about particles learned in ZIM-SCI units C1 ("What is Water?") and C2 ("Particles in Action"). The material included expands students' knowledge to cover requirements of the O-Level General Science Syllabus. Part 1 focuses on elements, compounds, and mixtures, with references to basic concepts taught in units C1 and C2. Part 2 deals with particulate structure in matter with reference to Brownian motion. The concept of electrostatics is introduced in part 3 to get across the idea of matter being made up of tiny charged particles (ions). Protons and neutrons are also introduced. Part 4 deals with various aspects of chemical bonding. Actual O-level examination questions (with answers) as well as information on principles behind the activities and experiments are provided. This document contains plenary and contributed papers presented at the seventh PME meeting, held near Jerusalem, Israel in July 1983. Three plenary papers focused on implicit models in solving problems, discussions with teachers and children, and heuristics. Contributed papers were classified under seven headings: learning theories (generalization, psychological theories, neuropsychological theories), cognitive studies in arithmetic (word problems, natural numbers, fractions and ratio, operations, applications to teaching), cognitive studies in geometry (concept formation, spatial visualization, reasoning), cognitive studies in algebra and related domains (functions, student concepts and misconceptions), computers and mathematics learning, methodology, and teachers and teaching. The supplement contains information about the conference, additional papers (including a plenary paper on research problems), and names and addresses of participants. (MNS)

The Long-Term Impact of Technology on Employment and Unemployment. A National Academy of Engineering Symposium (June 30, 1983).

National Academy of Engineering, Washington, D.C.

Pub Date—83

Note—65p.

Available from—National Academy of Engineering, 2101 Constitution Ave., NW, Washington, DC 20418.

Pub Type—Collected Works - Proceedings (021) EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Employment, Employment Level, Employment Patterns, Employment Problems, Government Role, Industry, *Labor Force, Modernization, *Policy Formation, Productivity, Socioeconomic Influences, *Technological Advancement, *Technology, *Unemployment

Although technological change profoundly affects the types, amounts, and conditions of work in both public and private sectors, there is no agreement among economists, technologists, or labor representatives on the impact of developments of new high-technology industries upon employment. Because the implications of these developments are neither well understood nor easily forecast, a symposium was convened to explore the processes at work so that public policy formulation can take place with an improved understanding of possible outcomes. This document is a summary of the presentations by symposium participants. These include: "Introduction" (John L. McLucas); "National Perspectives: The Definition of Problems and Opportunities" (Wassily Leontief); "Technological Trends" (Roland W. Schmitt); "Work Force Trends" (Thomas M. Stanback, Jr.); "Technology and Employment: Effects on the Socioeconomic Structure" (Irving Bluestone); "A Need for Cooperation Among Private and Public Sectors" (Dennis Chamot); "Short-Term Consequences of Technological Change" (Harley Shaiken); "Effects of the Confluence of Technologies" (Erich Bloch); "Productivity Growth: The Worker" (Pat Choate); "Employment and Unemployment in the Service Sector" (John S. Reed); "Urban Responses to Technological Change" (Narciso Cano); "Employment - Unemployment: Another Look" (Audrey Freedman); "Primary Policy Issues in Question" (William A. Niskanen); and "Should Government Become Actively Involved?" (Arnold Packer). (BC)

Identifiers—*Environmental Education Literacy

These conference proceedings on policies and practices for environmental futures are organized in four main sections: plenary sessions; interest-group sessions; resolutions; and recommendations. Among the topic areas addressed during plenary sessions are environmental education (EE) for the 1980s, a television correspondent's perspective of the environment, environmental and educational quality, and conservation education. Interest group presentations focus on topics and issues related to citizen organizations, elementary and secondary education, higher education (including the structure, status, and future of EE at The Ohio State University and a description of the Behavior and Environment Program at the University of Michigan), governmental organizations, industry and business, and youth organizations. The 17 resolutions introduced, debated, and passed are presented along with 36 recommendations focusing on: (1) the formation of a national center and regional demonstration centers for environmental education; (2) environmental literacy, i.e., targeting audiences and programs in reference to changes occurring in the EE community; (3) suggestions for strengthening both institutional and communications arrangements; and (4) information dissemination and electronics interactions to support EE organizations and programs. This booklet is designed to introduce young people, their parents, teachers, and advisers to various fields of and possible career opportunities in physics. The colorfully illustrated booklet, aimed particularly at junior high school students, highlights the work and experiences of several young physicists. Although physics is not usually taught until the last year of high school, the necessary mathematical preparation is decided at the junior high school level. Therefore, this booklet seeks to inspire junior high school students, who might otherwise avoid technical subjects, to study all the mathematics and science courses they can. (JN)

Singer); "The Molecular and Genetic Technology of Plants" (Joseph E. Varner); "Cell Receptors for Hormones and Neurotransmitters" (H. Guy Williams-Ashman); "Psychobiology" (Steven Hilliard); "Surface Science and Its Applications" (Homer S. Hagstrum); "Turbulence in Fluids" (Willem V. R. Malkus); "Lasers" (C. Kumar N. Patel); and "The Next Generation of Robots" (Jacob T. Schwartz). Also presented is an introductory chapter which outlines overarching themes that become apparent when the eight fields are considered as a whole. These themes include changing perspectives on health care, faster pace of technological innovation, importance to scientific and engineering progress of the effective use of new communications technologies, emergence of research-based technologies, need to examine federal policies regarding research and development considered as a whole, and the quickening dissolution of the traditional boundaries between the fields of science and between science and technology. In addition, this chapter discusses the relation of work in the eight areas to the congressional aim of drawing more fully the relation of science and technology to the large and kaleidoscopic agenda with which the nation must deal. New Directions for Federal Programs to Aid Mathematics and Science Teaching.

General Accounting Office, Washington, D.C.

Report No.—GAO/PEMD-84-5

Pub Date—6 Mar 84

Note—101p.

Available from—U. S. General Accounting Office, Document Handling and Information Services Facility, P.O. Box 6015, Gaithersburg, MD 20760 (first five copies free).

Pub Type—Legal/Legislative/Regulatory Materials (090) — Reports - Evaluative (142)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Educational Quality, Federal Legislation, *Federal Programs, *Instructional Improve-

ment, Mathematics Education, *Mathematics Instruction, Mathematics Teachers, Program Effectiveness, *Retraining, Science Education, *Science Instruction, Science Teachers, Teacher Certification, Teacher Education, Teacher Improvement, *Teacher Shortage

To provide information to the Congress in its continuing debates over improving science and mathematics (S/M) education as well as to education policymakers, the General Accounting Office (GAO) synthesized past evaluation and research studies and used other methodologies to examine four issues: (1) the nature of the problem and its remedies; (2) prospects for upgrading existing S/M teachers; (3) prospects for reducing the S/M teacher shortage by retraining teachers from other subject areas; and (4) the current ability to evaluate the quantity and quality of S/M teaching. Observations on the implications of this work for S/M education legislation are included. GAO does not find evidence that training programs to upgrade existing S/M teachers will improve teaching effectiveness. Such programs are a prominent part of proposed federal legislation. Teacher shortage problems, which are also addressed in the proposed legislation, may be easier to solve. Programs to retrain teachers of other subjects to teach science and mathematics classes seem to be one viable solution to technical teacher shortages. In addition, gaps in information available to policymakers are so severe that GAO could not determine if there are net nationwide shortages of S/M teachers and if the quality of technical teaching has declined in recent years. Contract—232-81-0015

Note—112p.

Pub Type—Collected Works - Proceedings (021) — Reports - Descriptive (141)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Curriculum Design, *Curriculum Development, Evaluation Methods, *Health Programs, Health Services, Higher Education, Medical Education, *Nutrition, *Nutrition Instruction, *Program Administration

This workshop was designed to provide opportunities for health professional schools to gain from an understanding of: (1) the major issues which face nutrition education; (2) promising practices in nutrition education from leaders in the field; (3) the need for nutrition education for all health professions; and (4) nutrition education curriculum design, evaluation strategies, and management practices which foster and improve nutrition education for health professions students. Included are reports on: nutrition priorities in education; the nutrition curriculum, scope, and sequence; role of the physician and dietitian in nutritional care; The American Medical Association perspective on nutrition education; issues in medical education; management of the nutrition curriculum; evaluation strategies for nutrition education curricula; directions for the 1980's in nutrition and health services; intraprofessional education and collaboration; and issues on nutrition education. Among the conclusions drawn from the workshop are those indicating a need for a variety of educational approaches, clinical relevance and application, clearly defined content, and the need to deal with the politics of curriculum development. Lists of exhibits and participants conclude the document. (JN)

Abstracts of most of the papers presented at the 57th Annual Meeting of the National Association for Research in Science Teaching (NARST) have been collected in this publication. Papers focus on such areas as cognitive structure, development of scientific literacy in secondary schools, science teaching as a career, improving science teaching, factors influencing attitudes toward science, teacher characteristics and student performance, intellectual development, concept learning, factors influencing achievement, test construction, science instruction, learning science in out-of-school settings, changing and assessing teacher attitudes, and research methods. Other papers focus on areas dealing with learning in chemistry, science teaching in higher education, microcomputers in the classroom, science curriculum development, cognitive teacher behavior, applying teacher effectiveness findings to preservice and inservice teacher education, inservice teacher education, science process skills, cognitive development and science achievement, secondary analysis results from the 1981-82 National Assessment in Science, spatial learning, problem solving, attitudes toward science, science learning in the elementary school, science for gifted and talented students, and misunderstanding of science concepts. Stanic, George M. A.

Why Teach Mathematics? A Historical Study of the Justification Question.

Pub Date—[Apr 83]

Note—47p.

Pub Type—Historical Materials (060) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Educational Objectives, *Educational Philosophy, Educational Research, History, *Mathematics Curriculum, *Mathematics Education, *Mathematics Instruction

Identifiers—Mathematics Education Research, *Mathematics History

The basic problem which motivated this study is that the present universal support given the teaching of mathematics has led to a neglect of the justification question. That is, we are sometimes careless in presenting rationales for teaching mathematics and do not adequately consider the consequences of invoking particular rationales. The major purpose of the study was to identify and discuss answers to the question of why we should teach mathematics in order to provide some perspective for the present historical moment. Using the curriculum interest groups identified by Kliebard (i.e., humanists, developmentalists, social meliorists, social efficiency educators) as a framework for the research, the development of rationales for teaching mathematics was traced from 1890 to 1940. The historical data indicate that the humanist interest group, which emphasized the place of mathematics in the Western cultural heritage and the value of mathematics study for developing reasoning ability, faced a growing challenge from a developmentalist/social efficiency coalition which espoused a directly functional rationale for teaching mathematics. Based upon certain problematic responses by the humanists to the developmentalist/social efficiency coalition, present-day positions taken by the National Council of Teachers of Mathematics were analyzed. Identifiers—*Mathematics Education Research, Piagetian Tasks

This study investigated: (1) the relationship between the development of information processing capacity and certain Piagetian logical reasoning abilities; and (2) how the development of these cognitive abilities related to acquisition of certain measurement concepts. Forty first-grade children were individually administered tests of conservation of length and number, transitivity of length, information processing capacity, and basic length measurement concepts. The Piagetian measures of logical reasoning were positively correlated with information processing capacity, but the measures of information processing capacity failed to account for much of the variability of performance on the logical reasoning tasks. Some children at the highest levels of processing capacity failed the logical reasoning tasks and some at the lowest level passed them, suggesting that the logical reasoning tasks are not simply measures of information processing capacity. Furthermore, information processing measures accounted for 25% of the variance in performance on the linear measurement tasks, and length conservation accounted for an additional 23%. Although these two measures accounted for almost half of the variance, it is not clear that they represent prerequisites for learning basic length measurement concepts. Some children at low levels on both measures successfully completed the measurement tasks. (Author/MNS)

Descriptors—Cognitive Processes, *College Science, Concept Formation, Higher Education, *Instructional Design, *Physics, *Problem Solving, Science Education, *Science Instruction

Identifiers—*Science Education Research

The research described in this paper leads to an instructional design approach which is an alternative to the consideration of such issues as mathematical skills or level of cognitive development. The approach uses an analysis of traditional instructional tasks to specify the underlying cognitive processes and structures necessary for the successful completion of the tasks; that is, a cognitive analysis of instructional tasks, rather than a logical analysis, is used to arrive at appropriate instructional goals. The approach involves taking a standard form of a question and converting it to a qualitative problem. Appropriate levels of existing relevant knowledge and experience are then determined, and a series of questions and specific, single-observation laboratory exercises are used to gradually develop a schema for the problem solution. The interaction implicit in the strategy allows for the retention of appropriate aspects of existing schemata and the modification of conflicting aspects. Two broad aspects of differences between physics experts and novice physics students relevant to physics problem solving are considered in the approach. These aspects come from recent cognitive psychology research into processes and structures used by experts and novices in physics problem solving and from science education research into student world views. Descriptors—*Animals, *Classification, *College Science, Documentation, Guidelines, Higher Education, Laboratory Procedures, Museums, Science Laboratories

Identifiers—*Biological Specimen Collections

This manual provides practical advice on the appropriation, conservation, and documentation of a marine biological reference collection, in response to needs expressed by Mediterranean Arab countries. A reference collection is defined as a working museum containing a series of specimens with which biologists are able to compare their own material. The manual first reviews the principal methods for collecting marine biological samples from plankton, nekton, and benthos. Next, advice and recommendations are provided on the treatment of samples immediately after their collection and subsequently in the collection center. Topics considered include sorting, fixation and preservation, and labelling. The documentation which must accompany each sample throughout its existence is emphasized since, without such documentation, the sample has no scientific value. The last section of the manual touches on the problems of ethics and of the security of access to the collections by potential users. Additional information provided in appendices includes bibliographic references, a suggested classification scheme for the collections, addresses of suppliers of materials and equipment, examples of labels, and a schema explaining the principles of an adequate documentation system. Identifiers—*Engineering Curriculum

This report contains recommendations on advanced university curricula in ocean engineering and related areas, emphasizing the needs of developing countries. A decision matrix is included to assist users in developing the necessary criteria for designing appropriate curricula to prepare university students for careers in different ocean engineering fields. Examples of curricula in four fields are presented to illustrate use of the matrix. They include: (1) offshore structural engineering; (2) coastal and nearshore engineering; (3) ocean instrumentation; and (4) fisheries engineering. Discussions on necessary and desirable requirements for introducing advanced ocean engineering curricula in terms of human resources, physical facilities, and teaching aids are also presented. In addition, recommendations for the strengthening of ocean engineering in general are provided. (Author/JN)

Identifiers—*Man And The Biosphere

The Man and the Biosphere Programme (MAB) was launched in November 1971 under the auspices of Unesco. Its aim is to help to develop scientific knowledge with a view to the rational management and conservation of natural resources, to train qualified personnel in this field, and to disseminate the knowledge acquired both to the decision-makers and the population of various countries. Included in this bulletin are discussions of MAB's role, structure, goals, activities (including environmental education and training and the development of an international network of protected areas called biosphere reserves), and themes. Two major themes concern man as a part of the biosphere and interdisciplinary participation in MAB projects. A list of 14 major MAB project areas is also provided. These areas include ecological effects of increasing human activities on tropical and subtropical forest ecosystems, perception of environmental quality, and research on environmental pollution and its effect on the biosphere. Brief comments on MAB information materials and a flow chart illustrating the organization of MAB national committees are included in an appendix. (BC)

Identifiers—Environmental Education Research, *International Environmental Education Programme, *United Nations Environment Program

This overview of the International Environmental Education Programme (IEEP) begins with an introduction which outlines IEEP objectives and goes on to provide, in section 2, a working definition of environmental education (EE). This is followed by three reports, on the Belgrade Workshop on Environmental Education, regional conferences, and the Intergovernmental Conference on Environmental Education (ICEE) respectively. The first report includes "The Belgrade Charter-A Global Framework for Environmental Education," which focuses on the environmental situation, environmental action goals, EE goals, EE objectives, and guiding principles of EE programs. It also describes workshops proceedings, and gives a list of working papers discussed at the conference. The ICEE report includes discussions of major environmental problems in contemporary society, the general conference report (addressing such issues as environmental problems and the role of education, current EE efforts, national level strategies, EE programs and curricula, instructional materials, personnel training), and the declaration adopted by conference delegates. Provided in appendices are descriptions of the United Nations Environment Programme, the International Environmental Education Network, and Unesco's Man and the Biosphere Programme; the main working document for the ICEE; and a statement by the International Union for Conservation of Nature and Natural Resources (presented at the ICEE conference) which focuses on its role in environmental education. The role of computers (especially microcomputers) in the mathematics curriculum and suggestions for using them in mathematics instruction are discussed in this yearbook. The 27 articles are presented under five headings. Part 1, Issues, includes articles on comprehensive instructional computing, possible new curricula, and a syllabus for a computer literacy course. Part 2, The Computer as a Teaching Aid, includes descriptions of computer-based numeration instruction, the computer as a learning center, and courseware for various mathematical topics. In Part 3, Teaching Mathematics through Programming, are suggestions for using computers with students at each school level, including problem solving and applications. Part 4, Diagnostic Uses of the Computer, provides articles on computer diagnosis of algorithmic errors and diagnostic uses of computers in precalculus mathematics. Part 5 is a selected bibliography on computers in the classroom. (MNS)

Identifiers—Alberta (Edmonton)

This publication provides background information, ideas, and sample activities to help teachers in their efforts to aid students in developing problem solving skills. It provides an overview of the stages in the problem solving model recommended in the elementary mathematics program of studies. Several clusters of problem solving strategies are suggested for each stage of the model. Additional ideas on organization for instruction, the use of textbooks, and sources of problems and problem solving materials are included in a reference list. The document is divided into sections on problem solving as the focus of the curriculum, a general framework for problem solving, the problem solving model, planning for instruction in grades 1 and 2 and in grades 3 through 6, using the prescribed learning resources, and working through the model. Extensive classroom materials follow, such as sample problems for grades 1 through 6, calculator problems, computer problems, and challenge problems. (MNS)

Hydrology is the science dealing with the earth's waters, their occurrence, circulation, and distribution, their chemical and physical properties, and their reaction with the environment. As such, hydrology is an indispensable requirement for planning in the field of water resources. Objectives for, spectrum of, and topics for education in hydrology as well as the present state and future trends of educational programs in this field are discussed. Included in detailed appendices are: (1) reference syllabi for hydrological topics; (2) syllabi for topics for advanced study in hydrology; (3) curricula and syllabi recommended for the education and training of professional personnel in operational hydrology, for complete undergraduate training in hydrology, for some Unesco sponsored post-graduate programs in hydrology, and for some undergraduate and graduate options in training for degrees in other fields than hydrology; and examples of short duration specialized programs and hydrology subjects included in programs for other degrees. Descriptors—Civil Engineering, *College Science, Data Collection, *Facility Guidelines, Facility Requirements, *Hydraulics, Measurement, *Measurement Equipment, Postsecondary Education, Science Equipment, *Science Laboratories, Water, *Water Resources

Identifiers—Hydrology

This monograph is intended to guide teachers of water resources, technicians and university students in establishing physical facilities which can introduce learners to methods, techniques, and instruments used in water resources management and assessment. It is not intended to serve as an exhaustive list of equipment and their descriptions or as a laboratory manual, rather it is a form of rough blueprint to aid in planning laboratory experiences and in selecting equipment and experiments. The facilities described are limited to hydrological and hydraulic aspects of water resources design and management. Specifically excluded are matters directly related to water quality. The monograph is organized into five chapters: introduction; general concepts of measurement; hydraulics laboratories; hydrological teaching facilities; and use of experimental facilities in water. The material in these chapters represents requirements for a minimum facility for training in the measurement and collecting of water resources data. Although recommendations for equipment and instruments for both hydraulic and hydrological teaching facilities, and descriptions of possible physical arrangements are provided, restrictions imposed by funding, class size, climate, level of trainee, objectives of training programs, and other factors may lead to differences in selection of alternatives in facility size and equipment. Identifiers—Hydrology
Because of the uncertainty related to water resources development projects, and because of the multitude of factors influencing their performance, the systems analysis approach is often used as an instrument in the planning and design process. The approach will also yield good results in the programming of the maintenance and management of the engineering works. Definitions, characteristics, and a short history of the systems approach to water resources development are discussed in chapter 1. Manpower needs are considered in chapter 2. Systems analysis in curricula for hydrologists and engineers (focusing on undergraduate programs for civil engineers and post-graduate programs) are discussed in chapter 3. Subjects which are important, if not essential, for systems analysis of water resources are reviewed in chapter 4. These subjects include political science, economics, engineering economy, project financing, mathematics, computer programming, and statistics. Use of problem work and case studies as well as integration with design work, cooperation among disciplines, and management games are discussed in the fifth and last chapter. (BC)

This manual is designed to introduce adults to microcomputers. It is planned for use with a series of five two-hour labs on Apple II or IIe computers, with participants expected to review sections and practice on a microcomputer between sessions. The goals are to have participants (1) understand how programming languages work, (2) understand the power and purpose of three types of software (word processing, electronic spreadsheets, and database management), (3) determine what skills they want to develop next, and (4) realize how much fun the computer can be. Helpful vocabulary is listed first, followed by sections on an introduction to Logo, word processing for the author, an introduction to BASIC, electronic spreadsheets, and database management. Each describes the purposes and what to do in some detail. A brief bibliography is also included. (MNS)

Identifiers—Massachusetts

The purpose of this manual is to help teachers and administrators develop a realistic plan for integrating microcomputers into the curriculum. It is based on the assumptions that (1) computers are a tool appropriate for every child, (2) teachers need additional training to use microcomputers effectively, (3) computer activities should be integrated throughout the program, and (4) priorities must be established for the use of a scarce resource. Some relevant concerns are first discussed, followed by a description of 15 curriculum development steps. Sample goals and objectives are then presented for such concerns as respect for others, development of individual potential, and effective learning habits; and for specific learning areas, including mathematics competence, writing, reading comprehension, problem solving, vocational competence, and artistic competence, as well as the interrelationship between technology and society, computer operation, and programming. Task force organizational issues and a teacher training sequence are given in the appendices. (MNS)

Descriptors—Calculators, Educational Research, Elementary Secondary Education, *Estimation (Mathematics), *Literature Reviews, *Mathematical Concepts, *Mathematics Curriculum, *Mathematics Education, *Mathematics Instruction, Surveys

Identifiers—*Estimation, *Mathematics Education Research, Ontario

This study was designed to: (1) outline briefly the meaning and importance of the family of concepts stemming from the ideas of estimation, approximation, checking, and precision; (2) survey the present place of such concepts in the curriculum; and (3) relate the teaching and learning of these concepts to the availability of the calculator as an emerging tool for reducing computational labor. Relevant literature was extensively surveyed; the meanings of the terms were analyzed; their role in the curriculum was traced; and the use of the hand-held calculator was addressed. The following section discusses the literature under the headings of meaning, rationale, research, the curriculum, and teacher strategies. The present place of these concepts in the Ontario school mathematics curriculum was analyzed using surveys of mathematics coordinators and comparisons of textbooks and other documents. Results of the questionnaire survey and document analyses are found in the next section, followed by a brief summary. A bibliography is included, as well as documents related to the survey. (MNS)

Classification of Living Things. A Teacher's Manual for General Level Program Development. Grades 7 and 8. Science and Society Teaching Units. Informal Series/55.

Ontario Inst. for Studies in Education, Toronto. Report No.—ISBN-0-7744-5067-3

Pub Date—84

Note—71p; For related documents, see ED 211 367-368.

Available from—Ontario Inst. for Studies in Education, 252 Bloor St., W., Toronto, Ontario, Canada M5S 1V6 (\$7.50 prepaid).

Pub Type—Guides - Classroom - Teacher (052)
Document Not Available from EDRS.

Descriptors—*Biology, *Classification, Environmental Education, Intermediate Grades, Junior High Schools, Ornithology, *Outdoor Activities,

Recreational Activities, *Science Activities, Science Education, *Secondary School Science
Identifiers—*Science And Society

This manual is one of a series designed to assist junior high school teachers in developing general level or non-academic science programs which focus on the relationship between science and society. Although designed primarily for grades 7 and 8, the content is also suitable for students in grade 6. The major portion of the manual consists of six teaching episodes. Each episode begins with a curriculum summary which outlines the content, teaching essentials, objectives, and evaluation examples (keyed to objectives). This is followed by a detailed description of how to teach the lesson, indicating how the flow of instruction should go to make maximum use of the manual. All episodes are tied together by a story line to help students understand that knowledge of the classification of living things is useful in enhancing such outdoor and leisure activities as hiking and bird watching. The manual also takes account of the relationship between classification in biology and the "everyday language" or informal classification schemes with which young students are already familiar. Teacher and student resource sheets to accompany the episodes are provided in the appendices. (JN)

Task Force for the Study of Chemistry Education in the United States. Preprint-Recommendations.

American Chemical Society, Washington, D.C.

Pub Date—20 Mar 84

Note—22p; Document is printed on brown paper and may not reproduce well.

Available from—Ken Chapman, Education Division, American Chemical Society, 1155 - 16th St., NW, Washington, DC 20036.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Chemical Industry, *Chemistry, *College Science, *Curriculum Development, *Educational Improvement, Educational Quality, *Elementary School Science, Elementary Secondary Education, Higher Education, Professional Continuing Education, Science Careers, Science Curriculum, Science Education, Science Instruction, *Secondary School Science, Toxicology

Virtually every aspect of chemistry education was examined to determine changes needed to improve public understanding of science in general and chemistry in particular, and to improve the effectiveness of chemistry education. Among the findings reported are those indicating that: misunderstanding of science is widespread and public understanding of chemistry is poor; too few high school chemistry teachers are well grounded in the subject; laboratory exercises are slowly disappearing from general chemistry in high school and college; and that applications of both information technology and discoveries about learning are occurring haphazardly. Conclusions drawn from those and other findings take the form of 40 principal recommendations and numerous ancillary ones. Recommendations focus on the concern for the nationwide low level of public understanding of science and on problems and issues related to education at all levels, as well as to the following: science education in elementary schools, high schools, two-year colleges, colleges and universities; careers; continuing education; and role of the chemical industry. Recommendations include a minimum of three years of high school laboratory science for admission to college, a national effort to add science to the present basic triad of school subjects, and development of a model science program for each elementary school grade level. Descriptors—*Computer Programs, Elementary Secondary Education, Higher Education, Instructional Materials, *Material Development, Mathematics Education, *Mathematics Instruction,

*Microcomputers, Science Education, *Science Instruction, *Teacher Education
Identifiers—Mathematics Education Research, Science Education Research, *Software Evaluation

This study examined the extent to which opportunities created by computer technology addresses the needs in school science and mathematics instruction. Information was gathered by obtaining descriptions of most available software; reviewing published software evaluations, grant-supported software development projects, and a broad selection of software; and by consulting experts in the field and school personnel. Among the findings reported are these: although software development is expensive and risky, software production is high; while a large amount of software is available, more high quality and classroom usable software is needed; both normative and descriptive software evaluations are greatly needed; many channels for software dissemination are inadequate to keep teachers fully informed about available software; schools allocate inadequate resources for software acquisition; microcomputer software can increase the range of science and mathematics topics successfully covered; and appropriate software can improve student performance in current courses. Broad improvements in teacher knowledge about the technology and the topics it facilitates, software dissemination, and classroom implementation are recommended to meet identified needs. These recommendations include developing software that teaches problem-solving skills, empowers students, and addresses process objectives. (JN)

Identifiers—National Science Foundation

This statistical review is the second in a biennial series mandated by Public Law 96-516. This report, which provides a comprehensive overview of the participation of women and minorities in science and engineering (S/E) employment and training, is divided into three chapters. The first chapter focuses on the representation of women and minorities in S/E employment and differences in employment characteristics between sex and racial groups independent of the overall employment levels. The second chapter considers measures that indicate underutilization of those with scientific and engineering skills, with particular attention to differences between the sexes or among racial/ethnic groups. The third chapter examines the acquisition of scientific and engineering skills, highlighting differences in academic coursework, performance on achievement tests, and undergraduate and graduate degree production. Data within each chapter are presented first for women and then for racial minorities and Hispanics. The physically handicapped in science and engineering are also considered in the first chapter. Among the findings reported are those indicating that despite substantial gains over the past decade, women and minorities are still underrepresented in S/E employment and training, and that their rates of participation in precollege science and mathematics courses and in undergraduate and graduate S/E education are lower than those of men. The appendix includes 77 statistical tables. (JN)

Descriptors—Conservation Education, Curriculum Guides, *Electricity, Elementary Secondary Education, *Energy, *Energy Conservation, *Fuels, Instructional Materials, *Resource Materials, *Science Activities, Science Education, Science Experiments

Identifiers—Alternative Energy Sources, *Energy Education, Geothermal Energy

This list of energy resource materials is broken down into five categories: (1) general resources; (2) electricity; (3) nuclear and fossil fuels; (4) conservation; and (5) future fuels. (An added feature for New York residents is a concluding list of resources available gratis from New York electric companies). Materials cited include audiovisual aids, charts, activities, books, experiments, games, booklets, and periodicals. Each entry is annotated to show its potential value and use in the classroom. Appropriate grade levels are suggested, but these will vary with the locale and the way the material is employed. Only those items thought to be significantly helpful to students and/or teachers are included. Each resource is evaluated as strongly recommended for student use without restrictions, recommended for student use under teacher guidance, or recommended for teacher reference. Two matrices are also provided. A grade level-topic matrix enables users to find resources on a specific energy topic appropriate for a given instructional level. A grade level-resource matrix enables users to locate for a given instructional level the kinds of curricular materials that which will best complement intended energy lessons. (JN)

Descriptors—Diseases, Drug Education, Elementary Education, *Elementary School Science, Food, *Health Activities, Health Education, *Human Body, *Individual Development, *Nutrition, Poisons, Pollution, Safety, *Science Activities
Provided is a collection of 54 health education activities which attempt to bridge the gap between health information and changing health-related behaviors. The activities, which vary in content and in levels of difficulty, are grouped into six chapters with a range of 8 to 11 activities in each chapter. Chapters focus on body organs and systems, the five senses, growth and development, nutrition and foods, pollution and diseases, and on drugs, poisons, and safety. Each activity includes title, focus (concepts and/or skills developed by the activity), background information, challenge (problem-oriented approach to stimulate youngsters' interests), a list of materials and equipment needed, instructional strategies, further challenges, and a list of student and teacher reference materials. An introductory chapter which defines health education and discusses the need for health education and children's interest in health topics is also included. (JN)

Measurement, *Problem Sets, *Problem Solving, Quantitative Tests, Ratios (Mathematics), Teaching Methods

Identifiers—PF Project, *Word Problems (Mathematics)

A collection of word problems for fifth and sixth grade students are presented. The problems, which are divided into four sections and which get progressively more difficult in each section, include: (1) 38 problems on ratio and proportion; (2) 40 multistep problems (problems which require more than one calculation); (3) 40 problems on geometry and measurement; and (4) 40 "trial and arrow" problems (problems in which a reasonable guess is made and the results of that guess point out the correct answer or a more reasonable guess). Answers are provided immediately following each section. An introduction for the teacher suggests ways in which the problems could be presented. Five copies of a five-item, 15-minute problem-solving test for use in a local competition are provided along with an answer key and form for recording students' results. This document is part of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. (DC)

This curriculum guide is presented in a sequential and repetitive format so that the student may master one objective before proceeding to the next. It is designed to allow the teacher to be creative in meeting the needs of special populations. Each unit contains five parts: (1) instructional subarea; (2) instructional objectives; (3) performance objectives; (4) activities; and (5) materials/resources. Each unit contains one instructional subarea which is divided into two or more instructional objectives. Each instructional objective is divided into performance objectives. Activities and materials/resources are listed for each performance objective. The activities are designed so that they may reinforce the performance objectives independently of the materials/resources. The units for grade 6 are: numeration, basic operations, money, time, geometry, measurement, fractions, division, and practical applications. The grade 7 units are: numeration, basic operations, time, geometry/measurement, fractions, and practical applications. The units for grade 8 are: basic operations, money, geometry/measurement, fractions, decimals, and practical applications. A list of textbooks used at each grade level, a list of supplemental resources, a scope and sequence of objectives for each grade level, and a 17-item bibliography of mathematics books are included. (DC)

Descriptors—Animals, Art Activities, Interdisciplinary Approach, Learning Activities, *Paleontology, Primary Education, Units of Study
Identifiers—*Dinosaurs, Dioramas, PF Project

This four-week unit of study for grades 1-3 provides information and activities on 17 different dinosaurs. A 21-item pre- and post-test and a brief history of dinosaurs precede descriptions and full-page drawings of the following dinosaurs: (1) giant plant-eaters (brachiosaurus, brontosaurus, and diplodocus); (2) giant meat-eaters (allosaurus, gorgosaurus, and tyrannosaurus); (3) plated dinosaurs (stegosaurus); (4) armored dinosaurs (ankylosaurus); (5) duckbills and parrot beaks (psittacosaurus and trachodon); (6) horned dinosaurs (monoclonius, protoceratops, and triceratops); (7) lightweights (ornithomimus, oviator, and procompsognathus); and (8) flying reptiles (rhamphorhynchus). Following an explanation for the disappearance of dinosaurs, an activity section includes riddles, poems, a crossword puzzle, math problems, and additional activities which involve comprehension, writing, and visual perception skills. All activities have a dinosaur theme. Directions for making a dinosaur diorama conclude the activity section. A nine-item bibliography of books about dinosaurs is also included in this guide. This document is part of a collection of materials from the Iowa Education Agency 7 Teacher Center project. (EM)

Gibson, Paul R.

Mostly Plants. Individualized Biology Activities on: I. Investigating Bread Mold; II. Transpiration; III. Botany Project; IV. Collecting/Preserving/Identifying Leaves; [and] V. Student Science Laboratory Write-Ups.

Area Education Agency 7, Cedar Falls, IA.

Pub Date—[80]

Note—37p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Behavioral Objectives, *Biology, *Botany, Individualized Instruction, Learning Activities, Science Activities, *Science Experiments, *Science Projects, Secondary Education, Secondary School Science, *Student Projects, Student Research, Teaching Guides

Identifiers—PF Project

Individualized biology activities for secondary students are presented in this teaching guide. The guide is divided into five sections: (1) investigating bread mold; (2) investigating transpiration; (3) completing a botany project; (4) collecting, preserving, and identifying leaves; and (5) writing up science laboratory investigations. The sections on bread mold, transpiration, and leaves include teacher's guides and students' pages. The students' pages contain activities requiring reading, writing, research, experiments, and drawing. The teacher's guides include student objectives, lists of materials needed, optional activities, and answers to quizzes and questions. Suggestions and instructions for both the teacher and the students are given for the nine-week botany projects and for the science laboratory write-ups. The write-ups are required of students who wish to conduct independent investigations. This document is part of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. Consumer Mathematics Curriculum Guide.

Louisiana State Dept. of Education, Baton Rouge.

Pub Date—81

Note—51p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Behavioral Objectives, Budgeting, *Consumer Economics, *Consumer Education, Credit (Finance), Curriculum Guides, High Schools, Learning Activities, *Mathematics Curriculum, *Money Management, Purchasing, *Secondary School Mathematics, State Curriculum Guides

Identifiers—*Consumer Mathematics, Consumer Skills, PF Project

This guide for high school consumer mathematics (one in a set of curriculum guides developed by Louisiana statewide mathematics curriculum committees) contains a course outline, performance objectives, and coordinated activities designed to teach skills that students will need as citizens and consumers. Background on the development, imple-

mentation, and use of the set of guides and lists of the various curriculum committee members are followed by a list of 15 student goals for the consumer mathematics course and a pacing chart indicating the number of weeks to devote to each topic. Topics for which there are objectives and activities are: (1) personal finances; (2) transportation; (3) housing; (4) taxes; (5) insurance; (6) money-saving activities; (7) investments; and (8) budgeting. Four suggested consumer mathematics student projects are described. A 13-item bibliography, a resource list of educational kits and pamphlets, and a list of sources of further information are also included. (JW)

What Is a Gas? A Find-Out Book: Demonstrations, Experiments, Ideas.

American Gas Association, Arlington, VA. Educational Services.

Pub Date—72

Note—46p.

Available from—American Gas Association, 1515 Wilson Blvd., Arlington, VA 22209 (one per teacher).

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Class Activities, Elementary Education, *Elementary School Science, Science Activities, *Science Experiments

Identifiers—*Air, *Gases, PF Project

Twelve desk-top experiments and demonstrations which illustrate properties of and facts about gas are presented. Each experiment includes: purpose, materials needed, instructions, and a list of facts and properties that have been observed. Several of the activities also include questions for students and items for discussion. The topics of the activities, which use materials commonly found in the home, are: (1) gases can push; (2) additional examples that gases can push; (3) air pushes upward; (4) compressed air changes temperature when it goes through a small opening into a place of lower pressure; (5) making of a mixture of solids; (6) making of a mixture of liquids; (7) fire needs air to burn; (8) candle wax vaporizes before it burns; (9) determination of the rate at which a candle burns; (10) a cooled flame causes incomplete burning; (11) relationship of carbon dioxide to burning; and (12) observation of carbon dioxide in exhaled air. Also included are a conclusion and summary of the experiments, and lists of facts about gases, materials needed for each experiment, and three other instructional resources available from the American Gas Association. Descriptors—Chemical Analysis, *Ecology, Environmental Education, Laboratory Procedures, *Science Experiments, Secondary Education, *Secondary School Science, Units of Study, *Waste Water, Water, *Water Pollution, Water Quality, *Water Treatment

Identifiers—*Acid Rain

Materials for teaching a unit on water pollution are provided in this teaching package. These materials include: (1) a student reading booklet; (2) a reference booklet listing a variety of popular chemical, biological, and physical tests which can be performed on a local waterway and providing information about the environmental effects and toxic limits of various potential pollutants; (3) a selection of simple in-class and field experiments printed on loose sheets for ease of reproduction; and (4) a teacher's guide to field testing a local water source. Although there are enough student reading materials, worksheets, and experiments to keep interest high for as long as 5 weeks, a 2 or 3 week unit is recommended. These materials, written at an approximate seventh-grade reading level, are designed especially for, but not limited to, students in grades 7 through 10. (JN)

New Trends in Primary School Science Education.

Volume I. The Teaching of Basic Sciences.

United Nations Educational, Scientific, and Cultural Organization, Paris (France).

Report No.—ISBN-92-3-102034-X

Pub Date—83

Note—225p.; This volume composed of background documents provided for a Meeting of Experts, on the Incorporation of Science and Technology in the Primary School Curriculum (Paris, June 1980).

Available from—UNESCO, 7, place de Fontenay, 75700 Paris, France.

Pub Type—Reports - Descriptive (141) — Collected Works - General (020)

Document Not Available from EDRS.

Descriptors—*Curriculum Development, Educational Objectives, *Educational Trends, Elementary Education, *Elementary School Science, Foreign Countries, Program Content, *Science Curriculum, Science Education, *Science Instruction, Science Materials, Science Programs, *Teacher Education, Technology

Provided are edited background papers prepared for a Meeting of Experts on the Incorporation of Science and Technology in the Primary School Curriculum. Papers are organized into four major sections. Section 1 is concerned with such topics as the rationale and objectives of science and technology in primary schools, selection of appropriate content, and organization for science at various levels. Primary science instruction in Brazil and France and implications of the relationship between science and fate control are also considered. Section 2 focuses on recent trends in the nature of curriculum programs and materials, primary school science in Sri Lanka, the Indonesian Development School Project in Science, and natural science in Bulgarian schools. Section 3 considers problems of implementing science programs, assessment and recordkeeping as part of teaching primary school science, and the supply of science equipment. A description of the New Zealand Learning in Science Project is also provided. Section 4 focuses on preparing teachers for primary school science, skills of primary school science teaching, and the training of science teacher educators in Africa. Each section begins with a short editorial introduction summarizing the papers which follow. A fifth section containing major recommendations of the meeting is also provided. (JN)

Descriptors—Cross Age Teaching, Educational Research, Elementary Secondary Education, Enrollment, Grade 6, *Mathematics Achievement, *Mathematics Education, *Mathematics Instruction, *Microcomputers, Secondary School Students, *Student Attitudes, *Tutoring

Identifiers—*Mathematics Education Research

This project was designed to develop a combinational strategy using microcomputers and cross-aged instruction designed to: (1) increase the achievement of low-achieving sixth-grade students; (2) increase enrollment in high school mathematics and science courses; (3) evaluate microcomputers as a unique instructional tool; and (4) develop effective applications of microcomputers. Thirty-four high school students served as tutors for 34 sixth-grade students. During an 18-week pre-tutoring period, the high school students were trained to be tutors using microcomputers. During the 18-week tutoring period, the high school students tutored the sixth-grade students. Pre- and post-treatment data were collected on the mathematics achievement and attitudes of both groups, as well as data on attendance and enrollment. The methodology used is described, and the results, conclusions and recommendations are presented. The combinational strategy had no noticeable effect on the achievement of the sixth-grade students. Their attitudes toward mathematics, computers, and science and technology were positive, but not influenced by the tutor-

ing; the high school students' attitudes toward computers became significantly more positive. Appendices include the instruments used in the project. (MNS)

A Report to Congress on the Evaluation of Health Manpower Shortage Area Criteria.
Health Resources Administration (DHHS/PHS), Hyattsville, Md. Bureau of Health Professions.
Report No.—ODAM-2-84
Pub Date—Sep 83

Note—194p.; Portions of appendices may be marginally legible due to small or light print.
Pub Type—Reports - Evaluative (142)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Evaluation Criteria, *Federal Legislation, Federal Programs, *Health Needs, *Health Personnel, Health Services, *Labor Force, *Labor Needs, Program Evaluation
Identifiers—*Health Manpower Shortage Areas, Public Health Service Act

This report evaluates current health manpower shortage area (HMSA) designation criteria against defined standards and program objectives, assesses possible alternatives and improvements to those criteria, and examines possible approaches to, and feasibility of, measuring demand and predicting the likelihood that unmet demand in an area will be met within 2 years. HMSAs are defined by federal legislation to include urban and rural geographic areas, population groups, and facilities with shortages of health manpower. The report is organized into three major parts. Part 1 provides essential background information on HMSA criteria and designation process. Part 2 presents results of the detailed technical analysis undertaken. Part 3 presents major conclusions and provides a series of recommendations, both for specific improvements in the HMSA criteria and for further research. The most important conclusion emerging from the findings is that the HMSA criteria performed best of the various alternatives in terms of measuring the basic shortage concept they were designed to measure—the density of physicians in an area. (Provided in appendices are detailed tables and other exhibits relevant to analyses presented in the body of the report.) (BC)

Descriptors—Calculators, Computation, *Educational Change, Elementary Secondary Education, Estimation (Mathematics), *Mathematics Achievement, *Mathematics Curriculum, *Mathematics Education, *Mathematics Instruction, Measurement, Microcomputers, Problem Solving, Sex Differences, Statistics

Issues in school mathematics programs are considered in this book. In the first section, mathematics education at the start of the decade is examined through two articles: a discussion of the status of mathematics programs and of prospects for the 80s, and an interpretation of the results of the second national mathematics assessment of the National Assessment of Educational Progress (NAEP). The next five articles discuss the basics: the role of computation in the curriculum, the basic nature of measurement, the increasing importance of estimation, experiences with finding and using data, and the scope of problem solving in the curriculum. Section 3, on the tools of technology, contains suggestions for using calculators and a discussion of the increasing importance of computers in school mathematics. In section 4, mathematics as a critical filter is considered in two final articles: one on women and mathematics and one on the case for a new high school mathematics curriculum. (MNS)

Dolciani vs. Saxon: A Comparison of Two Algebra I Textbooks With High School Students.

Oklahoma City Public Schools, OK. Dept. of Planning, Research, and Evaluation.

Pub Date—[84]

Note—36p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Algebra, Drills (Practice), Educational Research, *Homework, *Mathematics Instruction, Problem Solving, Secondary Education, *Secondary School Mathematics, *Teaching Methods, *Textbook Research, Textbooks
Identifiers—*Mathematics Education Research

This study examined achievement differences between algebra students taught with the non-traditional textbook developed by Saxon and those taught with a "traditional" textbook by Dolciani. Student absences, rate of turning in homework, and ability level were considered, as well as teachers' comments. One Algebra I section in each of seven schools used the Saxon text, while a second section in each school used the Dolciani text, with the same teacher teaching both sections. In an eighth school, the texts were used with two sections of Elementary Algebra students. (However, data from these two classes and from one of the seven Algebra I teachers were not used in the analysis.) An analysis-of-covariance design accounted for students' initial achievement level differences prior to entering Algebra I. The Spring, 1981, California Achievement Test total math score was used as a covariate. The locally-constructed Algebra I Comprehensive Exam assessed course achievement. The mean score of the 98 students using the Saxon text was significantly higher than the mean score of the 67 students using the Dolciani text. The Saxon classes had slightly more absences and turned in homework slightly less frequently than the Dolciani classes. Most teachers preferred the Saxon text. An addendum discusses inter-test correlation and data from the California Achievement Test. (MNS)

Identifiers—*Mathematics Education Research

This is the fourteenth annual listing of research on mathematics education prepared for the Journal for Research in Mathematics Education. References are organized alphabetically by author within three categories: research summaries, articles, and dissertations. Included are 37 summaries, 247 articles, and 300 dissertations. Studies focused on mathematics education are annotated, whereas studies in which mathematics education was not the primary focus are usually not annotated. Annotations generally indicate one principal finding of a study, although most studies have additional findings. Journals searched and the number of articles located in each are listed. Also provided is an index to aid in locating references to designated mathematical topics: achievement, algebra, arithmetic operations, attitudes and anxiety, calculators and computers, cognitive style, diagnosis and remediation, ethnic and social variables, geometry and measurement, learning, learning disabilities, materials, number and numeration, organizing for instruction, problem solving, sequencing, sex differences, and test analysis. Grade or age level is noted for each entry. (MNS)

The review of science education research for 1982 includes analyses of 455 studies reported in dissertation abstracts, journal articles, research papers, and papers presented at conferences. The organization of the review is topical. Topic areas include: (1) student characteristics and behavior (cognitive development, conceptual understanding, problem-solving behavior, attitudes, personal attributes, targeted audiences); (2) teacher characteristics and behavior (knowledge, beliefs, and attitudes, self-perceptions, classroom and professional behavior); (3) instructional strategies and environment (instructional systems, problem-solving instruction, experiential learning, laboratory experiences, demonstrations, organizational aids to learning, emphasis on language arts during science instruction, teaching style and techniques, classroom social environment); (4) instructional materials and technology (microcomputers, textbooks, visual media); (5) curricula and programs in elementary, middle, and high school science, postsecondary education, and marine education; (6) preservice and inservice teacher education; (7) research and evaluation practices (quantitative and qualitative methodology, testing, instrumentation, and theoretical considerations); and (8) science education policy and practice. This final section reviews program status; course content; goals, guidelines, and practices; and needs and priorities for research. (JN)

Identifiers—Alternative Energy Sources, *Appropriate Technology

This program includes 14 activity-oriented units which integrate instruction in science study skills with hands-on learning about energy and appropriate technology. The program is suitable for use in a wide range of science curricula in grades 7 to 10. Units focus on such topics as the meaning of the word "appropriate," what makes technology appropriate, non-renewable and renewable energy, technology and the environment, using energy efficiently, life cycle costing, the solar greenhouse, storing energy, conserving energy, and solar and

wind collectors. The final unit is a class project which permits students to use many of the skills they have learned. These skills include listening, building science vocabulary, reading for meaning, taking effective notes, making judgments, interpreting charts and graphs, problem solving, test taking, using scientific measuring tools, applying laws, working with the metric system, working in scientific notation, and developing and testing hypotheses. This teacher's guide (which includes facsimiles of all pages in the student text) includes instructional strategies and practical suggestions for both the experienced and inexperienced teacher. (JN)

This program, which provides an introduction to study skills in mathematics for pre-algebra students through a series of 10 activity-oriented units, is structured on the assumption that activity-oriented lessons are the most effective way to teach study skills. By completing activities in the units, students learn about study skills needed for mathematics and practice those skills in a mathematics environment.

The program addresses a wide range of student needs, providing an introduction to specific skills for students who have little sense of a particular study skill, providing a learning experience of initial mastery for students who are ready to acquire a skill, and offering review and reinforcement for students who have mastered a given skill. Topic areas of the units include: listening as a mathematical skill, problem solving, understanding the language of mathematics, learning from homework, using formulas, estimation, preparing for a test, and taking a mathematics test. This guide contains strategies for teaching these units, suggestions for further instruction in each study skill area, and an overview of study skills. It is strongly recommended that the units be taught within the context of an ongoing mathematics course rather than in separate settings. (JN)

Descriptors—*Chinese Americans, *Chinese Culture, *Cultural Activities, *Cultural Awareness, Elementary Education, Learning Activities, Resource Materials, Teaching Guides

Identifiers—*New Year (Holiday), PF Project
This teacher's guide is designed to provide information and activities on the Chinese New Year and on aspects of the culture and heritage of the Chinese-American. Background material is given on the history of Chinese immigration to America, the lunar calendar, the Chinese cycle of years, the Chinese zodiac, the philosophical concept of yin and yang, and Chinese New Year festival customs. Examples of calligraphy with English translations are given as well as writing samples comparing English and Chinese writing styles. Equipment needed for a lion or dragon dance is described along with directions for three methods of making the dragons. Two brief science units provide activities related to the discovery of silk and the invention of paper. Instructions for making "flowers of prosperity" and recipes for "gow chung go" (nine-layer pudding) and "jien duy" are also given. In addition to activities for fostering awareness and understanding of Chinese-American perceptions and feelings, a role playing activity to demonstrate the problems of the second-generation Chinese-American is described. This guide also contains a list of children's books on China in the categories of history and geography, fiction and nonfiction, and folktales; a list of San Francisco Bay Area (California) resources on the Chinese; and information about 14 field trips and tours in the San Francisco Bay Area. Identifiers—*Bowman (Isaiah), New Deal, *Sci-

ence Advisory Board

An account of the career of Isaiah Bowman, a leading figure in American science, is discussed in the context of the historical uses of geography and the contemporary perspective of that discipline. The first of three sections briefly addresses the current crisis in the field of geography: a narrowness of disciplinary perspective. Such a view would have appalled Bowman, who, while a notable geographer, was also a leader in the formulation of national and international science policy, American foreign policy, and postwar reconstruction policy. Section 2 outlines Bowman's view of science. This view encompassed two contradictory perspectives—that of science as an institution independent of the rest of society and that of science as an important tool for solving social problems. Bowman sought to resolve this contradiction through the role he played in the establishment of the Science Advisory Board, discussed in section 3. This board, established in 1933 under Bowman's advice, coordinated all government research, initiated new research, and provided expert advice to government departments. Victim of a 2-year dispute over control between the President and the National Academy, the Advisory Board was dismantled in 1935. However, when the struggle arose again after World War II, Bowman resurfaced in his dual role as social idealist and political pragmatist. (LP)

Identifiers—United States (South)

The document presents 17 syllabi for undergraduate humanities courses treating black culture. This first volume of syllabi was prepared by participants in a 1981 Humanities Institute at Spelman College as part of a National Endowment for the Humanities (NEH) grant. The document is divided into two parts. Part one, the bulk of the document, is comprised of 17 syllabi designed to cover the history of Afro-Americans from their roots in Africa to the American South at the beginning of the 20th century. Courses cover such topics as American literature, art and music appreciation, black psychology, elementary Spanish, African literature, Afro-American literature, Southern black culture, women in literature, and the religious dimension in literature. Each course is presented in various forms, including course objectives, resources, activities, bibliographies, and evaluation. Part two contains reviews and syntheses of discussions designed to provide formal opportunities to identify unifying strains in each week's lectures and to explore ways of presenting information to the students. Descriptors—Anthropology, Methods, Methods Research, *Policy Formation, Psychology, Social Action, *Social Experience, *Social Problems, *Social Science Research, Social Sciences, Social Scientists

Identifiers—Whitehead (Alfred North)

This paper attempts to reformulate some assumptions of contemporary social science so that its knowledge becomes directly applicable in social action. A schema is presented for the interpretation of social experience in which sociological, anthropological, and psychological knowledge and knowledge of the physical and biological world enter into a concrete, aesthetically patterned, social totality incorporating the moral ordering and emotional commitment necessary for action. The philosophy of Alfred North Whitehead is used to present the dilemma of seeking the concrete from the abstract, that is, of interpreting social knowledge and social action. Tactics developed by social scientists for meeting this difficulty are sketched and the question of why the transformation of thought into practice necessitates a philosophical revolution is considered. In the course of answering that question, a more detailed statement of the basic terms of Whitehead's conception of events is provided. Finally, a discussion of changes required by social science methodology is presented. Discussion closes with a consideration of the aesthetic principles in the order of nature and society. The current concern with educational excellence and reform prompted by six recent national reports has significant implications for law-related education (LRE). These reports are A Nation At Risk: The Imperative for Educational Reform, Action for

Excellence, Making the Grade: Report of the Twentieth Century Fund Task Force on Federal Elementary and Secondary Education Policy, Educating Americans for the 21st Century, Academic Preparation for College: What Students Need to Know and Be Able to Do, and High School: A Report on Secondary Education in America. The six reports have several major recommendations in common that include the need to: clarify educational goals, strengthen school curricula, raise expectations for student performance, increase the time spent on academic subjects, improve teaching quality, and marshal the resources necessary to improve the schools. Law-related educators must respond to these recommendations by emphasizing the critical role of citizenship education, clarifying how LRE fits into the core curriculum, advocating the inclusion of LRE in competency testing, supporting incentives for professional training for teachers, and encouraging greater community involvement in education. Descriptors—Awards, Community Services, *Community Study, Course Descriptions, *Economics Education, Grade 1, Income, Learning Activities, Natural Resources, Occupations, Primary Education, Teacher Developed Materials

Identifiers—Barter, *Economic Awareness, Economic Growth, Economic Influences

This year-long economics project helped first graders from a low-income area recognize and see themselves as participants in an economic world. Students studied their community to learn about the different types of work people do, goods and services, problems of scarcity, the necessity for rules and goals, the use of natural resources, the dependence of growth on economic needs and wants, the community marketplace, methods of exchange, income, and government services. Students participated in many different kinds of activities. A few examples follow. Students toured the school to see what goods and services were produced by school workers. Parents visited the classroom and told the children about their work. To learn how communities are made up of many types of people who work, produce, distribute, and consume goods, the students studied bees. They read books and poems about bees, role played a bee community, and took a field trip to a bee keeper. Students bartered in Santa's Swap Shop, formed an assembly line to produce stone soup, and earned and lost play money for good or bad behavior in class. Pre- and posttests revealed a gain in the children's economic knowledge. (RM)

Processes of Prejudice and the Roots of Racism: A Socio-Cognitive Approach. Prepublication/Working Paper No. 3.

Amsterdam Univ. (Netherlands).

Pub Date—Sep 83

Note—81p.; For related documents, see ED 229 296 and ED 231 689. This series of working papers was prepared for the Prejudice in Conversations about Ethnic Minorities in the Netherlands project, University of Amsterdam, 1981-1983. Sponsored by the Netherlands Organization for the Advancement of Pure Research (ZWO).

Pub Type—Opinion Papers (120)

EDRS Price—MF01/PC04 Plus Postage.

Descriptors—*Cognitive Processes, Discourse Analysis, *Ethnic Bias, Ethnic Discrimination, Ethnic Relations, Ethnic Stereotypes, Foreign Countries, Information Processing, Interaction Process Analysis, Intergroup Relations, Interviews, *Minority Groups, Models, Racial Atti-

tudes. *Racial Bias, Social Behavior, Socialization, Social Psychology, *Social Theories, Sociology
 Identifiers—Cognitive Psychology, *Netherlands (Amsterdam)

A cognitive theory about the representation and processing of ethnic attitudes is presented, and strategies people use to express ethnic attitudes in conversations are discussed. Recent developments in cognitive and social psychology and in microsociology have shown that ethnic prejudices or attitudes are both cognitive and social results of social information processing in intergroup relations. Ethnic prejudice, formulated in terms of attitude schemata about minority groups, can be categorically organized in terms of their major social functions: dominance, differentiation, distance, depersonalization, diffusion, diversion, and the various forms of daily discrimination. Ethnic groups are represented according to prototypical characteristics, e.g., origin, appearance, socio-economic position. There are many strategies which can be used to manipulate these cognitions, including irrelevant participant categorization, use of negative prototypical properties of minorities, favoritism in ambiguous situations of ingroup members, and negative information spreading. How everyday talk exemplifies many of these cognitive and social strategies of prejudice is shown. (RM)

Ironies of the Romance and the Romance with Irony: Some Notes on Stylization in the History of American Education Since 1900.

Pub Date—83

Note—24p.; Paper presented at the Joint Meeting of the Canadian History of Education Association and the United States History of Education Society (Vancouver, British Columbia, Canada, October 14-16, 1983).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Educational History, Elementary Secondary Education, *Historiography, *Irony, Literary Styles, Progressive Education, *Romanticism

Identifiers—*Cremine (Lawrence A)

The narrative conventions of romance which flourish in Lawrence Cremin's "Transformation of the School" show that stylization does occur in historical writings. People often talk about stylization in visual forms; but stylization in the verbal arts is relatively undefined. To structure his recounting of the progressive story, Cremin drew on the genre of romance. Aspects of the genre upon which the coherence of his book depend include: (1) the motif of amnesia; (2) the polarized moral universe in which the dramatic action takes place, along with the characteristically abrupt nature of the narrative movement within it; (3) the adventure quest at the center of the action; and (4) its ideal of heroism. The irony of the situation is that, for the last 20 years, we have all been quoting Walt Whitman with a moralizing flourish: "There is no more need for romance," we say with the poet from Camden, "Let facts and history be properly told." Meanwhile, the narrative conventions of romance flourished unrecognized in "The Transformation of the School," a book widely hailed as the premier example of the explanatory dividends which a revived, academically respectable history of education had to offer. An Examination of the Constitutionality of Mandating Balanced Treatment of Evolution and Creationism in Public Schools.

Pub Date—[83]

Note—18p.

Pub Type—Opinion Papers (120) — Legal/Legislative/Regulatory Materials (090)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Court Litigation, *Creationism, *Educational Legislation, Elementary Secondary Education, *Evolution, Freedom of Speech, *Public Schools, Religion, Religious Factors, Scientific Principles, State Church Separation, State Courts

Identifiers—*First Amendment, Secular Humanism Legislation, rulings, and arguments for and against public schools giving creationism equal time or consideration with evolution are discussed. In the 1920's fundamentalists began to promote statutes prohibiting the teaching of evolution in public schools. Since that time the creationists have sought

to supplant evolution with creationism on the grounds that the teaching of evolution inhibits the free speech and religious practices of the believers of creationism. They have demanded that the study of evolution be reduced or eliminated because it is a religious theory and, in particular, a vital aspect of secular humanism, and, thereby, violates the first amendment. Nothing could be further from the truth. In fact, laws mandating the teaching of creationism violate constitutional rights. It is imperative for the sake of religious freedom in this country that the separation between church and state be maintained. As Supreme Court Justice William O. Douglas noted (*Zorach v. Clausen*, 343 U.S. 306, 314 1951), there are cases where the preferences of an individual or a majority cannot prevail. (RM)

Identifiers—PF Project
 Successfully implemented in 15 elementary schools, the program provides a curriculum structure, rationale, learning activities, and visual aids for teaching sixth graders about responsibility. Following an introduction, the unit presents over 20 teacher-developed lessons, black line masters, parent letters, program evaluation information, songs, a listing of appropriate films, and a bibliography. Topics include improving organizational skills, setting goals, achieving goals, appreciating differences, making responsible choices, solving problems, being courageous, being honest, and understanding body language. Each lesson is accompanied by parent letters that explain the purpose of the lesson and suggest two or three examples of what parents can do to help their child learn responsibility. This document was selected by the Association of California School Administrators (ACSA) Task Force on Public Confidence as descriptive of a promising practice or exemplary project worthy of highlighting for the California educational community. Identifiers—PF Project

A "maps in the news" unit can be used to help middle and junior high school students in many subject areas recognize basic map components and identify and analyze thematic maps while building writing skills. Prior to beginning the unit, the teacher introduces students to thematic maps, the parts of a map, and writing organization (topic sentences, paragraph formation, concluding sentence). The map unit consists of three steps. First, students collect 12-15 thematic maps from recent journals and periodicals and mount these in a looseleaf notebook. Students then record key information about the maps. As a final step, students write a paragraph analysis of their maps' strengths and weaknesses. Skill objectives achieved through this unit include basic skills, independent work, and abstract thinking. (LP)

Elementary and secondary school teachers interested in developing a local history unit can adapt this fourth grade program created for three school districts in Cortland County, New York. Material is divided into 13 chapters. Chapter 1 charts the New York fourth grade curriculum by concept and content and outlines specific community study activities integrated into the curriculum. Chapters 2 through 9 contain individual maps and histories of each of the four locales studied in the unit: Cortland County, Cincinnati, Homer, and McGraw. Chapters 10-13 consist of indexes of local history topics, resource persons, historians, and sites for these four areas. An appendix contains Cortland County Historical Society resources, materials prices, and educational services. (LP)

Identifiers—PF Project, Structure of Intellect

Model of Intelligent students in regular and special education classes, the guide provides an instructional approach (as opposed to a counseling approach) to teaching social and behavioral skills. This approach, based on the premise that behavioral

skills can be developed through instruction, drills, and applied practice, employs concepts from the behavioral dimension of the Structure of Intellect Model of Intelligence, from assertiveness training, and from the work of Paul Ekman and Wallace Friesen on six basic emotions. The project is built around six instructional units (separate units provided for elementary and secondary levels): (1) basic feelings; (2) understanding interpersonal relationships; (3) problem solving; (4) complex social situations; (5) setting and attaining goals; (6) implications of various actions. Teachers assign project activities, which include group discussion, role playing, modeling, and worksheets. Evaluation instruments, instructions for their use, and a discussion of their development and reliability are included in the document. An assertiveness checklist, behavioral checklist, problem solving checklist, Cognition of Behavioral Units (CBU) Test, and an Evaluation of Behavioral Implications (EBI) are included. Teacher inservice and parent meeting outlines conclude the document. (LH)

Identifiers—PF Project, *Pioneer Life

An elementary school teaching unit uses a visit to a one-room schoolhouse to increase student awareness of what pioneer schools were like. The first section consists of pre-visit activities and teacher preparation suggestions. A description of an early pioneer school is followed by six activities designed to make the visit more authentic. Activities include an interview with someone who attended a one-room school, traditional poetry recitations, copybook assignments, student-made pioneer lunch pails, and pioneer recipes. The second section gives the agenda for a day in a one-room school. Students reenact a typical pioneer school day, participating in penmanship, spelling, geography, history, arithmetic, games, literature, and art lessons. The final section presents outdoor environmental awareness activities including a forest footprint identification exercise, bingo game, tree identification charts, crossword puzzle, outdoor observation activity, and outdoor poetry and vocabulary exercises. Although the document describes a visit to a school house in Black Hawk Park (Iowa), the unit can be easily adapted to any one-room school. This document is part of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. (LH)

Identifiers—PF Project

Designed for use with sixth grade students, this multidisciplinary unit combines independent study of urban areas with activities to develop students' higher level thinking skills. Following suggestions to teachers on strategies for introducing the unit, four options for independent study are described. The first is a study of a topic related to cities. Students can present their findings in a variety of forms such as songs, radio shows, a guide book, or a skit. The second option is a study of any well-known city. An outline is provided of the major findings which should be included in such a report. In the third option for independent study, students learn about their own community by conducting interviews with various city officials and public servants. For the final option, a series of task cards provides short activities on urban study. Each activity is tagged to a specific thinking skill. A bibliography concludes the unit. This document is one of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. (LP)

Getting Off on the Right Foot in Elementary Art.

Area Education Agency 7, Cedar Falls, IA.
Pub Date—80

Note—76p.
Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Art Activities, *Art Education, Art History, *Childrens Art, *Creative Activities, Design, Elementary Education, Freehand Drawing, Handicrafts, Learning Activities, Lesson Plans, Painting (Visual Arts), Sculpture, Teacher Developed Materials, Units of Study, Visual Arts

Identifiers—PF Project, Printmaking

Designed as a guide to planning art lessons, the booklet offers over 40 suggestions and sample lesson plans for students in grades K-6. Although most of the lessons could be taught at any time of year,

they are arranged month-by-month for convenience. Included in each monthly program are lesson plans for both intermediate and primary students, most of which are adaptable to other age levels. The unit includes experiences in drawing, painting, printmaking, sculpture, crafts, design, art history, and art as a career. Student activities include making fluorescent insect designs, Japanese banners, weed drawings, African-type masks, cubistic cats, scary creatures, sand painting, bark cuttings, stained glass windows, macrame snowflakes, puppets, paper sculpture, quilt blocks, slides, and May baskets. An extensive bibliography lists over 35 books, articles, and teacher resources. This document is part of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. (LH)

Musical Literacy Skills and Musical Instruments

You Can Make for Grades 1-6.

Area Education Agency 7, Cedar Falls, IA.

Pub Date—80

Note—15p.

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Education, Learning Activities, *Musical Instruments, *Music Education, *Music Reading, Teacher Developed Materials, Units of Study

Identifiers—*Harmonic Dictation, *Melody, PF Project, Rhythm

An elementary school (K-6) general music unit presents strategies and exercises for helping students attain skills in music literacy. The first section, which is arranged by grade level, helps students read, perform, and dictate a variety of rhythmic, harmonic, and melodic patterns. The second section provides instructions and accompanying illustrations for building simple musical instruments from common household items. This document is part of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. (LH)

The Concept of Social Causality and the Usefulness of the Social Sciences.

Pub Date—83

Note—16p.; Paper presented at the Annual Meeting of the American Sociological Association (Detroit, MI, August 31-September 4, 1983).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Definitions, Predictor Variables, Research Design, Research Methodology, *Research Needs, *Research Utilization, *Social Problems, *Social Science Research

Identifiers—Causal Models, Explanations, *Social Causality

If they are to develop more effective social intervention strategies, social scientists must pay attention to social causality in their research. This will lead to more credibility for the social sciences and more support for research funds. Social causality is defined as a social process that produces a change in some dependent variable. It reflects a social mechanism rather than a physical one. There are many reasons why the social sciences have not paid much attention to the problem of causality—e.g., the sheer number of causal mechanisms, the confusion between causal modeling and causal processes, and the size of the social system. Appropriate methodological procedures for studying causality include studies across time and the random assignment of causal mechanisms. (RM)

Overeducated Americans in the Work Force.

Pub Date—83

Note—13p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Economic Factors, *Educational Attainment, Educational Planning, Educational Policy, Educational Trends, *Employee Attitudes, Employment Opportunities, Employment Patterns, Employment Projections, *Futures (of Society), Higher Education, Knowledge Level, *Labor Economics, Labor Needs, Policy Formation, Skill Development, Social Problems, *Work Attitudes

Identifiers—*Overeducation

Work and adjustment to work are vital components of a smoothly functioning society. Currently, a growing imbalance between the collective level of educational attainment of American workers and the skill/knowledge requirements of existing jobs has created the potential for widespread social and economic problems in this country. Overeducation leads to job dissatisfaction, decreasing productivity, and, ultimately, to a crisis in public confidence. To counter the threat the current labor situation poses, several actions by the government and private sector may be appropriate. Business and educational organizations must adopt human relations policies responsive to the expectations of a well-educated labor force. The private sector should implement job rotation and job enrichment strategies, and establish participatory management. The government, which employs a high percentage of college graduates, should increase its total personnel. Alternatively, the government could curtail the supply of college graduates entering the labor force by raising college costs. Regardless of strategy employed, attention to the problems inherent in overeducation must be incorporated into public policy formation. (LF)

Images of Australia in Elementary Social Studies

Texts: Some Alternative Strategies.

Pub Date—Nov 83

Note—23p.; Paper presented at the Annual Meeting of the National Council for the Social Studies (63rd, San Francisco, CA, November 22-26, 1983).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cultural Awareness, Cultural Images, Educational Needs, Elementary Education, Foreign Countries, *Social Studies, Stereotypes, *Textbook Content, *Textbook Evaluation, Textbook Preparation

Identifiers—*Australia

Elementary social studies textbooks in the United States were analyzed to determine the sort of information they contained about Australia. Only those texts which made substantive references to Australia were analyzed; these included 4 books for level 3, 2 for level 4, and 4 for level 6. Books examined were all published by major textbook companies: Allyn & Bacon, Inc., American Book Company, Ginn & Company, Harcourt Brace Jovanovich, Laidlaw Brothers, Scott Foresman, and Silver Burdett Co. The study focused on the quantity and quality of information provided relating to geography, history, aboriginal people, rural life, urban life, flora and fauna, politics, resources, popular culture, sport, ethnic groups, industry, mining, and maps. As a percentage of the total content, references to Australia ranged from 0.3% to 5%. The information presented was mainly accurate, if rather generalized. However, the overall image presented in the textbooks—that of Australians as a far off, remote group of desert dwellers, some of whom are aboriginal people who work on sheep stations, regularly attend the opera in Sydney, and go surfing—is not accurate for the great majority of the population. Australia as it is today is discussed, and recommendations are made for a more realistic approach to teaching about the country. Thirteen brief views of life in Australia written by Australian school children are appended. (RM)

Hunker, Henry L.

Resource Conservation: A Static or Dynamic Concept?

Pub Date—Oct 83

Note—13p.; Paper presented at the National Council for Geographic Education Conference (Ocho Rios, Jamaica, October 23-28, 1983).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Conservation (Environment), Definitions, Ecology, *Educational History, *Educational Needs, Educational Practices, Environmental Education, *Geography Instruction, Higher Education, Intellectual Disciplines, *Natural Resources, Textbook Content

The educational history of resource conservation as an academic discipline is discussed. Also examined is whether conservation should be taught as a static or dynamic concept. The first conservation text was written in 1910. Since then, geographers have stressed several approaches to resource con-

servation including the inventory and analysis of the nation's resource stock, conservation methodologies, the study of the interrelationships between resource complexes, regional resource development, and resource management. Specialization in resource conservation remains an important part of U.S. geography curriculum today. However, it is not clear how resource conservation is defined, nor is it clear from textbooks what the subject area comprises. When asked to define resource conservation, many students define the concept in the context of limitations. If geographers are locked in to such a conceptual framework, their view of present and future society must be constrained. What must be taught is a dynamic concept of resource conservation which recognizes that resources are functional—that they are defined in terms of use, whether the uses are consumptive or non-consumptive. (Author/RM)

Sebastian, Glenn R.

Writing across the Curriculum: Geography.

Pub Date—Oct 83

Note—11p.; Paper presented at the National Council for Geographic Education Conference (Ocho Rios, Jamaica, October 23-28, 1983).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Basic Skills, *Content Area Writing, Core Curriculum, *Geography Instruction, Higher Education, *Interdisciplinary Approach, Program Descriptions, Skill Development, Writing Improvement, *Writing Instruction, *Writing Skills

Identifiers—Cross Discipline Education, University of South Alabama

A cross-disciplinary project at the University of South Alabama has been successful in improving the technical competence of undergraduate writers in all academic fields. For the geography department, this project has involved developing courses which teach writing as part of the thinking process and problem-solving method. While instructors have encountered several problems in carrying out this program, such as how to determine the value of writing assignments in the final grade and how to assign writing activities in large lecture courses, the university offers workshops to faculty facing these problems. Writing labs are also provided for students with difficulties. Student evaluations indicate that the writing assignments have been one of the most helpful activities in the geography curriculum. Piagetian Theory as an Organizer for Geographic Skills and Experiences.

Pub Date—Oct 83

Note—14p.; Paper presented at the National Council for Geographic Education Conference (Ocho Rios, Jamaica, October 23-28, 1983).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Development, *Curriculum Development, *Developmental Stages, Elementary Secondary Education, *Geography Instruction, Learning Activities, *Map Skills

Identifiers—*Piagetian Tasks, *Piagetian Theory

Piagetian stages of cognitive development are reviewed, and what teachers of geography skills, particularly map skills, can do to make use of Piaget's theory of child development is discussed. Piaget describes children at four different stages: (1) sensorimotor stage—birth to 2 years, (2) preoperational stage—ages 2-7, (3) concrete operational stage—ages 7-12, and (4) formal operational stage—ages 12 and older. The characteristics that a child displays at each of these stages are described. Geography teachers must find out at what stage their students are in terms of their experiences, develop learning activities which build on these experiences, and structure other experiences which take into account the four forces that shape learning—i.e., maturation, the environment, equilibration, and socialization. Thus, with children who are at the preoperational level, for example, map skills activities might be taught by having students view and draw objects from different perspectives or identify familiar objects from air photographs. At the concrete level, students could construct models of familiar areas. Students at the formal operational level could do map work emphasizing the use of symbols. (RM)

Martin, David Alan
Implications of Learning Theory for Economic Education.

Pub Date—8 Oct 82

Note—20p; Paper presented at the Joint Council on Economic Education Annual Meeting (Kansas City, MO, October 8, 1982).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cognitive Processes, Developmental Stages, *Economics Education, Elementary Secondary Education, Learning Processes, *Learning Theories, Memory, Reinforcement, Research Needs

The author states that learning theory is useful for economic educators because it enables them to develop instructional theory for economic education. The paper is arranged into five parts. Part 1 focuses on the historical learning theory perspective of economics education. Part 2 defines instructional theory, states its relationship to learning theory, and describes the attributes of good instructional theory. The third part reviews three learning theories—developmental, information processing, and operant conditioning—and their implications for economics education. Part 4 describes an instructional theory that incorporates these three learning theories and also possesses the desirable attributes of good instructional theory. The paper concludes with a discussion of the limitations of applying cognitive learning theories to economics education. The appendix contains specific instructional practice suggestions from developmental theory. (RM)

Identifiers—*Pacific Circle Consortium

Established in 1977, the Pacific Circle Consortium is a group of national-level educational research and development agencies from the Organization for Economic Cooperation and Development (OECD) Pacific region countries engaged in cooperative projects intended to improve international understanding and relations. From 1977 to 1980 the Consortium undertook interchange activities and cooperative curriculum development projects focusing on the Pacific region. The interchange activities were of an exchange nature and consisted of meetings, exchange of materials, staff visits, and newsletters. The curriculum development projects produced a variety of teaching/learning materials for secondary students in the social, environmental, and human sciences. Examples of topics include harvesting food resources of the ocean, trade and interdependence in the Pacific, the wise use of ocean resources, ethnic and race relations, and aboriginal studies. Dissemination of the curriculum materials remains largely an individual institutional activity. A discussion of overall Consortium achievements and phase 2 activities conclude the report. Appendices contain a glossary of terms and names of participants in the meetings. (RM)

Identifiers—*Pacific Circle Consortium

Efforts, including exchange activities and curriculum development projects, undertaken by Pacific region countries in 1981 to improve intercultural understanding were the main focus of the meeting. The report begins with a very brief description of what transpired during the sessions. Papers and reports presented are contained in the appendices, which make up the major portion of the publication. New Zealand, Canada, Japan, Hawaii, and Australia reported on their countries' educational programs and practices. Reports were also made concerning various Consortium K-12 curriculum development projects, including the Ocean Project and the Antarctic Project. School networking in the Pacific region was the focus of several papers. A workshop dealing with the Ocean Project held in Honolulu was described in one paper. Two proposed units of study from the Ocean Project concerning fishing in the Pacific and bay and harbor Pacific communities were presented. Also included in the appendices are the agenda, the chairman's report, the treasury report, a review of dissemination issues, and a participant list. (RM)

Pacific region countries reported on their 1982 cooperative activities in education, including exchange and curriculum development projects, aimed at improving intercultural understanding. The first part of the report describes what happened at the sessions; the second part contains the appendices. Various countries—Australia, Canada, Japan, New Zealand, and the United States—reported on their recent activities. Papers discussing curriculum projects were presented. Discussed were the Antarctica and Southern Ocean Project, which developed K-12 classroom materials, a film on salmon developed by a group in Alaska, a unit of study developed on the "New Zealand Fisheries," and student activities for a "Bays and Harbours Unit-Honolulu." Discussion sessions were held on a number of topics, including curriculum renewal processes, Consortium activities, research on classroom learning, and the relationship between the Consortium and OECD/CERI. Field trips and school visitations were made by conference attendees. The meeting also included a business session. Included in the appendices are the agenda and lists of participants, papers presented, and Consortium activities. (RM)

Harper, Robert A.
Problems of Geography as General Education.

Pub Date—Oct 83

Note—8p; Paper presented at the National Council for Geographic Education Conference (Ocho Rios, Jamaica, October 23-28, 1983).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Curriculum Development, Curriculum Evaluation, Educational Needs, Educational Objectives, *General Education, *Geographic Concepts, *Geography Instruction, *Global Approach, *Human Geography, International Relations, Physical Divisions (Geographic), Physical Geography, Postsecondary Education, Problems, *Systems Approach, World Affairs

The increasing interdependency and regional specialization of today's world demand a new approach to the teaching of introductory geography courses. By focusing on the interrelationship of physical, cultural, and economic geography, a course for general education students can foster development of the geographic perspective on human systems needed to understand contemporary world issues. For example, physical geography would be taught in terms of the aspects of the earth's environment that relate to the central problems of human life; cultural geography would emphasize details that affect human lifestyles. Students would leave such a course with a systems view of how and why people live as they do in different places on earth. (LP)

Identifiers—*Africa (West), Camaroon, *Fulbe (Tribes), West Africans

The eight articles in this collection focus on the Fulbe culture in West Africa, its intragroup relationships as well as its relations with other ethnic groups. Each article relates the concept of ethnicity to social and political differentiation among tribes. Following an introduction by Emily Schultz, John Lewis presents the findings of three field visits to evaluate transhumant cattle management in the Sahel. Paul Riesman examines the relationship between the Fulani people of West Africa and their environment, paying particular attention to the people's cultural and environmental ties to their cattle. Gregory Finnegan and Christopher Delgado discuss the relationship between the Mossi farmers and the Fulbe herders in Upper Volta. The changing significance of ethnicity has in the various power relationships of the aristocracy of the Sokoto is presented by Joyce Hendrixson. James Vaughan examines inter-societal relations of two groups, the Margi and the Fulani, from a historical perspective, focusing on the reasons for cultural barriers against the Fulani. Chantal Collard discusses the various neighbors of the Fulbe, and Emily Schultz is concerned with perceptions of ethnicity in Guider Town, Cameroon. A final article, by Eric Ayisi, analyzes the main points of the preceding articles. Notes on contributing authors conclude the journal. (LP)

Identifiers—Philippines, United States

The focus of this volume is anthropological diplomacy: the promotion of peace and prevention of war by knowing, understanding, and appreciating the basic affirmations of society. Eight articles examine the role of race, language, and culture in inter-ethnic and international relations. Vinson Sultive, Jr. examines the interrelationship of race and culture. Mamitua Saber presents the Philippines as a case study of the processes of cultural integration. Mario Zamora writes about the cross-cultural themes and values of the Asian aged as migrants to America. Choong Soon Kim discusses the implications of culture and values for U.S. foreign policy formation, with particular emphasis on relations with China, Korea, and Vietnam. Karri Fritz relates cultural anthropology to the development of international law, while Lynn Thomas relates anthropology to trends in international relations. In the final article, C. D. Macaulay demonstrates how anthropological theory can be useful to international relations. An epilogue, by Indira Singh, underscores the significance of universals of human culture. Notes on contributing authors conclude the journal. (LP)

Identifiers—Australia, Canada, Japan, New Zealand, *Pacific Circle Consortium, United States

A five-part cumulative report details the activities of the Pacific Circle Consortium. Section 1, on the origins of the Pacific Circle, describes the consortium on three levels: participating organization of Economic Cooperation and Development (OECD) countries, participating institutions, and development teams. In section 2, the involvement of each of the participating institutions is discussed under the headings of origins, relations with policy group representatives, institutional structure and function, the development group, description of recent work, evolution of the work, future activities, maintenance conditions, and emergent issues. Section 3 discusses types of activities emerging and a proposal for a common project. Section 4 focuses on legitimization of the Consortium by the OECD. It suggests that the Consortium is reaching a point where it will soon be regarded as legitimate in its own right. Section 5 analyzes the conditions necessary for the Consortium to achieve autonomy and become self-sustaining. Considered are both internal and external interactions of the Consortium and external threats to survival internally. (LP)

Information about the world conferences for and about women held during the United Nations' Decade for Women, 1975-1985, demonstrates that women have been responsible for promoting change on local, national, and international levels. The booklet begins with a chronology of the events leading up to and including the decade and its conferences. Overviews of the two conferences held to date—the Mexico City (Mexico) conference of 1975 and the Copenhagen (Denmark) conference of 1980—are presented. Some documents from each conference are presented in a condensed form. The purpose and functions of the third world conference on women to be held in 1985 in Nairobi, Kenya, are discussed. Organized into non-governmental associations which interact with governments, women have promoted changes aimed at advancing the status of women, contributing to economic development, and promoting peace and international understanding. The Rhetoric of Rights.

Pub Date—Sep 83

Note—77p.; Paper presented at the Annual Meeting of the American Political Science Association (Chicago, IL, September 1-4, 1983).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Civil Liberties, Controversial Issues (Course Content), Political Issues, *Political Science, *Theories

Theorists on human rights can be divided into two camps: those who believe that rights are asserted by and ascribed to groups, and those who believe that rights may be properly predicated to individuals only. Of late, the latter group has gained dominance. This paper, by presenting a rhetorical analysis of individualism in regard to rights, rejects the limiting of rights to distinct persons. Analysis is divided into five stages. A discussion of the phenomena of group rights precedes examination of the theoretical restrictions of rights of individuals. Various individualisms are distinguished and discredited. The author then highlights the relevance of "group rights" to current issues of ethics, politics, and law, outlining the potential contributions of this concept to current projects in political theory. Finally, the notion that rights are political rather than philosophical is presented. (Author/LP)

A Report of the Preliminary Research Findings on the Domain of Cognition: A Taxonomy of Instructional Outcomes.

Pub Date—83

Note—88p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Classification, Cognitive Measurement, *Cognitive Objectives, Educational Research, Grade 5, Grade 6, Intermediate Grades, Learning Activities, *Models, Pilot Projects, Pretests Posttests, *Student Evaluation, Validity Identifiers—Stahl (Robert J.)

Two instruments and instructional activities were pilot tested to determine if they could be used in a later evaluation study of a Domain of Cognition model, developed by Robert J. Stahl as an alternative to Bloom's Taxonomy. The model, intended to help educators more effectively plan for, implement, monitor, and evaluate instruction, was proposed as being a representation of a sequence of expected behavioral outcomes that may result from instruction. After instruction has taken place and after students have been given the time to make use of different types of information, it was contended that the sequence of outcome behaviors should occur as depicted in the Domain of Cognition. Two fifth and sixth grade classes participated in the study. Major findings include the following. The instructional activities and the immediate and delayed posttests were clearly understood by the students. The inter-

nal consistency for both posttests was high. The mean score performance was not in a descending order on either the immediate or the delayed posttest. Based upon these results, the decision was made to conduct the larger study. Appendices contain the tests and the instructional activities. (RM)

Growth of Arts and Cultural Organizations in the

Decade of the 1970's. Final Report.

Informatics, Inc., Rockville, Md.

Spons Agency—National Endowment for the Arts, Washington, D.C.

Pub Date—Dec 83

Contract—NEA-PC-80-29

Note—815p.

Pub Type—Information Analyses (070)

EDRS Price - MF05/PC33 Plus Postage.

Descriptors—Cultural Centers, Dance, Data Collection, Employment Patterns, Expenditures, *Fine Arts, Income, Museums, Needs, Opera, Orchestras, *Organizations (Groups), Theaters, Trend Analysis

Disparate data on nonprofit arts organizations in the 1970's were analyzed in order to construct a comprehensive picture of the growth of the arts during this decade. Studied were the rate of growth and change in the number of institutions and in their levels of output, employment, income, and expenses. Conclusions are presented regarding the overall arts picture, each of the five major artistic disciplines (symphony orchestras, opera, theater, dance, and museums), and data collection in the arts. Compared to preceding years, the decade of the 1970's showed the same range of growth for all the disciplines, except the young modern dance companies. All performing art forms, except opera, grew at a slower pace in the 1970's, especially symphony orchestras. The need for financial management was recognized. Art organizations need to be systematically classified by some widely accepted taxonomy. Appendices conclude the report. The first appendix is a listing of criteria used by art organizations for membership or inclusion in a survey. The other appendices are discussions on: the imputation and correction of data, the calculation of growth rate, the economic behavior of arts organizations, and performing arts sponsors and presenters. Assessing Ideology: The Influence of Fundamental Belief Systems on Social and Political Opinions.

Pub Date—83

Note—16p.; Paper presented at the Annual Meeting of the Eastern Psychological Association (54th, Philadelphia, PA, April, 1983). Broken type throughout.

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Beliefs, Higher Education, *Political Attitudes, *Social Attitudes, Social Problems, Social Science Research, Social Values

Identifiers—Conservatism, Equal Rights, *Ideology, Liberalism, Meritocracy

It was hypothesized that fundamental belief systems contribute to the development of political attitudes and opinions above and beyond adherence to so-called "liberalism" or "conservatism." A 20-item instrument was developed and administered to 63 college males and females to assess their underlying fundamental assumptions, overt adherence to meritocratic or antimercitocratic principles, and specific opinions on a number of public and social issues. There was a significant correlation between students' basic beliefs or ideologies and their adherence to meritocratic or antimercitocratic principles. The correlation between basic beliefs and political orientation was less strong, but still significant. There was no relationship between self-designated political orientation and the overall index of fundamental beliefs. Overall, the results indicated that how people think about human nature and human behavior may provide significant information about what types of social policies and programs they would like to see implemented. Mastery Learning and Musical Performance Groups.

Pub Date—Apr 83

Note—21p.

Pub Type—Guides - Classroom - Teacher (052) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Applied Music, Behavioral Objectives, Course Content, Course Evaluation, *Curriculum Development, Diagnostic Teaching, Elementary Secondary Education, *Mastery Learning, Media Selection, *Models, *Music Education, Program Development, Teacher Role Identifiers—Carroll (John B)

John Carroll's concept of mastery learning (ML) is described, and an ML model which can be used by directors of music-performing groups is presented. According to Carroll, any student, when given direction and time to follow that direction, can move along a time line from a state of inability to a state of ability. Tasks defined in behavioral terms allow both the teacher and the student to judge when the task is completed. When time needed to learn a task equals time spent in learning, the learner is able to perform the task. Proponents of ML feel that 90 to 95% of all students can achieve mastery if proper teacher and student conditions for learning are present. Using Benjamin Bloom's model of ML and recommendations from other educators, a two part model—Planning for Learning and The Learning Experience—is presented. A discussion covering the following topics follows the model: establishing current performance levels, selecting new material, selecting instructional content, planning for instruction, planning for evaluation, planning for prescriptive design, and learning sequence. The Embassy Adoption Program. Final Evaluation Report, 1982-1983.

District of Columbia Public Schools, Washington, DC. Div. of Quality Assurance.

Pub Date—Dec 83

Note—94p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Community Cooperation, Evaluation Methods, Field Trips, *Foreign Countries, *Foreign Diplomats, Grade 5, Grade 6, Intermediate Grades, International Cooperation, *International Relations, International Studies, *Multicultural Education, Program Descriptions, *Program Effectiveness, Program Evaluation, *Social Studies

A multicultural enrichment program in which selected fifth- and sixth-grade students from Washington, District of Columbia, public schools learned about other countries by studying a foreign embassy is evaluated. Chapter 1 outlines the main components of the program: joint educator-embassy planning, student research, student field visits and embassy guest presentations in the classroom, student culminating projects, and student participation in a mock United Nations. Chapters II and III concern evaluation. A description of the Planning, Monitoring, and Implementing Model (PMI) used for evaluation is followed by a chart presenting evaluation results. Measured are the degrees of joint participation in implementation among sponsoring agencies and program impact on students' knowledge of other countries. Findings indicate a highly successful program, with a high degree of correlation on all input/output measures. The appendix includes the evaluation schema, program communications, curriculum suggestions, and unexpected outcomes. (LP)

Descriptors—Competency Based Education, *Educational Assessment, Educational Attitudes, Educational Cooperation, Educational Improvement, *Educational Policy, Educational Research, Elementary Secondary Education, *Humanities Instruction, National Surveys, State Agencies, *State Departments of Education, *State Programs, Statewide Planning

To determine the status of humanities education

in American public schools, the Council of Chief State School Officers (CCSSO) conducted a survey of State Education Agencies (SEAs) in 1982. Data gained through a questionnaire sent to each SEA concerned humanities policies in the areas of organizational structure, general educational goals, curriculum, testing, textbooks, graduation requirements, funding, and current educational developments. The following findings were indicated. While SEAs express strong support for humanities instruction, they pinpoint several problems in program implementation, chief among these being the need for a common definition of the field. Only 20 percent of the states possess a unit entitled "humanities," and less than half include humanities in their statements of educational goals. While 25 states have competency-based educational programs, only 8 of these include humanities. Less than 10 of the states having uniform graduation requirements demand any music, art, or foreign language coursework. The SEAs' assessments of the direction for furthering humanities instruction are summarized in six recommendations. Among these are the need for states to develop specific humanities education policies, establish a core of common learning to which the humanities are central, participate in national and regional meetings concerning humanities, and work with state humanities councils to develop elementary secondary education projects on the humanities. Appendices include the survey instrument. (LP)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Biblical Literature, Christianity, *Geography, Judaism, *Middle Eastern History, Middle Eastern Studies, Religion, World Problems

Through its symbolism, law, and toponyms, the Bible exerts a strong influence on Western society. Consequently, geography of the Bible—a study of how people responded to God in such a geographic setting and how people responded to the challenge of an adverse environment—constitutes a legitimate academic field. Such a study has the specific benefits of clarifying and bringing reality and variety to Bible studies. Methodology for such a course relies on the same framework as other geographies. It may be studied systematically as well as chorographically, and idiographically or nomothetically. Recent research has indicated several directions for innovation in the field of geography of the Bible, including geographic interpretation of Bible passages, identification of biblical sites, clarification of Bible translations, and biblical cartography. A final research frontier focuses on using the Bible to explore solutions to present political problems in the Middle East. A biblical perspective can add insight into the examination of peace and land rights. (LP)

Descriptors—Annotated Bibliographies, Books, Change, *Children's Literature, *Content Area Reading, Cross Cultural Studies, Cultural Differences, Early Childhood Education, Humanistic Education, Human Relations, Individual Differences, Primary Education, Self Concept, Skill Development, *Social Studies

Arranged in three parts, this booklet provides teachers at the early childhood and primary grade

levels with guidelines for using children's literature in social studies instruction. Chapter 1 discusses rationale and procedure. Separate subsections emphasize the significant role reading books can play in developing a child's self-concept, examining similarities and differences among children and among cultures, examining peer group and family interactions, considering careers, dealing with change, and establishing a framework for history study. The relationship between children's literature and social studies skills development is treated in chapter 2. Examples of ways in which reading books lend themselves to map skill development and skits are provided. The bulk of this booklet is a sample bibliography, contained in chapter 3. Over 350 children's books, compiled on the basis of students', teachers', and social studies' needs, are listed on the following topics: careers, changes, feelings, geography, history and biography, interdependence, relationships, rules, similarities and differences, and world cultures. Lists of useful references and publishers conclude the booklet. (LP)

Identifiers—*Asia, *Pacific Countries

UNESCO member states discussed educational efforts undertaken to improve international understanding, peace, and respect for human rights. Chapter 1 summarizes the reports of individual countries. Although the citizens of each of the countries have their rights protected through their respective constitutions, there is some variation in the interpretation of the human rights concepts. It is generally through the area of elementary and secondary social studies that the countries are attempting to educate their citizens concerning peace and human rights. Although teaching methods are not reported on in detail, where reference is made it appears that a variety of strategies is being practiced. Some teacher education is being implemented. The areas that are least reported upon are research and evaluation. Chapter 2 contains a summary of the discussions that followed each country's report; these discussions concerned how to improve social studies/civics/moral education. Suggestions for future action at the national and regional levels are discussed in the concluding chapter. Appendices include the agenda, the participant list, and the inaugural address. (RM)

Student Involvement in Curriculum Development: A Different View.

Pub Date—Oct 83

Note—13p.; Paper presented at the Northern Rocky Mountain Educational Research Association Annual Meeting (1st, Jackson Hole, WY, October 13-15, 1983).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classroom Environment, *Curriculum Development, Educational Practices, Educational Quality, Educational Research, Educational Theories, Elementary Secondary Education, *Experiential Learning, *Learning Activities, Learning Theories, Student Experience, Student Interests, Student Motivation, *Student Participation, Student Reaction, Student Teacher Relationship, *Teaching Methods

The productive involvement of students in curriculum development can lead to greater student inter-

est in and satisfaction with learning. The dominant view in education today is that students are disruptive agents in the learning process, liable to interrupt teaching for their own purposes. This view results in a learning environment where the teacher lectures or students prepare written assignments. An opposite view is that students are agents that can and must modify lesson content according to their own predilections, perceptions, and attitudes. These two views represent the endpoints of a continuum on which teachers take varying viewpoints and shifting positions. Research has shown that students prefer classroom activities that require their active involvement. Given this, it should be the role of the teacher to facilitate the positive participation of the students as curriculum developers to such an extent that the students become lifelong learners, able to use their minds to think, explore, analyze, and evaluate the instruction they receive. Identifiers—Counts (George), Dewey (John), Hermeneutics, Liberalism, Paideia Proposal

Twelve conference papers address four educational themes. Three papers on intellectual life in the school deal with the philosophy of George S. Counts; the nature, purpose, and value of liberal education; and educational consequences of the idea of reason. Four papers on educational alternatives treat the educational philosophy of Ivan Illich, hermeneutics and paideia, the basic ingredients of alternative education, and mainstream education for older adults. Two papers on school administration address organizational theory as educational philosophy and accountability and responsibility. On the theme of John Dewey, two articles discuss the philosopher's theory of inquiry and his views on war and the League of Nations. An additional paper on philosophy for everyone, the conference presidential address, is included. (LP)

The first of a series of annual reports for policy makers, this publication focuses on evaluating changes in the interplay between the world's changing resource base and the economic system. Following an overview, content is divided into 10 additional chapters covering population stabilization, the world's dependence on oil, soil conservation, forest protection, materials recycling, the economics of nuclear power, the development of renewable energy, the future of the automobile, the world food supply, and economic policy formulation. Each chapter is edited by a specialist in the

field and contains several articles by different authors. Examples of subtopics considered within each chapter are: zero population growth and national fertility declines (population stabilization); petroleum substitutes and government regulations (oil dependence); acid rain and deforestation (forest conservation); waste paper, aluminum, iron, and steel (recycling efforts); wind, solar, and geothermal energy (renewable energy); and national priorities and "guns or butter" (economic policy formulation). A list of tables and figures, footnotes, and an index are included. (LP)

Identifiers—*National Survey of Economic Education 1981

The "National Survey of Economic Education 1981" presented an overly optimistic view of the status of economic education which is not substantiated by a careful review of national and state data or the many recent national surveys on precollegiate education. This review of both national and state survey data indicates problems in both teacher preparation and curriculum. Teacher weaknesses include lack of preparation in the content area, lack of use of appropriate teaching strategies, and reluctance to take additional coursework. Curriculum problems include the limits of time in teaching economics at the elementary level and absence of economics as a separate course offering at the secondary level. Teachers at all grade levels expressed the desire for easier access to economics curriculum materials. In attempting to upgrade economics instruction, the next step for researchers should be an extensive national effort to obtain more reliable input and output data about economic education in the schools. Identifiers—*China

Designed as a supplement to the classroom text, this unit contains 14 lessons on Chinese culture and society. Students are encouraged to compare the cultures of traditional and modern China as well as those of China and the United States. Materials are divided into two sections. The first section contains lesson outlines, including teaching plans, student activities, student handouts, and teacher background information. Topics covered include Chinese geography, the impact of geography on Chinese society, China's traditional religions, a comparison of Chinese and American world views, the Chinese language, education in traditional and modern China, traditional and modern Chinese art, the relationship between art and politics, the Chinese social order, communes, and Chinese economy. Student activities, many of which revolve around educational materials from the People's Republic of China, include conducting role plays, translating Chinese words, playing ancient and modern Chinese children's games, reading Chinese children's stories, analyzing and creating propaganda posters, learning Chinese calligraphy, holding a Chinese banquet, and creating a collage. The second section contains readings to accompany the foregoing lessons. Five appendices consist of a guide to spelling Chinese words, changes in the Chinese language, examples of Chinese art and calligraphy, Chinese landscape paintings, and a list of suggested resources. Censorship: Challenges, Concerns and Cures.

Pub Date—Jan 84

Note—9p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Freedom, *Censorship, Classroom Environment, *Controversial Issues (Course Content), Critical Thinking, Educational Policy, Elementary Secondary Education, *Intellectual Freedom, Political Issues, Social Problems, *Social Studies, Teaching Conditions, Teaching Methods, Textbook Selection

While censorship pressures emanate from all points on the political spectrum at different times, the current censorship movement comes mostly from political conservatives. Censorship efforts by the Reagan administration include barring entry of foreign speakers whose views do not coincide with those of the administration, inhibiting the free flow of films between Canada and the United States, denying press coverage for controversial administration actions such as the invasion of Grenada, and enlarging the number of documents classified as secret. Social studies topics considered unacceptable

by some present-day censor groups include women's suffrage, civil rights, America as a nation of immigrants, American Indian experiences, Watergate, slavery, and global education. These efforts by the present administration and private groups have serious implications for social studies education, which emphasizes the development of students' awareness of and ability to deal with social issues. Several techniques are open to social studies teachers trying to eliminate censorship in the classroom. Among these are awareness of teacher self-censorship, respect for parents' rights, and encouragement of a clearly stated district policy on censorship. (LP)

Descriptors—Concept Teaching, Curriculum Development, Curriculum Guides, Elementary Secondary Education, *Music Appreciation, *Music Education, Skill Development

Music instruction is organized by skill and concept in this 12-part curriculum guide. In parts 1 and 2, a statement of philosophy is followed by a conceptual chart providing an overview of the 1-12 curriculum by concept. Kindergarten curriculum is outlined in part 3. Part 4, which outlines concept development for grades 1 through 6, is subdivided into sections on rhythm, melody, form, tone color, texture, tonality, dynamics, and style. Part 5 presents the curriculum by grade level for secondary education. Each course description includes goals and specific skills and content covered. Parts 6 through 8 present band, chorus, and orchestra offerings. Description and location of music texts and equipment are listed in parts 9 and 10. The final sections contain an evaluation strategy and recommendations for implementation. (LP)

Identifiers—*Canada, *Fur Trade, Hudson Bay
Fur trade settlements in North America were a fertile environment for cultural education. The fur trade became a network of closely linked social spheres in which individuals had to acquire competence in order to function and survive. The Hudson Bay Company's decision to plant permanent posts on the shores of the Hudson Bay put settlers and their Indian trading partners into a new and dynamic set of relationships. Learning curves rose sharply as each side adjusted to the other. For the Indians, the trading posts represented a new social order, new economic values and commodities, and strange religious influences. For the European traders, the posts meant adjustment to a new geographic environment, diplomatic demands, and a changed governmental organization. Longterm developments included increased economic awareness on the part of the Indians and a changed socioeconomic hierarchical structure for the Indians and the European settlers. Ultimately, European settlers and Indians intermarried, forming a new society which was a specialized intersection and mutual adaptation of white and native social spheres. (LP)

Identifiers—*Netherlands

Four articles contained in this bulletin focus on the geography of the Netherlands. The first article deals with the "Northern" Netherlands, i.e., the provinces of Groningen, Friesland, and Drenthe. Special attention is paid to the themes of the conflict between economic and environmental issues, the rich variety of landscapes and settlement forms, and the stagnating economic development in this region. The second article presents a selection of recent statistics about themes that arise frequently in the geography education of other countries. Statistics are given for the population and area, economically active population, exploitation of minerals and manufacturing industry, foreign trade, and tourism and holiday traffic. The third article focuses on the latest developments in matters such as traffic, water economy, and physical planning. Also included is a list of museums, information services, and other institutions of interest to geographers. The final article gives a brief review of the activities of the Information and Documentation Centre for the Geography of the Netherlands during the past year. The appendix lists a number of recent publications in the field of geography of the Netherlands. (LP)

Identifiers—Hopi (Tribe), Kwakiutl (Tribe), Mesquakie (Tribe), Navajo (Nation), PF Project, Sioux (Tribe), Tlingit (Tribe)

This elementary art unit, which exposes students to the art and culture of American Indian tribes, is divided into four sections. Each section deals with a geographical area and a tribe or tribes within that area. Background information precedes instructions for art projects related to specific tribes. The influence of the environment on culture and art is stressed and special rituals and customs are related to specific art forms. The areas, the tribes, and the art projects are as follows: (1) Southwest (Hopi, Navajo)—thunderbird designs, sandpainting, and Kachina dolls; (2) Plains (Sioux)—blanket designs, a hide project, and war shields; (3) Northwest (Tlingit, Kwakiutl)—totem pole projects; and (4) Woodland (Mesquakie)—beadwork projects. Additional materials in this unit include a list of Navajo words and symbols, descriptions of several types of Kachina dolls, illustrations of American Indian symbols and designs, a list of sources for bead supplies, and extra activities consisting of coloring sheets and hidden pictures. A 17-item bibliography lists books on Indian arts and crafts, designs, tribes, totems, and beadwork. This document is part of a collection of material from the Iowa Area Education Agency 7 Teacher Center project. (EM)

This kindergarten music curriculum provides a year-long program of a sequenced series of activities designed to develop music concepts. Topics of the units in this guide are: self-concept (beginning of the year), fall, Halloween, Thanksgiving, Christmas, winter, a circus, Valentine's Day, spring, and farms. A scope and sequence chart of concepts is included which shows the unit in which each concept is introduced and where it is reinforced. The activities are written to cover a 15 minute per day music program for units that last from 2 to 3 weeks. At the end of each unit, additional resource records are listed. After the last unit there is a selection of nine additional activities covering beat, meter, rhythm patterns, tone-matching, dynamics, form, tone color, harmony, listening experiences, and music interest centers. A bibliography of 15 books and 25 record resources is also included. This document is part of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. (EM)

Descriptors—Assignments, *Classroom Communication, Intermediate Grades, Parent Teacher Cooperation, Recognition (Achievement), Records (Forms), Secondary Education, *Student Motivation, *Student Teacher Relationship, *Verbal Communication

Identifiers—PF Project

Forty different forms which can be used for written communication with upper elementary and secondary students are presented in a reproducible format. The forms were created to fill a need for providing students at these levels with motivational notes. Drawings and messages based on a variety of themes are used to make the notes interesting. Suggested uses for the forms are (1) to recognize students who tried but were not quite successful; (2) to provide absent students with assignments; (3) to tell students in a positive way to finish their assignments; (4) to suggest that students come in for extra help; (5) to provide help in organizing the week's assignments; and (6) to recognize student birthdays. Forms for communicating with parents and resource teachers are also included. This document is part of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. (DC)

Descriptors—Art Activities, Behavioral Objectives, *Individualized Instruction, Learning Activities, Learning Modules, *Printing, Secondary Education, Teacher Developed Materials, Units of Study

Identifiers—*Etching, PF Project, *Printmaking
An individualized learning package provides step-by-step instruction in the fundamentals of the etching process. Thirteen specific behavioral objectives are listed. A pretest, consisting of matching 15 etching terms with their definitions, is provided along with an answer key. The remainder of the learning package teaches the 13 steps of the process in the following sections: preparing the plate, applying the hard ground, drawing the image, stopping-out the back side, using acid, cleaning after biting, heating the plate, inking, wiping, preparing the paper, using the press, removing the print, and cleaning after printing. Each section lists supplies and tools needed and gives the steps of instruction. Several checkpoints (inspections by the instructor) are provided for in the course of the learning package. The evaluation consists of taking both the plate and the print to the instructor for a final checkpoint. Three books on etching and printmaking are listed in the brief bibliography. This document is part of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. (EM)

Identifiers—*Fallacies, PF Project

A content outline, learning exercises, and student handouts for a high school unit on logic are presented. The following 11 modules are included: (1) introduction; (2) deductive logic; (3) inductive logic; (4) fallacy: an introduction; (5) fallacy of ambiguity; (6) fallacies of presumption: overlooking the facts; (7) fallacies of presumption: evading the facts; (8) fallacies of presumption: distorting the facts; (9) fallacies of relevance; (10) listening with logic; and (11) review. Seven teaching aids are offered which are designed to be given to students as study aids and learning exercises. The topics of the teaching aids are: thinking aids, blocks to logical thinking, general principles of nonsense, exercises in fallacies, examples of fallacies, and commonly used nonsense examples. Two additional teaching aids were removed due to copyright restrictions. A 10-item selected bibliography of books on logic is included. This document is part of a collection of materials from the Iowa Area Education Agency 7 Teacher Center project. (DC)

Descriptors—*Anthropology, Comparative Analysis, Course Descriptions, *Cross Cultural Studies, Cultural Context, Curriculum Development, Educational Objectives, Elementary Secondary Education, Ethnic Studies, Folk Culture, Foreign Countries, *Global Approach, *Literature, Social Studies, *Teaching Methods

Identifiers—Ashanti, West Africans

Although most educators agree that cross cultural education is a valuable component of the curriculum and that it offers students the opportunity to understand differences and commonalities among people, there is little agreement about how to teach such a subject. An anthrological approach to this discipline helps students understand and appreciate other cultures by narrative portrayals of the lif-

styles, customs, and values of different ethnic groups. This portrayal can best be developed in the classroom through the use of a given culture's oral and/or written literature, and through implementation of learning activities that encourage students to actively use their powers of imagination, speculation, and reason. If educators are serious about increasing children's appreciation and understanding for different cultures, then they must explore and use resources that capture students' interests and spark their intellect. A case study of a unit using stories from the Ashanti people of West Africa demonstrates this approach in practice. (LP)

Descriptors—*Climate, Concept Teaching, *Environmental Influences, Geographic Regions, *Geography Instruction, Instructional Materials, Models, Physical Environment, Postsecondary Education, Secondary Education, *Thermal Environment, Visual Aids

Equable climates with mild winters and summers are more likely to maintain snow or ice cover in high latitudes than extreme climates having colder winters and hotter summers. A simplified version of the Milankovitch cycles can be used to develop a model instructors can use in their classes to illustrate the orbital variations producing either equable or extreme climatic conditions. This model, suitable for high school or college use, uses sinusoidal, linear, and hand-drawn representations rather than sophisticated calculations and constructions to convey an understanding of how the earth's orbital variations affect climate. The model encourages students to think about the complex interactions of a few of the climate inputs and to experiment to match the known climate record. An appendix contains diagrams of the earth's rotation and its effects on climate. (Author/LP)

Descriptors—Course Descriptions, Course Organization, Higher Education, Research Methodology, *Social Action, Social Change, *Social Problems, Social Responsibility, Social Science Research, *Sociology, Student Participation, *Student Projects, Student Research, Student Responsibility, Theories, Values Education
Identifiers—*Applied Sociology

A college-level applied sociology course in which students use sociological theory or research methodology to solve social problems is described. Guidelines for determining appropriate projects are: (1) the student must feel there is a substantial need for the project; (2) the project must be approachable through recognized sociological techniques; and (3) the project must be feasible within the time frame of the course. Some projects students have conducted are described, e.g., they have built new social organizations and started a babysitting service as a shelter for potential child-abuse victims. In organizing and structuring the course, principles from classic sociological theories are used, and this strategy is shared with students. For example, sensitized to anomie by Emile Durkheim, the author took care when structuring this course to clearly draw norms. Students are expected to contribute much of the direction for their project. However, structure is provided through weekly group meetings, a private consulting session, and a student journal containing weekly progress reports. Research techniques used in the projects include experiments, survey research, field work, and documents analysis. One of the biggest challenges is helping the students deal

with values. (RM)

Identifiers—Australia, Social Participation

One of a series of publications to assist Australian secondary school teachers in the area of social studies skill development, this booklet provides an introduction to basic social studies skills and their implications for classroom teaching. Following an introduction, part 1 examines current curriculum trends in Australia. Included in the discussion are the need for curriculum balance, the nature of core curriculum, and changes in teaching strategies, resources, and methods. Part 2 defines the educational content of social sciences, as well as its aims, skills, attitudes, and values. Part 3 focuses on the place and function of skill development in social science education. The skills of inquiry, communication, and social participation are discussed. Classroom strategies for developing student skills are outlined in part 4. Part 5 provides an outline of social science skills by category. Part 6 contains an instrument for planning a social science program. The final part is a case study of a model skills program. A bibliography and list of resources conclude the booklet. (LP)

Identifiers—Pennsylvania (Three Mile Island), Terrorism

This is the report of a task force formed to bring psychological understanding to bear on the various aspects of the development of nuclear arms and nuclear energy and the threat they pose to human physical, mental, and emotional health. The first of

seven articles considers the sociopsychological aspects of the nuclear arms race. Other articles address the emotional responses to nuclear issues and terrorism, United States-Soviet relations in the nuclear context, the relationship of secrecy to nuclear developments, the impact of nuclear developments on children and adolescents, and the psychological aspects of the accident at Three Mile Island. A concluding article reviews relevant literature. (LP)

Arranged in three sections, this resource for secondary school students provides an introduction to the computer's impact on society. The first section surveys historical methods of recording and storing information: clay tablets, papyrus, and books. The second section describes how computers work and ways they can be used. Also considered are the effects of computer technology on medicine, space travel, shopping, traffic control, and money. The final section discusses some of computer technology's potential problems, such as invasion of privacy, depersonalization, development of a police state, computer crime, and a machine-controlled society. A glossary of computer terms is included. (LP)

Descriptors—Birth Rate, Demography, Developed Nations, Developing Nations, Economic Factors, *Futures (of Society), Global Approach, Population Distribution, *Population Growth, *Population Trends, Rural to Urban Migration, Social Science Research, World Affairs, World Problems

In recognition of the 1984 World Population Conference, this booklet examines the current state of world population and presents speculations on what it might be 50 years from now. World population, now close to 4.8 billion and growing at 1.8 percent a year, is being shaped by three demographic phenomena: prolonged below-replacement fertility in developed nations; rapid growth despite falling fertility in developing nations, due to earlier rapid mortality decline; and rapid urbanization in developing nations and unprecedented migration from poor to better-off nations. Nondemographic factors related to population change in the next 50 years are predicted to be: no world war, global resource adequacy, rapid scientific and technological progress, demise of capitalism and communism, and greatly increased aid from advanced to less advanced nations. By the year 2034, nations may be divided into service/information societies, where immigration balances low fertility to prevent population decline; industrialized nations with fertility at replacement level; developing nations in sight of replacement-level fertility; and least developed nations with critical demographic problems. Zero population growth is possible in another 50 years, but only if humankind acts to see that the stated nondemographic assumptions are borne out. (Author/LP)

Burns, John W.

Paideia: Origins.

Pub Date—25 Nov 83

Note—10p; Paper presented at the Annual Meeting of the National Council for the Social Studies (San Francisco, CA, November 25, 1983).

Pub Type— Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Rearing, Educational History, *Educational Objectives, Educational Philosophy, *Educational Practices, Elementary Secondary Education, *Equal Education, *Greek Civilization, Greek Literature

Identifiers—Adler (Mortimer), *Paideia Proposal

The ideas in Mortimer Adler's educational manifesto, "The Paideia Proposal," are compared to the Greek concept of paideia (meaning upbringing of a child) and discredited. Committed to universal education, Adler wants schooling based on a set of uniformly applied objectives achieved by packaging pre-organized knowledge in established areas of study. Adler would have been comfortable in ancient Greece, for they too had their world under control. Both the Athenian and the Spartan concepts of paideia were the same: all students were subjected to the same objectives; the curriculum was universal and administered with equal treatment of all. There was no individual choice. For example, in Athens the ideas of the sophists who challenged traditional educational practices were received merely as ideas. Although they might enrich social exchanges in the agora, ideas were hardly the stuff from which social reform might flow. Adler's proposal parallels the Athenian treatment of the sophists, i.e., it removes the social dimension from study. The educational process in his manifesto is one of cultural replication, but it does not promote growth. (RM)

The teacher's guide outlines seven individual social studies units designed to help low achieving students develop reading and writing skills. Following a preface on reading and writing in the content area, material is divided into seven sections which cover the program units on religion, "isms," education, energy, technology, revolution, and consumerism. These themes use current events as a motivator to teach reading, writing, and social studies. The seven units are sequential in order of difficulty, beginning at the fourth grade level of readability. Project procedures and materials can be used for high school classes, individual study in alternative and continuing high schools, and adult education classes. Following a uniform format, sections include teacher instructions, a study guide, quizzes, a unit test, and answer keys for 11 exercises. (LP)

Identifiers—Industrial Revolution

One of a series of social studies units designed to develop the reading and writing skills of low achievers, this student activity book focuses on the theme of technology. The unit can be used for high school classes, individual study in alternative and continuing high schools, and adult education classes. Material is divided into four sections. Section one contains a reading which describes the Industrial Revolution and the growth of modern technology. Section 2 describes the age of the steam engine. Sections 3 and 4 examine the effects of industrialization on society and on the modern world. Each section contains a reading which stresses vocabulary development and aural discrimination. Appendices contain a variety of reading and writing exercises, including a story about a job interview, and stories about the Industrial Revolution and the assembly line. (LP)

Identifiers—Supply and Demand

One of a series of social studies units designed to develop the reading and writing skills of low achievers, this student activity book focuses on the theme of consumerism. The unit can be used for high school classes, individual study in alternative and continuing high schools, and adult education classes. Following an introduction, five sections cover supply and demand, trade-offs, factors of production, advertising, and the market chain. Each section consists of a short reading stressing vocabulary development and aural discrimination. An appendix contains seven exercises to accompany the readings in the text. Activities focus on reading comprehension and incorporate the topics of stores, comparative shopping, bargains, budgeting, and shopping. (LP)

An Interdisciplinary Approach to Teaching Hu-

manities.

Pub Date—30 Dec 83

Note—11p.; Paper presented at the Modern Language Association of America Conference (100th, New York, NY, December 27-30, 1983).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Aesthetic Education, Art Appreciation, Beliefs, Critical Thinking, Ethics, Higher Education, Humanism, *Humanities, *Humanities Instruction, *Interdisciplinary Approach, Literature, Modernism, Philosophy, Program Descriptions, *Western Civilization

An interdisciplinary, core course in humanities offered at Allegheny College (Pennsylvania) approaches ethical and aesthetic issues in untraditional ways to encourage students to think more independently and articulate ideas with greater breadth. The three-term course is taught by teachers from many departments. Course sections are limited to 18 freshmen, and both the instructor and the class membership change each term so that students can be exposed to as many different ideas and opinions as possible. Focus and orientation of the curriculum also change with each term: term 1 focuses on the political and social functions of art, term 2 on great works of the Western tradition, and term 3 on the various guises of modernism. The syllabus is also keyed to cultural events taking place on campus. Problems surrounding the course are related to the structure of curriculum distribution and/or the primary function of this college as a teaching college. Criticism by many of the non-humanities faculty centers on dilettantism. Other problems stem from faculty departmentalism and academic conservatism. (LP)

Descriptors—Contraception, Cultural Context, *Dating (Social), *Family Life, Family Planning, Family Size, Foreign Countries, Friendship, Higher Education, Marriage, *Population Growth, Sexuality, *Social Attitudes, *Social Life, Social Science Research, Social Values, *Student Attitudes

Identifiers—Philippines, Zero Population Growth

Results of a study on attitudes of Filipino college students concerning human population issues are reported. A total of 74 University of the Philippines students, half of whom were enrolled in a natural science course, answered a 15-part questionnaire on dating, friendship, premarital sex, marital expectations, and birth control. Several observations were gleaned from the results of this investigation. Dating is common among Filipino youth. Significant factors in choosing dates, friends, and a spouse are personality, physical appearance, intelligence, and economic status. Filipino youth are conservative in outlook, subscribing to the norms and standards of the larger society. They tend to disapprove of premarital sex, birth control, and zero population growth; and expect to have three-four children. (LP)

Identifiers—*Germany, *Holocaust, World War II

Designed to facilitate teacher development of a secondary unit on the Holocaust and genocide, this multidisciplinary curriculum guide provides a wide variety of classroom-tested objectives, learning activities, and materials. The guide is organized into six units which may be taught in sequence or used in part as supplementary materials: the Nature of Human Behavior, Views of Prejudice and Genocide, the Rise of Nazism in Germany, From Persecution to Mass Murder, Resistance and Intervention, and Issues of Conscience and Moral Responsibility. For each unit, an overview precedes a list of terminal and performance objectives, a glossary, and list of activities. The latter consists of a three-column chart which matches performance objectives with learning activities, materials, and commentary. All reading materials listed are tagged to appropriate reading level: below average, average, and above average difficulty. Appendices consist of a bibliography, list of audiovisual materials and distributors, three newspaper feature stories about the Holocaust, and the table of contents for the student anthology related to this curriculum guide. Identifiers—PF Project

Schools which have successfully implemented mastery learning (ML) programs show many similarities in their plans for ML development. These similarities stand out so strongly that knowledge of them can help all schools in planning for ML. The following program commonalities observed during visits to several schools in New York, Washington, Colorado, and Oregon are: (1) change to ML based upon an identified need; (2) initial involvement and dedication of a head administrator; (3) formal board action indicating dedication to ML ideals; (4) evolutionary (slow, methodical) program development; (5) involvement and commitment of teachers; (6) extensive and ongoing staff development; and (7) revision or re-examination of staff evaluation procedures. A true ML program will do the following: diagnose and teach prerequisite skills; teach in two or more modes to an objective; use formative tests to give feedback to teacher and student; reteach using correctives, time, and a new teaching mode; and use criterion-referenced tests for summative evaluation of mastery. Kindergarten Weekly Homework.

Newark Unified School Dist., CA.

Pub Date—83

Note—3p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Homework, Kindergarten, *Kindergarten Children, Learning Activities, *Parent Participation, Parent School Relationship, Parent Student Relationship, Parent Teacher Cooperation, Primary Education, *Reading Readiness

Identifiers—PF Project

THE FOLLOWING IS THE FULL TEXT OF THIS DOCUMENT: The kindergarten staff at H. A. Snow School has devised a series of homework idea sheets, to accompany the readiness program that is taught weekly in the kindergarten classrooms. Beginning in early October, we introduce an alphabet letter each Monday. During the week, all

subject areas are focused on that "Letter of the Week." On Monday each child is given a homework sheet with various ideas the parents can carry out at home during that week. Parents mark the activities they accomplished with their child and return the sheet on Friday. Parents are encouraged to write comments to us about the activities. Returned homework sheets are checked by the teacher, entered in a log, and returned to the child to take home. There are several purposes for this homework. One purpose is to stimulate and develop a positive partnership between students, parents, and teachers. Parents of five-year-olds are very interested in helping their children at home. The homework is an organized and sequential response to parents who ask, "What can I do to help my child at home?" Also, we, as kindergarten teachers, would like to help the families become aware of the joys and rewards of parents and children working together. This might involve anything from trying to juggle during "J" week to stepping on a scale to learn your weight during "W" week. One parent's comment helped us feel our program was truly worthwhile when she wrote, "Denise, as always, enjoys doing her homework. I also enjoy helping her. It gives me a lot of pleasure and satisfaction to see her eagerness to learn. Thank you for giving us the opportunity to work together!" This program was selected by the Association of California School Administrators (ACSA) Task Force on Public Confidence as descriptive of a promising practice or exemplary project worthy of highlighting for the California educational community. Descriptors—Academic Standards, *Accreditation (Institutions), *Accrediting Agencies, *Administrator Attitudes, *Agency Role, Deans, Higher Education, *Institutional Evaluation, *Schools of Education, State Standards, Teacher Education Identifiers—*National Council for Accreditation of Teacher Educ. Texas

To determine the current perception of the teacher education leadership in Texas regarding the importance or value of accreditation by the National Council for Accreditation of Teacher Education (NCATE), a questionnaire was sent to the deans and chairmen of colleges, schools, and departments of education throughout the state. There are 64 colleges or universities in Texas with state-approved teacher education programs. Thirty Texas programs are accredited by NCATE. Twenty of the NCATE-approved schools are state supported and 10 are private. Responses were received from 58 of the 64 institutions for a 91 percent return. Of the responses, 29 were from NCATE-accredited institutions and 29 from non-NCATE institutions. This document presents a summary of the responses from these institutions. Responses are presented on the final question, which asked about advantages or disadvantages attributed to seeking and attaining NCATE accreditation. Most respondents listed the time and expense of self-study preparation and the NCATE visit as disadvantages. Advantages included prestige associated with NCATE accreditation and possible reciprocal certification benefits among states. (JD)

Descriptors—*Change Strategies, *Educational Change, Elementary Secondary Education, Government Role, *Information Seeking, *Inquiry, Instructional Improvement, Learning Processes, Policy Formation, Research and Development, Teacher Education, Teacher Effectiveness, Teacher Role

This essay proposes that systematic and reflective

inquiry ought to become the underlying professional frame of mind that guides teachers, administrators, and policy officials. It is noted that the products of inquiry include rationales connecting recommended courses of action to intended outcomes, as well as the invention of techniques, materials, and prescriptions designed to achieve those outcomes. Part one presents the concept of the organizing principle of inquiry and impediments which stand in the way of the proposal. Projected consequences for the educational system are considered. Part two offers examples of inquiry processes and products for education. Characteristics of behavioral and social inquiry in teacher training and the organization of instruction are explored. Ways in which formal inquiry processes in research and development can improve effectiveness of educational practice are described. In part three, concrete suggestions are offered on how the transformation could be brought about. Memoranda present specific action steps as well as further views on the implications of the proposed reform for educational personnel. Part four summarizes the proposed reform, anticipates possible counter arguments, and sketches long-range possibilities. (JD)

Identifiers—Student Teacher Attitudes, Student Teacher Evaluation

A model for preservice and inservice teacher self-assessment, which fosters improved performance, is divided into two phases. Phase 1 begins at the preservice level, and phase 2 is carried out during the time the teacher is under contract in a school setting. During phase 1, the teacher candidate ex-

plores the answers to three questions in coursework: (1) How can effective teaching be defined? (2) What constitutes clear, meaningful standards (criteria) of effective teaching? and (3) What would be an appropriate method (process) for self-assessment? Each teacher candidate explores available literature and research through six instructional modes: (1) becoming familiar with the self-assessment concept; (2) exploring effective teaching practice; (3) identifying standards for effective teaching; (4) analyzing teacher behavior; (5) designing a self-assessment system; and (6) implementing a self-assessment system. The second part of phase 1 is implementation of the self-evaluation system during student teaching. Phase 2 deals with inservice teachers. Each school district should develop a comprehensive plan of evaluation. In due time, the first year teacher develops a personal approach to self-assessment within district guidelines. (JMK)

Descriptors—*Education Majors, High Schools, High School Students, Knowledge Level, Preservice Teacher Education, Program Development, *Student Behavior, *Student Evaluation, Teacher Certification, Teacher Education Programs, Teacher Effectiveness, *Teacher Evaluation, *Teaching Experience, *Time on Task Identifiers—Illinois State University

Illinois State University's teacher education program's professional sequence is organized around separate teaching skills, each of which relates to student outcomes in classrooms. Initially, a group of University High (U-High) Laboratory School supervisors was formed to develop clinical experiences which would enable prospective teachers to integrate these separate teaching skills and practice using them in the high school setting. The first stage in certification procedure development consisted of developing a teaching performance test. The U-High Academic Learning Time (ALT) model is based upon an interactive curriculum theory which enables teachers to achieve the benefits of syntheses. Designed to help prospective teachers analyze content and build unit-sized instructional sequences in which subject matter acquisition is complemented by the application of subject matter to tasks of personal and social significance, the BTES (Beginning Teacher Evaluation Study)/ALT model consists of five teaching skills: diagnosis, prescription, presentation, monitoring, and feedback. This paper describes the model in detail, analyzes the BTES, and describes how student time on task measures are being used to certify teachers at U-High. Also provided are a description of low, mid, and high levels of knowledge use in the classroom and education students' responses to the program. (JMK)

Identifiers—*Extended Degree Programs, *National Standards

Recognition of teachers as professionals can come with increased college preparation, professional participation of all segments of the profession with mutual respect for one another, and a more active voice

by the profession in licensing and establishment of standards. Preparation requirements for teachers should be mandated nationally rather than done state by state. These requirements should be supported and recognized by all members of the profession. Another requirement should be that teachers receive their professional preparation at the graduate level, having completed at least 60 hours, including the masters degree. The four year undergraduate program, of the proposed six year preparation, should focus on those arts and science areas which will provide for personal growth and a foundation for the education preparation to come, and establish at least one discipline in depth. The establishment of graduate teacher education schools would call for agreement on a common foundation for all curricula. If colleges of education were accredited by a strong national agency, and the colleges adopted a common body of knowledge, the states would be forced to adopt a common licensing standard. The results would be higher standards for schools of education which would attract better students. (JD)

Descriptors—*Academic Achievement, Attitude Change, *Breakfast Programs, Dietetics, *Eating Habits, Elementary Education, *Elementary School Students, *Nutrition Instruction, *Reading Improvement, Student Attitudes

A pilot study examined the effects of improved breakfast nutrition on students' academic achievement. Participants were 142 intermediate school children who usually ate breakfast in school. All children were given the Gates-MacGinitie Reading Tests, Form 1, Levels A-D, and were ranked according to their total reading scores. The experimental and control groups were matched by reading level and grade. The experimental group had a different menu each day providing variety, high density carbohydrates, and protein. The control group received a standard breakfast of fruit or juice, milk, and a packaged cereal. At the conclusion of the experimental period all children were tested on an alternate form of the Gates-MacGinitie Tests and results were compared. During the second semester of school the two groups switched roles. A trend was observed that indicated the experimental breakfasts may be associated with greater gain in reading scores. Further research is underway. Detailed descriptions of the menus and notes on the children's reactions to them are appended. (JD)

Identifiers—American College Testing Program, *Kentucky

The state of Kentucky has recently raised its standards for persons who apply for admission to teacher education. The plan, mandated by the State Board of Education, involves a selection/retention process for candidates who apply for initial admission to the program and for candidates who progress through the program. A minimum level of performance on multi-faceted criteria must be demonstrated by each candidate prior to initial acceptance into teacher education. The criteria include acceptable performance in basic skills, as well as evidence of appropriate professional characteristics. Candidates may be denied admission to professional teacher education, even in an open-admissions insti-

tution. This paper explains the Kentucky plan for admission to teacher education. Aggregate data describing results of the admission/retention process in Kentucky are presented to portray the quality of persons who applied for admission to teacher education as well as those who were accepted into a preparation program. In addition, data from Northern Kentucky University, an institution with five years' experience in selective admissions, is presented to show the impact of a selective admissions program upon the quality of candidates enrolled in teacher education. The impact of selective admissions upon enrollment is also presented. (JMK)

Descriptors—*Career Ladders, *Demonstration Programs, Elementary Secondary Education, *Evaluation Criteria, Inservice Teacher Education, *Master Teachers, Mentors, *Professional Recognition, Program Development, Program Implementation, *Teacher Effectiveness, Teacher Evaluation

Identifiers—*Demonstration Schools, Kentucky

Addressing professional and popular concern about identifying and adequately rewarding excellent teachers, the authors describe a proposal for selecting master/mentor teachers and utilizing them in demonstration schools. There are six specific elements that should make any master teacher proposal realistic and educationally and economically defensible: (1) initial planning; (2) indepth preparation and training; (3) documentation of skills as a basis for ultimate selection; (4) significant school district support; (5) major inservice focus; and (6) constant evaluation. A proposal which includes those characteristics is aimed at improving the quality of teaching as well as rewarding excellence in teaching beyond what currently exists. The Kentucky plan, like those in North Carolina and Tennessee, includes a career ladder. However, it differs from other plans in that it also incorporates the notion of demonstration schools and classrooms, staffed by master teachers who take major responsibility for the inservice education of other teachers in the school district. In this description of the proposal, discussion centers on the major elements of the plan—demonstration schools; and a career ladder involving master/mentor, master teacher, and master teacher candidate roles; internships; criteria for selection; and continued evaluation. Included with the proposal are 45 criteria for master and master/mentor teacher selection; 2 figures depicting program progression; and a table of 14 roles and functions of master and master/mentor teachers. Identifiers—Research Practice Relationship

This paper describes the effects of applying research generalizations about inservice teacher edu-

cation to the practices of a local school district. Generalizations considered include: (1) short- and long-range planning needs; (2) joint planning and participation by administrators and teachers; (3) relationships among inservice and curriculum development, instructional improvement, and teachers' individual needs; (4) demonstration and practice of new skills; (5) continuous, locally based inservice; (6) peer observation and interaction; and (7) voluntary participation. A long-range program which would incorporate these generalizations was launched. Program elements include: (1) program goals and objectives jointly derived by administrators and teachers; (2) university involvement for 2 years with the opportunity for participating teachers to earn up to 12 credits; (3) joint participation for administrators and teachers; (4) activities structured to the school district's time table; (5) cadre teams from each building for acquiring and offering inservice training; (6) support of university personnel; (7) research and evaluation conducted by university personnel; and (8) opportunities to develop additional inservice activities and programs. A description is given of the school district, district personnel, and various instruments and processes used to gather data. Conclusions and findings are discussed in detail for each of the research generalizations, and 14 tables presenting additional data are included. (CJB)

Descriptors—Child Development, Children, Competition, *Cooperation, Group Activities, *Individual Development, Intergroup Relations, *Interpersonal Relationship, Peer Relationship, *Play, *Social Behavior

The need is present for children to "unlearn" to play in a competitive and unsupportive environment and to return to natural and cooperative ways of playing. The advantage of a noncompetitive play structure is that it provides ground where players practice interacting and speaking supportively and appreciatively to each other. Players are then able to extend this support to other parts of their lives. Persons are naturally cooperative until they are taught otherwise. And, in cooperative play experiences, individuals are encouraged to be spontaneous and to move outside of their social roles, so they can have real choices in their lives. Educating children to their own power and supporting them in specific cooperative activities enhances the quest for learning. Through these experiences, one sets realistic goals for behavior that utilizes democratic decision-making and a desire to improve rather than prove one's abilities. (Author/JMK)

Descriptors—Course Content, Critical Thinking, *Curriculum Design, *Educational Objectives, Elementary School Teachers, Higher Education, Holistic Approach, *Interdisciplinary Approach, *Masters Programs, Needs Assessment, Problem Solving, *Program Development, Secondary School Teachers, *Teacher Education

A description is given of the assumptions, goals, and curriculum of a proposed interdisciplinary Master's degree program in elementary and secondary education at Kennesaw College (Marietta, Georgia). The program addresses several problems: (1)

repetitiveness of undergraduate and graduate programs in education; (2) lack of competence in critical thinking and problem solving processes in students at all levels of schooling; and (3) limitation of specialization and narrowness of training in graduate programs. A discussion is presented on reasoning behind selection of these problem areas. It is noted that the program's organizational themes are based on three assumptions: (1) Graduate level education programs should primarily strengthen theoretical and contextual understanding of the profession rather than provide technical training; (2) A problem solving focus provides opportunities for increasing teachers' skills and understanding of the problem solving processes; and (3) An interdisciplinary focus is necessary to provide perspective on educational problems and issues. Five program goals are listed and a model for organization of program curriculum and a course outline are included. (JD)

Identifiers—Oklahoma

Faculty development programs for schools of education were mandated in 1980 by the Oklahoma State Legislature. Among approved standards each institution must meet are: (1) submission to the Oklahoma State Department of Education of faculty development plans and yearly reports of additions or revisions; (2) inclusion of at least one classroom teacher in the teacher education faculty development committee; (3) applicability of faculty development programs to all faculty, including administrators and deans; (4) faculty development programs, such as inservice or exchange programs (not to the exclusion of regular faculty assignments); and (5) service of faculty, at least one-half day per semester, in a public school in responsibilities related to their respective teaching fields. Four plans from four institutions are discussed in terms of structure, requirements, and procedures. Concerns expressed about the feasibility of implementing some of these standards are discussed, including: required service in the public schools, assignment of additional duties without additional compensations, and the threat posed by political initiation of changes in education. Appendices include various forms associated with teacher education faculty development plans. (JD)

Descriptors—Cognitive Development, Educational Technology, *Professional Recognition, Social Status, *Status Need, *Student Teacher Relationship, Teacher Education, *Teaching (Occupation)

An analysis of educational professionalism is presented within the framework of sociology and class stratification. If a profession is defined as any area of human activity which requires some level of advanced skills or education to perform, there should be certain prerequisite conditions, such as the acquisition of necessary knowledge and skills, and certain conditions relative to professional performance, such as resolving problems for the client, advancing knowledge, etc. The following set of requisite conditions regarding the "professional pedagogical act" are set forth: (1) It (the act of teaching) should enhance the professional pedagogical act and client so that they emerge from the relationship as subjects, not objects; (2) It should enable the professional pedagogical act to participate fully in curriculum and policy decisions; (3) It should assist the professional pedagogical act and client to acquire personal meaning of life; (4) It should engender in the professional pedagogical act a sense of autonomy; (5) It should enhance the professional pedagogical act's ability to care for others; and (6) It should enable the professional pedagogical act to share with others. cation, State Legislation, *State School District Relationship
Identifiers—California, *California Mentor Teacher Program, PF Project

This advisory for superintendents on the California Mentor Teacher Program provides background information, discusses issues in initial program planning, describes the state department of education's role and upcoming activities in program implementation, and gives information on funding for the program. The background section describes the purpose and legal basis of the program and gives an overview of how it will operate. Issues in initial program planning include: beginning immediately, working with appropriate groups, considering needs and roles mentors should fill, defining roles of selection committees, defining criteria for mentor nomination and selection, defining the process for assessment of candidate qualifications, determining mentor responsibilities, providing training for mentors, securing commitments from site administrators and teachers, setting reasonable expectations, and providing a forum for mentors to assist one another. The funding section discusses the stipends that will be given to mentors, funding for the second half of 1983-84, apportionment of funds to participating districts, allocation of funds for district administration of the program, availability of funds for 1984-85, and limitations on future participation of districts that do not participate during the initial year. A form to be returned by districts that intend to participate in the program is included. (DC)

Descriptors—Beginning Teachers, Comparative Analysis, Education Majors, Elementary School Teachers, *Job Satisfaction, Peer Relationship, Professional Recognition, *Recognition (Achievement), *Socialization, Student Attitudes, *Teacher Attitudes, Teacher Role, *Teaching (Occupation), *Teaching Experience

Identifiers—*Stages of Concern

Teacher education, when viewed along a professional continuum from preservice level to beginning level to experienced level, involves a socialization phenomenon which is only minimally described or understood by the profession. Several aspects of the socialization process—career rewards, levels of professional concern, and perceptions of the climate of the workplace—have been studied and begin to explain the changes that occur during the process. Sixty elementary school teachers, grouped at preservice, beginning, and experienced levels, responded to questionnaires assessing job satisfaction, communication patterns, and levels of professional concern. From the data, profiles of each professional level have been developed and differences between each teacher group on the questionnaire items have been analyzed. Job satisfaction ratings of all three teacher groups display little variation contrary to expectations based on the literature and experience. (Author/JMK)

Descriptors—Behavioral Objectives, *Behavior Modification, *Classroom Observation Techniques, *Evaluation Criteria, Higher Education, Physical Education Teachers, Preservice Teacher Education, Program Development, *Student Teachers, Student Teacher Supervisors, Student Teaching, Teacher Behavior, *Teacher Evaluation

Identifiers—*Clinical Supervision, *Student Teacher Evaluation

A number of studies indicate that student teachers can change their behavior quickly, sometimes dramatically, when under a supervisory program which focuses upon behavioral change during the experience. Such change is contingent upon the extent to which student teachers have specific objectives to achieve and regular, precise feedback about their progress in achieving these objectives. A plan for a supervisory model is based upon certain methodological aspects of a behavioral approach to the improvement of teaching. Four essential elements of this approach include: (1) clear description of behavior category under consideration; (2) attention paid to specific relationships between situation in which the behavior occurs, emission of the behavior, and consequences that accrue to the behavior; (3) consistent monitoring of behavior frequency or duration; and (4) analysis of instructional variable effects. Attempts have been made to apply this behavioral approach to the modification of student teacher behavior. A detailed description of the three-phase supervisory model used and corresponding observational formats are provided. (JMK)

Expressive Writing for Participation in Learning.

Pub Date—[80]

Note—12p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Descriptive Writing, Diaries, Higher Education, Learning Strategies, Preservice Teacher Education, *Self Expression, Student Attitudes, Student Evaluation, Student Teacher Relationship, Teaching Methods, *Writing (Composition), Writing Skills

Identifiers—*Student Journals

An introductory two-semester education course for preservice elementary school teachers addresses in the first semester the topics of childhood, and how the family and society relate to teaching. In the second semester topics include children in the classroom, teaching philosophies, and professional issues. Student writing is used as a feedback method and as a cohesive technique for drawing classroom materials together. Students submit three to five journal entries a week, choosing to write on topics related to the main instructional goals for a particular period, recording observations of children, or writing about something of current interest in their own learning. Faculty avoid "corrective" comments on matters of style or form and respond only to content. Four definite educational advantages

emerge from "expressive-writing oriented" journals. They allow: (1) faculty to assess and respond to genuine student learning; (2) students to express themselves candidly and assimilate and apply classroom materials to their own lives; (3) faculty to meet individual personality styles; and (4) faculty to assess "authentic" writing skills and plan for writing help to be given in another part of the course as well as throughout the students' programs. Descriptors—Classroom Techniques, Comparative Analysis, *Hearing Impairments, *High Achievement, Higher Education, Preservice Teacher Education, Self Evaluation (Individuals), Student Teacher Relationship, *Student Teachers, Student Teaching, Success, *Teacher Characteristics, *Teacher Effectiveness, Teaching Experience

Identifiers—Student Teacher Evaluation

Several groups of hearing-impaired students at Gallaudet College (District of Columbia) have successfully completed their student teaching assignment with hearing children in public schools. Factors leading to their success were analyzed through results of observation, interviews, and a survey questionnaire administered to samples of both hearing and hearing-impaired student teachers. Many success factors for hearing-impaired trainees resemble those leading to success for hearing trainees. Hearing impairments, however, provide these trainees with certain unique advantages. Through years of continuous use of, and dependence on, a visual mode of communication, the hearing-impaired teacher may be a superior visual attender in the classroom. The hearing-impaired teacher places high value on the act of communication. Strong identification with a sub-cultural base develops a clear sense of personal identity. The initial advantage of novelty and interest creates great pupil attentiveness which can be used to advantage. As a survivor of personal challenges, the hearing-impaired teacher is highly motivated. The hearing-impaired experiences, has a high sense of mission and, because program supervisors carry high expectations for their hearing-impaired teacher trainees, high levels of performance result. Descriptors—Administrator Role, Cognitive Processes, *Computer Assisted Instruction, *Computer Literacy, *Computer Managed Instruction, Computers, Computer Science Education, Educational Media, Elementary Secondary Education, *Microcomputers, Programming, School Districts, Teacher Education, Teacher Role

This paper presents alternative ways microcomputers can be utilized in the educational process. These uses are: (1) learning from, with, and about computers; (2) learning about thinking with computers; and (3) managing learning with computers. Each of these uses is discussed as to its applicability to current educational practice and possibilities for the future. The role of the teacher in each of these areas is discussed and the relative importance of computer hardware and software for each area is described. Specific recommendations for educator action, as schools begin to use computers, are: (1) development of school district guidelines considering roles for which computer systems can be used, quality of educational software, choice of hardware, maintenance budgets, and extent of teacher inservice necessary; and (2) increase of teacher knowledge of uses of computers through self-study, school

workshops, and courses and/or degrees from institutions of higher education. Also included is a bibliography of books, journals, and articles. (JD)

Ryan, Joseph F.

Modifying Attitudes of Pre-Service Secondary Education Students toward Discipline in the Classroom.

Pub Date—Jan 84

Note—14p.; Paper presented at the Annual Meeting of the Southwest Educational Research Association (Dallas, TX, January 26-28, 1984).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Attitude Change, Classroom Techniques, *Discipline, Higher Education, *Preservice Teacher Education, Reinforcement, *Secondary School Teachers, Student Teaching, *Teacher Attitudes, Teacher Effectiveness, Teacher Response, Teaching Methods, *Teaching Models

Identifiers—*Canter Model of Assertive Discipline, Student Teacher Attitudes

The problem of discipline has consistently headed the list of concerns of secondary education students enrolled in and graduated from Northern Arizona University's College of Education. To address this issue, the Lee Canter Model of Assertive Discipline was adopted in the preservice training program. This model calls for specific, observable rules (five or six maximum) introduced and explained by the teacher. A list of consequences, articulated by the teacher, becomes operative when students fail to observe the rules. A study sought to determine the extent to which preservice secondary education majors modified their attitudes toward classroom discipline after exposure to the Canter Model. Thirty-seven students participated in the study and responded to a pre- and post-questionnaire which measured changes in their attitudes toward discipline and confidence in dealing with high school students. An analysis of results indicated that the Canter Model is effective in improving attitudes and confidence. (JD)

In the Image of Confucius: The Education and Preparation of Teachers in Taiwan.

Pacific Cultural Foundation, Taipei (Taiwan).

Pub Date—83

Note—189p.

Available from—Pacific Cultural Foundation of Taipei, C. O. Specialty Book, Drawer D, Shepherdstown, WV 25443 (\$5.95).

Pub Type—Reports - Descriptive (141) — Books (010)

EDRS Price - MF01/PC08 Plus Postage.

Descriptors—Administrator Role, *Chinese Culture, Comparative Analysis, Course Content, *Educational Philosophy, Elementary School Teachers, Foreign Countries, Government Role, Higher Education, Humanistic Education, Inservice Teacher Education, Preservice Teacher Education, Secondary School Teachers, *Teacher Education Programs

Identifiers—*Taiwan

This book reviews both preservice and inservice teacher education in the Republic of China and provides detailed analyses. In the first chapter, an overview of the educational system's structure in modern Taiwan and the United States is presented and comparisons drawn. Features of Chinese educational and intellectual thought and philosophy are considered in the second chapter. A brief historical profile is drawn of the foundations of Chinese philosophy of education, based to a great degree on the teachings of Confucius. The following two chapters describe the structure, curriculum, and administrative organization of preservice education for elementary and secondary school teachers. Tables provide detailed information on the courses offered in the 5-year normal schools and when particular classes are taken by students. In the fifth chapter, inservice teacher education is discussed. Descriptions are given of inservice opportunities (some leading to a masters degree), and of the "In-Service Teachers Institute Program" which has its main center in Taipei. In the final chapter, issues facing Taiwan educators in planning for the future are discussed. (JD)

Gooding, C. Thomas And Others

Development and Field Testing of a Wait Time Feedback Device for Monitoring and Improving Classroom Interaction.

Pub Date—Feb 84

Note—9p.; Paper presented at the Conference of the Eastern Education Research Association (West Palm Beach, FL, February 9-12, 1984).

Pub Type—Speeches/Meeting Papers (150) — Reports — Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Conceptual Tempo, Elementary Secondary Education, Feedback, Interaction, *Pacing, *Questioning Techniques, *Reaction Time, *Student Reaction, *Teacher Response, Teacher Role, *Time Factors (Learning)

Identifiers—Wait Time

Studies of the pauses between teachers' questions and students' responses have indicated that lengthening wait-time produces significant improvement in intellectual performance. Two types of pauses have been identified: the pause after teachers pose questions and students respond, and the pause that takes place when students hesitate momentarily in their replies. Typically, pauses between teacher and student remarks average approximately 1 second. Even though 3-second pauses in classroom interaction have been shown to be important, most efforts to train teachers to use wait-time effectively have met with little success. An electronic device, which provides automatic continuous monitoring of pauses in classroom dialogue, consists of voice-activated switches, a variable timer, and a system of red and green lights. A red light is activated when a person is speaking, while a green light signals whenever sustained silence occurs. Field testing has indicated that using the device helped teachers to prolong wait-time in questioning. A diagram of a "wait time feedback" device is included with the description. (JD)

Integrating Liberal Education, Preparation for Work and Human Development: Implications for Teacher Education.

Pub Date—3 Feb 84

Note—19p.; Paper presented at the Annual Meeting of the American Association of Colleges for Teacher Education (36th, San Antonio, TX, February 1-4, 1984).

Available from—Center for the Study of Higher Education, Memphis State University, Memphis, TN 38152 (\$3.00).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cognitive Development, *Communication Skills, Coping, *Developmental Stages, Educational Objectives, *Education Work Relationship, *General Education, Higher Education, Interpersonal Competence, Moral Development, Preservice Teacher Education, *Teacher Education Programs, Teaching Methods

There has been a long-standing debate about the proper relationships between teacher preparation and liberal education. The current wave of concern about the quality of teacher preparation, combined with enrollment declines in colleges of education, has led to major reorganization in some institutions which have moved significant portions of the teacher preparation curriculum into colleges of arts and sciences. Research and theory concerning success at work and human development involves a set of clearly identifiable cognitive skills, interpersonal skills, and motivational characteristics. Basic competencies for teachers, such as those outlined by an Interim Commission as part of the Tennessee Better Schools program, must be integrated with the goals of liberal education. The generic and transferable competencies and personal characteristics which result from this integration are essential requirements for effective teaching. In addition, research concerning human development, and in particular ego development, is also highly congruent with the basic perspectives supplied by these analyses. These conceptions concerning human development reveal concrete implications for choosing specific educational practices in higher education and in colleges of teacher education. (JMK)

Gustafson, Mary. Sorgman, Margo

The Degree of Satisfaction with Institutional Climate as Perceived by Female Students in Teacher Education: An Exploratory Study.

Pub Date—13 Oct 83

Note—17p.; Paper presented at the Annual Meeting of the Northern Rocky Mountain Educational Research Association (1st, Jackson Hole, WY, October 13-15, 1983).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Age Differences, *Assertiveness, College Environment, Comparative Analysis, Education Majors, *Females, Higher Education, Institutional Characteristics, Nontraditional Students, Preservice Teacher Education, *Religious Factors, *Student Attitudes, *Student Needs, Student Problems, Undergraduate Students

Identifiers—*Mormons

A study compared perceptions of institutional climate among four categories of female education students at the University of Utah: traditional age students (age 24 and under) who are Latter Day Saints (Mormons) or non-Latter Day Saints (non-LDS); and older students (age 25 and over) who are LDS or non-LDS. It was hypothesized that older students would have a different set of needs and concerns and would express a greater degree of dissatisfaction with the institutional climate and that the older non-LDS students would be more outspoken and assertive about institutional climate. Eighty undergraduate female students filled out questionnaires, and study results indicated that returning female students face barriers of financial hardships and conflicts about personal issues. Few students reported a concern about faculty role models or faculty who discriminate against them because of age or sex. Returning students, regardless of religious affiliation, indicated a significantly higher degree of dissatisfaction with institutional climate, as was predicted. Assertiveness was not a factor in limiting or predicting expression of dissatisfaction with institutional climate, and in contrast to the hypothesis, LDS students were more assertive, regardless of age. Based on study subject needs, 10 recommendations for institutional change at the University of Utah are offered. (JMK)

Emergency Teacher Certification.

American Association of Colleges for Teacher Education, Washington, D.C.

Pub Date—Feb 84

Note—65p.; Paper presented at the Annual Meeting of the American Association of Colleges for Teacher Education (36th, San Antonio, TX, February 1-4, 1984).

Pub Type—Speeches/Meeting Papers (150) — Reports — Evaluative (142) — Information Analyses (070)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Beginning Teachers, Credentials, *Educational Assessment, Educational Certificates, *Educational Quality, Higher Education, *Quality Control, School Districts, State Standards, *Teacher Certification, Teacher Education Programs, Teacher Effectiveness, Teacher Employment, *Teacher Qualifications, Teacher Supply and Demand

Identifiers—*Emergency Teacher Certification

This report analyzes information gathered by a task force, appointed by the American Association of Colleges for Teacher Education (AACTE), to investigate the current status of emergency or substandard certification measures used by state agencies and school districts. In an overview, the task force defines the role of teacher certification and chronicles briefly the historical evolution of teacher licensure and certification concepts. The second part of the report examines relevant research studies to document the empirical basis for the claim that fully certified teachers are more effective as teachers and more satisfied as professionals than those with substandard qualifications. The third part of the report identifies questionable practices which raise qualitative issues: (1) assigning certified personnel to teach out-of-field; (2) issuing emergency certificates to unqualified persons; and (3) seeking alternative routes to certification which weaken or eliminate pedagogical competency. A comparative analysis is made of temporary procedures used by other professions. Eleven recommendations are suggested as alternatives to granting emergency teaching certificates to unqualified personnel. Appendices include: (1) summary of professional organizations' positions on emergency certification; (2) questionnaires sent to state directors of teacher certification and state AACTE presidents; and (3) the

AACTE resolution on emergency certificates for teachers. (JD)

Upgrading Education Means Upgrading the Teacher Evaluation System: Merging Evaluation Information and Effective Teaching Research—An Inservice Approach.

Pub Date—84

Note—17p.; Paper presented at the Annual Meeting of the Association of Teacher Educators (64th, New Orleans, LA, January 28-February 1, 1984).

Pub Type—Speeches/Meeting Papers (150) — Reports — Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavioral Objectives, Classroom Observation Techniques, Elementary Secondary Education, *Evaluation Methods, Inservice Teacher Education, *Management Development, *Principals, *Research Utilization, *Teacher Effectiveness, *Teacher Evaluation

The drawbacks of the common practice of using check-lists for teacher evaluation include inadequate measurement that emphasizes evaluation only, lack of objective data gathering techniques, and lack of reliable and consistent teacher performance criteria. An inservice program for school principals was designed to improve their observation and evaluation skills and help them to become more effective educational leaders. The program was based on findings from effective teaching research studies which provided teacher performance criteria for the principals during their regularly scheduled observation periods in the classrooms. The intensive inservice program included: (1) information on effective schools and effective teaching practices; (2) information on effective evaluation practices, including goal setting techniques, conferencing, observation techniques, and report writing techniques; (3) information on faculty development resources; (4) observation and demonstration by an evaluation consultant model expert; (5) practice with feedback on the use of these skills on the job; and (6) practice with coaching each other as principals, assistants, and department heads worked together with the techniques during the year. A Challenge for the 21st Century: Teacher Educator as Researcher.

Pub Date—3 Feb 84

Note—12p.; Paper presented at the Annual Meeting of the American Association of Colleges for Teacher Education (36th, San Antonio, TX, February 1-4, 1984).

Pub Type—Speeches/Meeting Papers (150) — Reports — Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Classroom Research, *Educational Researchers, *Field Studies, Higher Education, Preservice Teacher Education, Research Methodology, Student Teacher Relationship, *Student Teacher Supervisors, Student Teaching, *Teacher Educators

Identifiers—Research Practice Relationship

Imbalances existing between theoretical and practical research and between experimental and naturalistic research can be corrected by teacher educators who conduct research on what they are already doing as part of their professional assignments. These educators are persons whose expertise typically includes several years in the classroom prior to their teacher education work in higher education; they are in a unique position relative to the issues of theory and practice. Reasons for looking to teacher educators to augment the level of research activity in classrooms are based on the opportunity to link research and practice, to study teaching as it naturally occurs, and to foster a healthy research attitude in the profession. A study in which a teacher educator researched the student teaching experience (while functioning as the subjects' university supervisor) demonstrates the feasibility of such research. Positive outcomes of this dual role included: (1) easier entry into the field setting and relationship building; (2) positive effects of the event and its participants; (3) negation of the "halo effect"; and (4) improved ability to carry out both the role of researcher and university supervisor. The Global Imperatives for an Education Paradigm Shift.

Pub Date—2 Feb 84

Note—38p; Paper presented at the Annual Meeting of the American Association of Colleges for Teacher Education (36th, San Antonio, TX, February 1-4, 1984).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141) — Opinion Papers (120)
EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Change Strategies, *Futures (of Society), *Global Approach, Higher Education, *Human Capital, *Human Services, Information Utilization, *International Relations, Social Attitudes, Teacher Education, Telecommunications

The future role of education is covered in a discussion concerning the shifting of the dominant social paradigm of the United States. It is noted that the paradigm is changing from one that requires social institutions to seek and develop human resources to maintain a position of competitive dominance, to an emerging view of world interdependence. An increasing demand for human services and information processing is predicted. The need for personnel who can communicate readily and effectively across national boundaries is seen as one which will produce a higher priority in education for language, data processing, and knowledge of and skills in human differences. It is also noted that the recognition of a new social paradigm, with a world view of interdependent nations and resources, will strongly affect the changes that need to be made in the education system. Among the changes discussed are the growth of a global information society and education beyond schooling through the human services professions. A structure is described for a college of interdependent human service professions which prepares personnel responsive to the interdependent world paradigm. (JD)

Benander, Donald H.

A "Conceptual" Middle School: Freeing the Program from the Building.

Pub Date—14 Jun 82

Note—8p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational Facilities Design, *Flexible Facilities, *Middle Schools, Program Development, *School Expansion, Secondary Education, Site Selection, *Space Utilization, *Student Adjustment, *Transitional Programs

The experiment of a "conceptual" middle school raised the possibility of separating the program from the building. The school district in which this innovation has been carried out consists of five elementary schools and one comprehensive high school which service a 400 square mile area. The district includes nine separate towns in western Massachusetts, isolated by steep Appalachian hills and narrow valleys. It is an area of severe winter weather and has a long history of intense local pride, inter-town rivalry, and poverty. Students leaving elementary school and entering high school were facing difficulties in adjusting to a strange new, sometimes rough environment, resulting in poor academic performance and misbehavior. A middle school program was developed that made use of a wing of the regional high school as well as some classrooms in each of the five elementary schools. It was conceived of as a network or bridge linking the six schools by means of a middle school program without an individual building. It was demonstrated to the elementary schools that their graduates were being warmly received, and to the high school that, with increasingly limited resources, students could be better prepared to make intelligent elective choices on entering the ninth grade, and were more able to handle specialized instruction. Descriptors—Anxiety, Class Activities, Computer Assisted Instruction, *Computer Literacy, Higher Education, *Learning Processes, *Peer Teaching,

*Sequential Learning, Teacher Attitudes, *Teacher Education, *Teaching Methods

A program, developed to train teachers to use the computer, is based on the belief that adults acquire computer literacy in the same way that children do: sequentially and with hands-on experience. Programming is taught first. Reliance is placed on peer teaching as well as teaching by a skilled instructor. The role of play is emphasized in learning computer language and techniques. Materials and introductory instruction are provided, and free exploration is encouraged, followed by instructions for extending the play, deepening it, or showing how to progress so that the learning becomes richer and more satisfying. The role of the instructor in this training method is to be available to answer questions, troubleshoot, provide small lessons for trainees ready for them, and support the learning in whatever way seems suitable. After the programming has begun to solidify in the teachers' minds, further aspects of technology are introduced to them. In addition to this program description, a discussion on experiences with teachers is presented by a computer instructor who collaborated in the development of the program. (JD)

Document Not Available from EDRS.

Descriptors—Case Studies, Class Organization, Classroom Environment, Classroom Research, *Classroom Techniques, *Class Size, Discipline, Grade 2, Grouping (Instructional Purposes), Primary Education, *Research Methodology, Student Behavior, *Teacher Attitudes, *Teaching Methods

A research study was conducted by two teams of researchers who investigated how class size influences teaching and learning. Four second grade teachers participated, two from a rural school in Virginia and two from an urban, inner-city school in California. To understand how the same teachers and students responded to different class size conditions, a design was used allowing the researchers to change class size in the middle of the school year. Part I of this report on the research study includes a chapter on methodology, describing in detail the approach to the study. In part II, a description is given of the school year in Virginia, beginning with a description of the school setting, continuing with a chapter about each of the classes, and concluding with a discussion of what changes took place in instructional methods and student reactions after the class size was changed. Part III presents this same sequence of chapters for the school in California. Part IV presents a synthesis and discussion of results from the two schools. Details are provided about the collection and analysis of data as a comparison of data across sites. Part V offers a discussion on the implications for conducting research for teaching and learning. A Pilot Study on the Congruency of Locus of Control and Field Dependence as Related to Self-Esteem and Academic Achievement.

Pub Date—1 Mar 84

Note—9p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Educationally Disadvantaged, *Individual Characteristics, Interpersonal Competence, *Locus of Control, Middle Schools, Research Methodology, Secondary Education, *Self Esteem, Socioeconomic Influences, *Student Attitudes

Identifiers—*Field Dependence Independence

A pilot study was conducted at two middle schools to investigate the relationship among student locus of control, field dependency, self-esteem, and achievement. A relationship between self-esteem and achievement has already been identified by research; another variable considered as a possible effect on a person's predisposition to achieve was locus of control—the degree to which an individual feels that reward follows from personal behavior

or endeavor, or that reward is controlled by outside forces. Field independence (extracting data from a field of information by personal cognition) or field dependence (viewing a field of information as a whole and applying it directly) were also considered as possible variables related to achievement. The Nowicki-Strickland locus of control scale for children; the Behavioral Academic Self-Esteem Rating Scale by Coopersmith and Gilbert; and the Group Embedded Figures Test by Olman, Raskin, and Witkin were administered to 33 students. This pilot study concentrated on the methodology, statistical processing, and testing instruments; the analysis of results and conclusions will form a basis for the primary investigation (currently in process) which is targeting remedial help for academically disadvantaged students. Descriptors—*Communication Research, Debate, *Discourse Analysis, *Discussion, *Information Utilization, *Persuasive Discourse, Rhetoric, Speech Communication

This paper considers discourse models of knowledge and use and social problem solving that revive the tradition of dialectical reasoning (the broader term) or rhetoric, i.e., the art of using language, in speaking or writing, to convince others that something is true, right, or better. Discourse models of knowledge use allow taking the context-bound, tentative nature of research knowledge, as well as the beliefs and purposes of clients and patrons, into consideration. Problems derive from a failure to meet such empirical preconditions (e.g., social organization of discourse), and from the fact that such empirical preconditions are pre-supposed concepts of knowledge with an egalitarian rather than an authoritative cast. Where people do not appeal to such standards, discourse may simply reinforce existing inequalities. Social reform and educational change depend in part on a rejection of the dialectical tradition insofar as it involves the language of persuasion rather than that of experiment. These problems are illustrated by looking at pre-suppositions and limitations of argument as a discourse model of knowledge use. In conclusion, argument is contrasted with conversation, and conversation itself is considered as a concept of education. (Author/JD)

tiveness, Teaching Experience, Teaching Methods

The concept of knowledge utilization and the nature of practical decisions are analyzed to investigate how research knowledge and effective teaching practice are related. It is argued that the personal commitments of teachers, common sense, and normative requirements can also be valid bases for action. The author points out that an over-reliance on research knowledge is unwarranted, for it is time-bound, theory-dependent, and selective. It is suggested that the question of knowledge use in teacher education and teaching can be addressed in its proper context, namely, the striving for practical wisdom. Practical decisions, however, are stated to have a necessary element of arbitrariness, and this arbitrariness that affects teaching practice calls for thought-observation, reflection, experiment, and revision. It is posited that the science of research is organized for the discipline of second thoughts and the quickening of new ones; it is concluded that the quest for knowledge utilization misreads the intelligence of research. The value of research knowledge to teachers and teacher educators, it is stated, lies primarily in the scientific ethos and in processes of inquiry, and only secondarily in the facts researchers lay claim to. Comparison was made of the results of three analyses of teacher judgments concerning the selection of curriculum materials for the teaching of writing in elementary school. Twenty-five male and female fourth and fifth grade teachers, with teaching experience ranging from 4 to 33 years, responded to questions on their judgments of the value of language arts activities (described by short statements of purpose and a listing of the steps involved in planning and conducting the activity). The intent of the study was to determine the validity of three types of research used in exploring the judgment process: (1) policy capturing analysis; (2) process tracing analysis; and (3) analysis of teachers' self-reports of their judgment processes. Among conclusions reached were the following: (1) Teachers as judges may have better insight into their own decision processes than researchers usually give them credit for. Closer attention should be paid to differences in language and level of detail offered by the various methods and to what kind of data is used to evaluate the validity of verbal reports. (2) Better models of the tasks in which judgment is being examined should be developed. (3) More should be known about how experience influences judgment. (4) Multi-method approaches will probably provide more accurate results. (JD)

Competing norms for justifying actions and decisions in teaching and their effects on the curriculum and teacher learning are discussed. Interpreting teaching as a moral action, this paper argues that a personal orientation (personal practice, feeling, or beliefs) removes teacher action and decisions from the realm of objective and professional criteria for judging appropriateness. Personal reasons carry little weight in considering the wisdom of teacher actions and decisions. In teaching, appropriate actions or decisions are tied to the public realm, constrained by both facts and collective norms. Role orientation can be defined as endorsing and using collective criteria or justifying teacher actions and decisions by reference to larger contexts—colleagues, curriculum, accountability, and teacher ideas of effective practice that recognize publicly accepted criteria. Excerpts from interviews with 20 elementary school teachers are analyzed to identify teacher orientations (personal versus role) and justifications (emphasis on the teacher, the student, or the curriculum). Studies are reviewed that show the problematic effects of a personal orientation in teaching on the curriculum and teacher learning. It is suggested that a personal orientation cuts teaching off from its moral roots, affecting both teacher and student learning adversely. (Author/JD)

Measuring Attitudes That Bias Teacher Observation.

Texas Univ., Austin. Research and Development Center for Teacher Education.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Report No.—RDCTE-TR-5068

Pub Date—30 Apr 79

Note—20p.

Pub Type—Reports—Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Attitude Measures, *Classroom Observation Techniques, *Evaluation Criteria, *Experimenter Characteristics, Interaction Process Analysis, *Research Methodology, Teacher Behavior, Teacher Effectiveness, Teacher Evaluation

It was hypothesized that individual differences in observer attitudes might affect the way observers code teacher behavior. A questionnaire assessing educational attitudes was given to 22 subjects who were trained on 3 classroom observation systems: the Flanders Interaction Analysis, the Classroom Observation Scales, and the Classroom Observation Record. Subjects viewed videotapes of eight teachers and then rated each teacher on a Post-Coding Questionnaire. The questionnaire requested responses on a seven-point scale to the following items: (1) How well did you like the teacher? (2) How well did the teacher present the subject matter? (3) How well did the teacher interact with the students? and (4) How well did the students interact with the teacher? Correlations with these four factors found for the attitude survey confirmed the study hypothesis. It is suggested that observers perceive an effective teacher via general impressions, and that codings indirectly indicate these perceptions. Tables and references are included. (JD)

Descriptors—*Classroom Observation Techniques, *Classroom Research, *Experimenter Characteristics, Interaction Process Analysis, Junior High Schools, Lesson Observation Criteria, Teamwork, *Training Methods, Writing Skills

One of the main advantages of the naturalistic approach to classroom research is that the observations are of natural phenomena, occurring in circumstances which the researcher ultimately hopes to generalize. Some problem areas are associated with this approach, however. Observers must obtain complete and accurate records of classroom activities and teacher and student behavior. They must also maintain objectivity in their narrative records. The difficulty also exists that the presence of the observer may intrude or interfere with normal classroom functioning. This paper presents some of the considerations made and techniques used to select and train observers for a major naturalistic classroom observation study, the Junior High Classroom Organization Study. Priorities used for selecting observers are described, including classroom experience, either as a teacher or observer, and writing skills. A description is given of the activities which were engaged in during the training week. It is reported that each of the three problem areas that are associated with naturalistic studies was dealt with and some success was achieved in ameliorating them. It is pointed out that it is necessary to choose observers carefully, train them extensively, and supervise them closely. (JD)

Descriptors—*Classroom Environment, *Classroom Techniques, Junior High Schools, Student Behavior, Student Responsibility, Student Teacher Relationship, *Teacher Behavior, *Teacher Characteristics, *Teacher Effectiveness, Time on Task

Identifiers—Junior High Classroom Organization Study

Year-long observations of 51 teachers in 11 junior high schools resulted in identification of 2 groups of teachers who were rated as either more or less effective in classroom management during the year. Subsequently, these groups were observed and comparisons were made of their behaviors and activities during the first three weeks of school. After examining narrative and observational data, several broad themes or clusters of variables emerged to differentiate the more and less effective managers. These areas included: (1) rules and procedures; (2) teacher monitoring of student compliance and following through with consequences; (3) establishment of a system of student responsibility or accountability for work; (4) skills for communicating information; and (5) skills in organizing instructional activities. This report presents an analysis of teacher behaviors for each group in each of these areas. Implications of the results for teacher education and research on teaching are discussed. Appended tables provide data on all of the variables measured and compared during the study. (JD)

Behavior, *Student Motivation, Student Responsibility, Teacher Behavior, Teaching Methods, Time on Task

This final report summarizes the purpose, procedures, and results of a study, initiated in 1980, which investigated the interrelationships among motivational variables related to 423 fourth through sixth grade students' sense of efficacy in the classroom, or classroom motivation. Sense of efficacy was initially defined as a student's perception of personal control over and responsibility for classroom learning experiences. This was construed as a dynamic process involving interactions among motivational and achievement characteristics of the learning environment. Measures of both personal characteristics and classroom characteristics were included. The study explored linkages among different motivational theories and conceptualized motivation as influenced both by person and situation characteristics. Study results are presented in three parts. First, results of analyses of interrelationships among student motivational and achievement variables are summarized. Second, the results of analyses of the classroom data set alone are presented, and third, findings regarding the relationships between student and classroom characteristics are listed. (Seventeen tables based on data analysis are included in the document.) (JD)

Descriptors—Academic Achievement, Basic Skills, Class Organization, *Classroom Techniques, *Inservice Teacher Education, *Peer Teaching, *Program Development, *School Cadres, Secondary Education, Secondary School Teachers, Staff Development, Student Improvement, Teacher Effectiveness, Teacher Workshops, *Time Management, *Time on Task

The Development and Demonstration project has trained interns to lead Effective Use of Time in-service workshops for secondary school teachers of basic reading and mathematical skills. These interns then returned to their home bases and trained teachers who could in turn train other teachers to use the Stallings Effective Use of Time methods. The Effective Use of Time/Staff Development Model was developed during a multi-phased study in secondary schools, and its goal was to help teachers learn to manage their classroom time effectively. This final report contains four sections. Section 1 outlines phase 1 and 2 of the development model, phase 3, "Training Teachers as Trainers," and phase 4, "Training Interns as Apprentices." Section 2 discusses the Effective Use of Time Intern Training Program. Section 3 describes project implementation at the four home sites: (1) West Virginia State Department of Education; (2) University of South Carolina; (3) Northern California Juvenile Court Schools; and (4) San Fernando Valley Federal Teachers Center. Appendices include: (1) letter to sponsoring agencies; (2) summary of workshops; (3) feedback letters to interns; and (4) site report from West Virginia State Department of Education. (JMK)

Descriptors—Class Organization, Classroom Techniques, Elementary Education, *Elementary School Students, Grade 1, Grade 5, *Socialization, *Student Attitudes, Student Behavior, *Student Role, *Student Teacher Relationship, Teacher Attitudes, Teacher Behavior, Teacher Effectiveness, *Teacher Influence, Teacher Role

This interdisciplinary study examined socialization of first and fifth grade elementary school children into the student role. The study focuses on the effects of teachers' socializing communication on children's views of norms for classroom life by means of observation and questionnaires. Data of several types are analyzed and interrelated: teacher communication about the content of student role; student perceptions of that role; the impact of structural variables like openness of classroom on both teacher talk and student thought; the impact of children's demographic characteristics on both; and the interrelationships between teacher talk and student thought. Three broad patterns emerge from these data: (1) Teachers play a managerial role and students respond in ways reminiscent of workers rather than learners; (2) Of demographic differences among children, grade level stands out as having dominant impact; and (3) Teacher communication has a differential impact upon the audience, and the meaning of teacher messages is not always clear without knowing the recipient. Study data are displayed on 19 charts, and a published version of the study, entitled *Teacher Talk and Student Thought: Socialization into the Student Role*, accompanies the report. (JMK)

Descriptors—Adjustment (to Environment), *Coping, *Individual Characteristics, Job Analysis, Peer Relationship, Psychological Patterns, *Social Support Groups, *Stress Management, *Stress Variables, Teacher Burnout, *Teaching (Occupation)

Identifiers—*Teacher Stress

An integrative review of literature on the causes and probable consequences of teacher stress is presented. The review is grounded on the assumptions that both positive and negative stress are an integral part of human experiences, varying across individuals, and can be best understood within the context of how individuals cope with it. Based on this review, the report moves to an analysis of the literature on stress in teaching, focusing on the work-related variables of student concerns and issues in administrative policy and practice. Literature on teacher stress is examined in relation to the broader body of literature on occupational stress in general. Emerging from the analysis as important issues are social support, role factors in the workplace, and person-environment fit. The consequences of stress are examined with reference to occupations in general and teaching in particular. Coping literature is analyzed, with particular reference to personal factors affecting coping. Personal resources and social support, particularly from co-workers, are reported as emerging as significant factors. The report concludes with observations and recommendations based on the analysis. Should Research on Teaching Be Generic or Specific?

Stanford Univ., Calif. Center for Educational Research (DHEW), Washington, D.C.

Pub Date—Sep 77

Contract—NE-C-00-3-0061

Note—35p.; Published by the Program on Teaching Effectiveness of the Center for Educational Research at Stanford.

Pub Type—Information Analyses (070) — Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Curriculum Research, Elementary Secondary Education, *Instruction, *Program Effectiveness, *Research Design, *Research Methodology, Research Utilization, Teaching Methods Research on teaching can be concerned with teaching in general or it can be conducted with a single kind of subject matter. Which kind of re-

search is more advantageous? This issue arises in the planning of programs of research on teaching. The generic approach looks for uniformities, concepts, and principles that apply across all or many subject matters. The curriculum-specific approach is based on the assumption that subject matter does make a difference in the kinds of teaching behavior, methods, strategies, styles, and skills that the investigator needs to be concerned with and in the kinds of results that will be found. The arguments concerning the generic-specific issue in research on teaching can be grouped into three categories, each of which are dealt with in this paper: (1) those dealing with the generality of learning and teaching processes; (2) those dealing with the problem of multiplicity; and (3) those dealing with conceptualizations of the pedagogical domain. After examining these three areas, this paper proposes that research should be concentrated in a relatively small number of conjunctions of grade-level, subject matter, and socioeconomic level, i.e., the research approach used should be specific rather than generic. Identifiers—*Systematic Teacher Training Model

This report proposes a design for teacher training, and for research and development in teaching and learning, that seeks to capitalize on the diversity and adaptivity of teaching and learning in the real world. Chapter I provides an overview of teacher education in the context of educational concerns at large. It discusses the processes of teaching and learning and the ways in which they interact with curriculum and student characteristics. Speculations are offered on the future of teacher education and research in teaching. Chapter II deals with research and development in teacher education in the 1960s. Various technological developments are considered—systems approaches, microteaching, protocol and training films, and flexible scheduling. Also discussed are humanistic reactions to performance-based teacher education. Chapter III considers the role of certain aspects of theory and method in teaching research. The final chapter, chapter IV, deals with the development and operation of a Systematic Teacher Training Model. (JD)

Identifiers—*Systematic Teacher Training Model

This report on a Systematic Teacher Training Model deals with the operation of a teacher education program in providing practice for preservice and inservice trainees. Chapter I describes major program components: (1) selection, diagnosis (of trainee's needs), and placement; (2) programmed or

nonprogrammed training and practice; (3) evaluation; (4) assignment and follow-up (or teacher critique); and (5) feedback to the trainee and the training system to serve as the basis for a new diagnosis. In chapter II, a discussion is presented on alternative kinds of practice, some dimensions along which they can be described, and some principles that may guide choices among these alternatives. A comprehensive list of teaching training material catalogs, developed from research studies, is included, as well as protocols available for improving teacher understanding of concepts and an overview of recent research on newer training methods. Chapter III offers a review of literature on the development and functions of teacher centers, with particular attention to kinds of guidelines and resources available to those interested in initiating or improving them. The final chapter, chapter IV, considers the future of "practice" in teacher education. (JD)

Descriptors—Adult Education, *Change Strategies, College Faculty, *Computer Literacy, *Delivery Systems, *Faculty Development, Higher Education, Individual Characteristics, Inservice Teacher Education, Learning Processes, *Program Development, *Teacher Educators

The Faculty Development in Computers Project (FDIC) at the University of Northern Iowa creates an on-going support structure for faculty involved in the process of incorporating computer technology into their personal and professional activities. Specifically, the FDIC facilitates development of broadly defined computer literacy among teacher educators through a differentiated delivery system model and correspondingly monitors faculty development through a change based mode. The FDIC Project is based on a synthesis of conceptualizations

of the change process, adult learning, and faculty development. The project model is organized along three dimensions. One dimension represents the individual level of concern about computer technology (awareness raising and information gathering; exploration and preparation; implementation; and collaboration and innovation). The second dimension represents major contexts in which a faculty member may apply computer technology (instructional, creative, management, or personal). The third dimension represents the various levels of organizational structures in which the FDIC interventions can be operationalized (individual, group, department, or college level). Also discussed in this report concerning FDIC are: (1) relationships among dimensions; (2) interventions: intentional and incidental; and (3) project evaluation. (JMK)

Descriptors—*Adolescents, *Child Welfare, Early Parenthood, Elementary Secondary Education, *Parent Child Relationship, *Parenthood Education, *Pregnancy, Pregnant Students, *Program Design, Social Change, Teacher Education, Youth Problems

There are many reasons for implementing a course in parenting education in the schools. Among them are: (1) In the past decade, premarital sex among teenage girls has risen from 30 to 50 percent; (2) One child of every five is born to teenage parents and 94 percent of these teenagers keep their babies; and (3) 90 percent of teenage mothers drop out of high school and nearly half never finish the eighth grade. In a recent survey of the status of parenting education, 29 states reported offering parenting education. Programs in parenting should deal with vocational and family life education, supportive family relationships, emotional needs, health and family planning, and the availability of social services and crises counseling. It is suggested that: (1) Colleges of education become more aware of problems facing a changing society and implement appropriate courses; (2) State boards of education, in conjunction with parent and teacher committees, develop Parenting Education curricula; (3) State boards of education establish minimum standards for teachers of parenting education classes; and (4) Public schools cooperate with other state agencies in dealing with parenting. An in-progress staff development program in a small, rural school district in South Carolina strives to make teaching and supervising more rewarding to the staff member while at the same time improving instruction for students in the schools. The program is the result of attempts by the school district to survive through staff development. With limited funds to institute change, the school district utilized consultants from a nearby college and university. Components of the 5-year program include needs assessment, planning, implementation, and evaluation. In anticipation of staff growth, the model moves from structured to less structured experiences and focuses on weaknesses identified by a variety of sources. One of the plan's major strengths is classroom follow-up. A self improvement plan is appended, and charts and figures are included in the text of the report. (JMK)

The American Square Dance—Part of Our National Heritage.

Pub Date—24 Mar 84

Note—11p.; Paper presented at the Health and Physical Education Teacher's Conference (Fredericksburg, VA, March 24, 1984).

Pub Type—Speeches/Meeting Papers (150) — Historical Materials (060)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Dance, *Dance Education, *Folk Culture, *United States History

Identifiers—*Square Dancing

The American Square Dance became the official National Folk Dance of America by an act of Congress in 1982. Although the square dance contains some elements similar to the New England Quadrille, the Kentucky Running Set is thought to be the true foundation for its movements and configurations. The Running Set has been traced back to the source of all English country dances, the May-Day Round, and to early pagan ceremonies. The Square Dance evolved in the Appalachians, which were settled by people from Northern England and the lowlands of Scotland. A history is given of the evolution of the American Square Dance. The contents of the Congressional designation of the Square Dance as the National Folk Dance of America is presented, and it is noted that this resolution is ample justification for inclusion of contemporary square dance in the school curriculum. Descriptors—Career Choice, *Individual Psychology, Interpersonal Relationship, *Leisure Time, Life Satisfaction, *Life Style, *Middle Aged Adults, Need Gratification, Quality of Life, *Re-entry Workers, Sex Differences, *Teaching (Occupation), Work Attitudes

This document identifies characteristics and patterns of characteristics of those who have leisure as a mid-life option. A comparison was made between individuals electing to pursue leisure and those electing to enter teaching at this life stage. Results of structured interviews, statistical results, and an analysis of a life satisfaction scale are given. In comparisons of teachers with those electing leisure, significant differences were observed in four categories: importance of religion, importance of television, importance of new experiences, and importance of sexual relationships. Leisure advocates' values were higher only in the television category. In the secondary comparisons (males/females), three significant differences were observed: importance of non-work activities, importance of literature, and importance of the outdoors. Males leaned toward the importance of the outdoors. The results of the life satisfaction scale found no significant differences in comparisons between teachers/leisure, males/females, female teachers/male teachers, and leisure females/leisure males. Descriptors—Computer Science, *Credits, Demography, *Educational Quality, English, *Graduation Requirements, *High Schools, Mathematics, Required Courses, Sciences, *Secondary School Curriculum, Second Languages, Social Studies, Socioeconomic Status, *Standards

Identifiers—*National Commission on Excellence in Education

An analysis of 12,000 1982 high school graduates' transcripts, as part of a study conducted by the National Center for Education Statistics, substantiates

the National Commission on Excellence in Education's (NCEE) concern about students' insufficient coursework in the new basics: English, mathematics, science, social studies, and computer science. An analysis of who earns how many credits in the new basics reveals substantial differences among subgroups defined by race/ethnicity, socioeconomic status, high school program, type of school attended, and geographical region. Analysis presented in this bulletin has three parts: (1) an examination of course distribution taken in the new basics, with a focus on number of additional credits needed by some students to meet NCEE standards; (2) a description of the number of credits earned by grade level; and (3) a comparison of credits earned among students with different backgrounds. Six tables and figures are included. (JMK)

Identifiers—Montclair State College NJ, *New Jersey (Newark)

Project THISTLE (Thinking Skills in Teaching and Learning) is designed to improve the basic skills of college bound urban students by working with their teachers in an integrated process of curriculum and staff development. The project's emphasis is on preparation of classroom teachers to strengthen creative, logical, and critical thinking abilities of their students, helping them to develop the interest, willingness, and ability to engage in intellectually active, constructive, and reflective encounters with ideas within the content areas. The project design involves participating teachers in three "phases" of staff/curriculum development over a period of three years or more. The three overlapping but sequential phases are: (1) graduate course work in curriculum development and basic skills instruction; (2) classroom implementation of individually prepared curriculum plans; and (3) extension activities depending upon individual personal and professional needs, strengths, and preferences. Project THISTLE was initially conceived by Montclair State College (New Jersey) faculty and planned as a cooperative higher education/local education agency venture involving the college and the Newark (New Jersey) public schools. At present, more than 100 teachers from 10 high schools and 3 elementary schools are actively engaged in Project THISTLE. (JMK)

Identifiers—California, *Debra P v Turlington,

Florida, *Fourteenth Amendment

Competency testing often refers to a system devised to assure successful performance on a specific test, in addition to other mandated criteria as a requisite to obtaining a high school diploma. Minimum competency testing is usually defined in one of two ways: as the acquisition of basic skills or as the demonstrated ability to apply basic skills to everyday life situations. The latter definition seems to be the most popular one. This paper examines major litigation that has occurred in the area of testing. Legal standards are explained and analyzed with reference to measurement principles. A discussion of future directions in which law and evaluation may move and strategies that educators might employ to better educate the legal profession about evaluation follows. A 22-item bibliography concludes the document. (JMK)

Descriptors—Administrator Role, Classroom Environment, *Cooperative Planning, *Educational Cooperation, Elementary Secondary Education, Grouping (Instructional Purposes), Learning Strategies, *Socialization, Student Responsibility, Teacher Effectiveness, *Teacher Role, *Teaching Methods

Identifiers—*Cooperative Learning

Cooperative learning processes have been rediscovered and are being used throughout the country on every level. The basic elements of cooperative goal structure are positive interdependence, individual accountability, face-to-face interaction, and cooperative skills. The teacher's role in structuring cooperative learning situations involves clearly specifying lesson objectives, placing students in productive learning groups and providing appropriate materials, clearly explaining the cooperative goal structure, monitoring students, and evaluating performance. For cooperative learning groups to be productive, students must be able to engage in the needed collaborative skills. Cooperative skills and academic skills can be taught simultaneously. The implementation of cooperative learning needs to be coupled with the implementation of collaborative professional support groups among educators. Both the success of implementation efforts and the quality of life within most schools depend on teachers and other staff members cooperating with each other. Support for the program takes as careful structuring and monitoring as does cooperative learning. (JD)

To a large extent the Southwest can be described as a rural area. Under these circumstances, programs for public understanding of technology become, first of all, exercises in logistics. In 1982, New Mexico State University introduced a program to inform teachers about computer technology. This program takes microcomputers into rural classrooms (via a van that travels throughout the state)

in order to introduce microcomputer technology and its potentials for educational programs to students and teachers. The program's organizational structures involves support from the International Space Center, the International Hall of Fame Foundation, New Mexico State University, and Texas Instruments Corporation. The van program cost for schools is \$150 per day. Objectives of the project encompass: (1) computer awareness; (2) computer literacy; and (3) hands-on machine time. The van project has been effective in improving university relations with public elementary and secondary schools. (JMK)

Competition vs. Recreation in the Early Development of Women's Basketball, 1891-1922.

Pub Date—3 Nov 83

Note—14p.; Paper presented at the Midyear Conference of the Special Interest Group: Research on Women in Education, American Educational Research Association (9th, Tempe, AZ, November 3, 1983).

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Basketball, *Competition, Higher Education, Physical Education, Program Development, *Recreational Activities, *Social Attitudes, Social Change, *Social History, Sociocultural Patterns, Student Attitudes, *Women's Athletics

In the late 19th century and the early 20th century, an era of narrowly circumscribed female roles, basketball created tension by expanding women's opportunities for competitive athletic activity. The characteristics which made it popular with women—spontaneity, freedom of movement, and vigorous team play—contradicted prevailing ideals of feminine behavior, which were understood to be demure, restrained, and passive. The response to women's basketball exemplifies the ambiguity of women's education in late 19th- and early 20th-century America, and the controversy continued throughout the first half of the 20th century. Basketball for girls and women has been called "the bane of four generations of collegiate educators." Educators, youth workers, towns, schools, colleges, and players themselves have promoted women's basketball for a variety of conflicting reasons. And, despite controversy, regulation, and rule modification, basketball has remained one of the most popular sports for women. The author, in discussing competition vs. recreation in the early development of women's basketball (1891-1922), concentrates on three topics: (1) the game's rapid acceptance as a collegiate and secondary school activity; (2) the phenomenon of rule modifications for female players; and (3) the effect of sex role ideology on the attitudes of physical educators. Descriptors—Dentistry, *Expenditures, Health Insurance, *Health Services, Hospitals, *Medical Services, Medicine, Nursing Homes, Optometry, State Norms

Identifiers—*Michigan

Data are presented describing expenditures for personal health services in Michigan from 1977 to 1981. The rapid growth in expenditures is illustrated, as well as the rates of growth in expenditures, for major categories of health services. Personal health expenditures are defined as payments for care directly provided to patients: specifically, hospital and nursing home services, physician and dental services, services provided by other professionals, drugs, eyeglasses and appliances, and other patient-care services. These expenditures are further defined by their being paid for by private health insurance programs, Medicare and Medicaid, and individual spending. Excluded from this report are expenditures for public and environmental health services, administration of health insurance programs, and health-related research and educational activities. Appendices include: (1)

methodology for estimating personal health expenditures; (2) definition and methodology used by health care financing administration to estimate state personal health expenditures; and (3) demographic and economic adjustments. (JD)

Descriptors—*Expenditures, Government Role, *Health Services, *Medical Services, *Public Health, Public Health Legislation, *Resource Allocation, *State Government, State Norms

Identifiers—*Michigan

This paper and the accompanying data describe health-related expenditures made by Michigan state government agencies from fiscal year 1978 through fiscal year 1984. Expenditures represented in the data include resources received from the federal government. (The data exclude certain expenditures which might be considered health-related, such as: state appropriations for medical, dental, nursing, and allied health education, school lunch and breakfast programs, and total state employee health insurance costs.) Information is provided on: (1) trends in Michigan's health expenditures; (2) expenditures by health category; (3) expenditures by government agency or department; and (4) fiscal year 1984 appropriations by health category. Tables in this section show each department's appropriation as a dollar amount, as a percentage of total state appropriations for the health category, as a percentage of the department's total health appropriation, and as a percentage of the total state government health appropriation. Each table is followed by a figure which represents the various state departments' participation in the health category. (JD)

Marty, Phillip J. McDermott, Robert J. The Effectiveness of Alternative Cancer Education Programs in Promoting Knowledge, Attitudes, and Self-Examination Behavior in a Population of College-Aged Men.

Pub Date—[83]

Note—14p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Attitude Change, *Cancer, *College Students, Health Education, Higher Education, Knowledge Level, *Males, Program Effectiveness, Student Attitudes, *Student Behavior

Identifiers—*Self Examinations (Physical), *Testicular Examination

A study determined whether changes in knowledge, selected attitudes, and self-examination behavior occurred among college-aged men after exposure to alternative cancer education programs. College-aged men ($n=128$) from two large health education classes at a mid-western university were randomly assigned to two treatment groups. The first group (control) received an educational program consisting of exposure to pamphlets addressing testicular cancer and testicular self-examination. The second group (experimental) received exposure to an educational program facilitated by an individual who had a history of testicular cancer. At the conclusion of each treatment, subjects responded to an inventory which assessed knowledge and attitudes toward cancer and toward self-examination procedures. Three months later, a questionnaire was sent to each participant requesting information about self-examination behavior subsequent to participation in the program. Conclusions of this study indicate that neither of the treatments is advantageous to the acquisition of knowledge; however, the use of a facilitator with a history of cancer in a cancer education program can influence selected attitudes and improve self-examination behavior. (Author/JMK)

Marty, Phillip J. McDermott, Robert J. Utility of Pamphlets in Promoting Knowledge and Positive Attitudes about Two Early Cancer Detection Procedures.

Pub Date—[83]

Note—16p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Attitude Change, *Cancer, *College Students, Health Education, Higher Education, *Instructional Systems, *Knowledge Level, *Pamphlets, Program Effectiveness, Student Attitudes, Teaching Methods

Identifiers—Breast Examination, *Self Examinations (Physical), Testicular Examination

Informational pamphlets about breast self-examination (BSE) and testicular self-examination (TSE) are widely distributed in health care settings, but the pamphlets' effectiveness in promoting knowledge and positive attitudes about these early cancer detection procedures is largely unknown. A study compared pamphlets with alternative methods of information delivery about BSE and TSE. Subjects were 219 females and 157 males enrolled in a health science course at a midwestern university. Female subjects were randomly assigned to BSE pamphlet, modeling, or modeling with guided practice groups. Male subjects were randomly assigned to TSE pamphlet group or to one of two alternative facilitator-conducted groups. Knowledge and attitudes about BSE and TSE were post-tested upon completion of the 60-minute programs. Groups did not differ with respect to knowledge about the respective early detection procedures, but more favorable responses in the facilitator-conducted programs did occur among groups in both BSE and TSE programs regarding selected attitudes. It was concluded that pamphlets may be the simplest, most cost-effective information delivery mode when knowledge gain is the sole educational program objective. However, attitudinal change may require that more person-oriented approaches be taken by health professionals in educational roles. (Author/JMK)

Descriptors—Classroom Environment, Classroom Research, *Classroom Techniques, Elementary Secondary Education, *Student Behavior, Student Teacher Relationship, Teacher Characteristics, *Teacher Effectiveness, *Teacher Response, *Teaching Skills, Teaching Styles

This seminar overview presents a summary of widely accepted findings by researchers on the qualities, behaviors, and characteristics of effective teachers. As defined in this paper, an effective teacher is one who can engage students in the learning processes, minimize disruptive behavior, and produce desired learning in a large number of students. In the first section, four generalizations about what teachers do as effective managers of student learners are discussed. These dimensions of classroom management include implementing a workable set of rules, structuring and monitoring activities to minimize disruptions, quick and consistent response to misbehavior, and responding to inappropriate behavior without denigrating the student involved. The second section presents eight dimensions of effective teaching, or management of student learning, including: (1) "knowing" students; (2) assigning appropriate tasks; (3) orienting students; (4) monitoring students; (5) relating teaching and testing; (6) involving students in learning; (7) providing continuity; and (8) correcting errors and misunderstandings. In the final section, a discussion is offered on the interrelationships among these dimensions and the complexity of implementing effective teacher behaviors. (JD)

Three researchers, addressing the problem of instructional improvement, identify sound research findings and cite problems associated with the transfer of these findings into classroom practice. Donald M. Medley, in "An Overview of Research on Classroom Teaching," identifies three variables which consistently differentiate between effective and ineffective teachers: learning environment, use of pupil time, and quality of instruction. Inconsistencies between these research findings, educational theory, and common sense are noted. In "Implications of Research for Adaptive Teacher Preparations," Robert S. Soar separates four domains of the learning environment—emotional climate, student behavior, learning tasks, and thinking processes. Soar's research indicates conflicts with accepted educational practice and theory. In "Using Feedback to Change Teacher Behavior," Frederick J. McDonald addresses the issues of transferring research results into practical applications. He asserts that it is the researchers' responsibility to develop a more simplified system for conceptualizing teacher performance, observing teacher behavior, and providing feedback to change teacher behavior. Several suggestions are offered to enhance the effectiveness of inservice training for teachers. (JD)

A study evaluated an adaptation of the Stallings Process of Teaching Reading in Secondary Schools in a large urban public school system. This inservice training program is designed to increase teachers' effective use of time. The program is composed of pre-training observations and resulting feedback on needed improvements in classroom behavior, workshops on effective classroom behaviors and strategies, and post-training observations. The evaluation focused on the impact of training on students' reading achievement involving all teachers trained and on math achievement for students whose math teachers were trained. Also investigated was the relationship between teacher level of implementation of selected classroom behavior variables and student achievement. The sample consisted of 16 trained and 13 untrained junior high school teachers and students from each of the teachers' classes ($N=613$). Teacher level of implementation was measured using the Secondary Observation Instrument. Student pre- and post-test performance was measured using the Comprehensive Tests of Basic Skills. Evaluation of program impact on students and of the relationship between level of implementation and student post-test achievement was carried out by analysis of covariance and the Spearman Rho, respectively. No significant effects were found on any analysis. Reasons for the lack of effects are discussed. (JD)

A study explored teacher responses to prevailing staff reduction criteria and procedures during a period of widespread layoffs. Questions asked by researchers included: (1) If performance evaluations are used, will teachers seek participation in staff employment and assessment decisions? and (2) Will teachers pressure administrators to apply seniority rather than performance criteria? The study investigated teacher preferences on these matters by following a sample of more than 80 schools in 16 Massachusetts school districts. Data were gathered from surveys and interviews with administrators and teachers, supplemented by district documents, local news reports, and personal observation of school board meetings. This paper is divided into three separate parts: (1) "Staff Reductions and Teacher Preferences for Participation in Personnel Decisions"; (2) "Colleague Evaluation and Staff Contract"; and (3) "Staffing Policies in Times of Retrenchment: Teacher Opinions." Appendices include sampling procedures, survey and interview procedures, and the teacher survey. (Author/JMK)

A report is given of an international colloquy which offered the opportunity for representatives of 11 European countries to exchange views and experiences on further education and self-education of teachers. Discussions centered around five areas: (1) the science of education as a means of raising the effectiveness of the educational process and as part of the initial and further education of teachers; (2) teachers as users of scientific educational information, and scientific information for the teacher, its specific character, sources, availability, communicability, currency, costliness, and other properties; (3) teachers' attitudes toward educational sciences—the fight against empiricism in the teaching practice and scientific control of instruction; (4) acquiring knowledge of educational sciences during the teacher education process and the possibility of purposeful control of this process; and (5) teachers as co-authors of educational knowledge, generalization of educational practice as a source for the development of educational sciences, and development of teachers' educational creativity. Included in the report are a list of participants, keynote and response papers, and final recommendations. (JD)

Identifiers—*Piaget (Jean), Piagetian Stages, *Piagetian Theory

In all of his published work, Jean Piaget never abandoned his original theoretical framework for the understanding of human development. This framework insists that intelligence is essentially a biological phenomenon; its development is best understood as the development of a sophisticated and highly successful adaptation device. This device enables human beings to organize and structure their experience according to concepts and ideas which eventually form the complex system of objective human knowledge. This book argues that the philosophical framework of Piaget's theory of intellectual development is not empirically testable, but rests on dubious metaphysical assumptions about the nature of the human mind and about the nature of knowledge and reality. It discusses the central features of Piaget's theory and relates them to central arguments from other thinkers, ranging from Kant and Wittgenstein, through Vygotsky, to Bruner and Gibson. These arguments concern the nature of knowledge, the relation between knowledge and reality, and alternative views on the nature and direction of human development. (JMK)

This book describes some of the research undertaken during the Teacher Education Project, a four and one-half year research and development project undertaken by the Universities of Nottingham, Leicester, and Exeter (Great Britain) and funded by the Department of Education and Science. This project involved observation of over 1,000 lessons and interviews with more than 200 experienced and novice teachers and attempted to answer questions about precisely what classroom skills trainee teachers need and about how a trainee's performance can be analyzed so that areas for improvement can be identified. The chapters in this book describe some of the empirical work undertaken in this large project. Chapters include: (1) "Teaching Skills" (E. C. Wragg); (2) "Class Management During Teaching Practice" (E. C. Wragg and P. A. Dooley); (3) "Teachers' First Encounters with their Classes" (E. C. Wragg and E. K. Wood); (4) "Pupil Appraisals of Teaching" (E. C. Wragg and E. K. Wood); (5) "Asking Questions" (G. A. Brown and R. Edmondson); (6) "Explaining and Explanations" (G. A. Brown and S. Armstrong); (7) "Classroom Organisation and Learning" (T. Kerry and M. K. Sands); (8) "Analysing the Cognitive Demand Made by Classroom Tasks in Mixed-ability Classes" (T. Kerry); (9) "The Nature of the New Teacher's Job" (M. B. Youngman); and (10) "Training Skilful Teachers: Some Implications for Practice" (E. C. Wragg). (JMK)

Descriptors—*Computer Assisted Instruction, Computer Literacy, *Computer Programs, *Education Courses, Higher Education, *Instructional Materials, *Introductory Courses, *Microcomputers, Preservice Teacher Education

A set of computer programs was developed to support instruction in an introduction to education course for prospective teachers. The programs provide teacher education students with examples of various uses of the microcomputer to support classroom instruction. The instructional programs represent three types: drill and practice, tutorial and dialogue, and information storage and retrieval. The "Teacher Classroom Management Strategies" pro-

gram was designed to give students practice in identifying teacher strategies that reinforce desirable classroom behavior or reduce the frequency of off-task behavior. The "Secondary Mainstreaming Materials Inventory" is a set of programs designed to store information on print and non-print materials that contain information relative to mainstreaming handicapped students. The "Quiz Maintenance Programs" were designed to store multiple choice or true-false items on a file, select items from that file to construct a test, and create a "Student Quiz Program" that presents selected items to the student, accepts the student answer, and stores the student name and number of correct choices. A copy of this program is appended, and step-by-step procedures are described for each of the programs. (JD)

Some techniques or strategies and principles of organization can make the teacher's task of modifying or writing curriculum materials easier. This monograph provides a step-by-step guide for writing curriculum materials, whether approaching the problem from scratch or modifying that which already exists. Chapter 1 provides the rationale, and chapter 2 discusses student learning levels, methods of instruction, and learning models. Chapters 3 and 4 describe techniques for developing units and single lessons within units. Specific topics include: behavioral objectives, readability formulas, and student evaluation. A publishing format is also provided. (JMK)

High School Senior Perceptions of Teaching as a

Career Opportunity.

Pub Date—30 Jan 84

Note—20p. Paper presented at the Annual Meeting of the Association of Teacher Educators (64th, New Orleans, LA, January 28-February 1, 1984).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Career Choice, High Schools, High School Seniors, Occupational Aspiration, Student Attitudes, Teacher Recruitment, Teacher Salaries, Teaching (Occupation), Teaching Conditions

This study sought to: (1) identify Southeastern high school senior perceptions of the teaching profession; (2) determine whether significant differences exist between groups categorized on the basis of sex and race; and (3) identify factors which significantly discriminate between students who are considering teaching and those who are not. The study consisted of 2,478 subjects representing 10 different Southeastern states. Subjects responded to a data gathering instrument devised to ascertain high school senior perceptions of the teaching profession. Study results showed that: (1) Salary, discipline problems, and working conditions were perceived by the majority of students as discouraging factors; (2) The limited number of high school seniors considering teaching as a career made that decision at an earlier age than previously thought; and (3) The factor that best discriminates whether students will consider teaching as a career is simply whether or not other individuals have discussed this possibility with them. Study implications are discussed, and seven tables and the survey questionnaire are appended. (JMK)

Identifiers—Independent Study in the Humanities Fellowship

The Independent Study in the Humanities Fellowship program for teachers of grades 9-12 has been sponsored since 1983 by the Council for Basic Education under a grant from the National Endowment for the Humanities. The program awards \$3,000 fellowships for summer study to outstanding teachers of English, foreign languages, history, and other humanities disciplines. These fellowships offer selected teachers eight weeks of concentrated independent study in subjects closely related to their teaching. The author offers 15 recommendations, based on his experience as a reviewer for the fellowships, for candidates submitting proposals. Among them are: (1) The entire proposal should be typed neatly and accurately; (2) The statement of purpose must be clear and precise; (3) Consider study projects of previous fellows; (4) Make sure the bibliography is well-researched; (5) Don't try to sell yourself as an expert in the study field; (6) Make sure the study topic is one that will help you with your present or future courses, but remember the fellowship may not be used solely for curriculum development; and (7) Make sure your project is feasible in an eight week period, and that it involves study. This volume is organized according to themes chosen for the 30th Annual World Assembly of the International Council on Education for Teaching (ICET). A keynote speech by Anne Flowers discussed "Teacher Education for the Twenty-First Century." The first theme, "The Redesign of Teacher Education," was discussed through presentations by Anne Flowers, Willard H. McGuire, and Russell Leskiw. Frank H. Klassen and Arnold Gallegos made presentations for the second theme, "Teacher Education and Global Perspectives." "Educational Planning for the Twenty-First Century," the third theme, included papers by Mavis Gilmour and David Johnston. M. Peter McPherson, Raul Allard, and Romeo Flores Caballero presented papers about "Meeting Basic Human Needs," the fourth theme. The fifth theme, "Educational Technology: Enhancing Quality and Access," was discussed through papers by Joost Yfi and Michael J. Butler, and William J. Grady. Each thematic section also includes abstracts of concurrent sessions. A paper by Paul H. Masoner and David J. Masoner, "Guidelines for the Redesign of Teacher Education," concludes the volume. (CJB)

Descriptors—Computer Assisted Instruction, Computer Literacy, Computer Managed Instruction, Computer Programs, Computers, Cost Effectiveness, Evaluation Criteria, Media Selection, Microcomputers, Program Development, Programming, Teacher Education

This book is directed to any educator who is interested in the use of the computer to improve classroom instruction. It is a book about the materials, human factors, and decision-making procedures that make up the instructional application of computers. This document's single goal is to promote educators' thoughtful selection and use of both computerized courseware and the devices needed to deliver it. Chapter 1 takes a brief glance backward at the origins of computers in the classroom. Chapter 2 provides an overview of several instructional aspects that computers present to the educator, and chapter 4 turns to the critical issue of locating and evaluating computerized instructional materials. Chapters 3 and 5 through 12 further examine the characteristics, potential, current limitations, and components of each of several types of instructional computer programs. These chapters seek to make the educator a learned critic of computerized software. In the final chapters, the focus of the discourse moves from the presentation of information to the making of decisions. Chapter 13 seeks to engage educators in exercising their newly acquired in-depth awareness of computerized courseware. Chapter 14 discusses purchasing decisions. (JMK)

Academic Learning Time in the District of Colum-

bia Public Schools.

District of Columbia Public Schools, Washington,

D.C. Research Information Center.

Pub Date—Sep 83

Note—134p. Papers presented at the Annual Meeting of the American Educational Research Association (Montreal, Canada, April 1983).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Academic Achievement, Change Agents, Classroom Techniques, Elementary Secondary Education, Program Evaluation, Program Implementation, Teacher Behavior, Teacher Effectiveness, Teaching Methods, Time Factors (Learning), Time on Task

Identifiers—District of Columbia

Papers generated for a symposium entitled "Effectiveness of Stallings' Use of Time Training for Teachers in Washington, D.C." are presented. The initial presentation, "Academic Learning Time: The Current Status of the Stallings Training" (Geraldine Williams Bethune), reviews the Stallings research and describes the Academic Learning Time (ALT) program in the District of Columbia. In the paper, "The Complexity of Institutionalizing a Program: Acquisition of Training, Observing, and Computing Capability," Merle M. Bush provides information on logistics, budget, personnel, time frames, and other requirements for implementing a program of this scope and depth. The report "Does Time-on-Task Work for Teacher Training Too?" (Sarah Lee Anderson), discusses findings from observations made of teacher training workshops. Carolyn A. Thieme-Busch and Sukai Elie Prom describe their findings in "Impact of Teacher Use of Time Training on Student Achievement." A brief critique of the Montreal Symposium, by H. Jerome Freiberg, concludes the presentations. (JD)

Descriptors—Black Students, *College Entrance Examinations, Factor Structure, Graduate Study, Higher Education, Item Analysis, Psychometrics, *Racial Differences, Scores, Statistical Analysis, *Test Bias, Test Items, *Test Validity, White Students

Identifiers—Confirmatory Factor Analysis, *Graduate Record Examinations

The study evaluated the invariance of the construct validity and thus the interpretation of Graduate Record Examinations (GRE) Aptitude Test scores. A systematic procedure for investigation of test bias from a construct validity frame of reference was developed and applied. Invariant construct validity was defined as similar patterns of loadings and equal units of measurement across four populations, as well as equal test score precision as defined by the standard error of measurement. The advantage of investigating psychometric bias at the item type level was to restrict use of a biased item type. The study also evaluated the factor structure of the subtests—Verbal, Quantitative, and Analytical. The subpopulations in the study were black and white males, and black and white females. The results indicated the item type factors appeared to be measuring the same things in the same units with the same precision. There was no significant evidence of psychometric bias. The factorial contributions of the Analytical item types were investigated. Analysis results indicated that the three Analytical item types appeared to be varying functions of reading comprehension and quantitative ability. (DWH)

Test Equating: Relevant Issues and a Review of Recent Research.

Pub Date—Mar 82

Note—62p.; Paper presented at the Annual Meeting of the American Educational Research Association (65th, Los Angeles, CA, April 13-17, 1981).

Pub Type—Speeches/Meeting Papers (150) — Information Analyses (070)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Educational Research, *Equated Scores, *Latent Trait Theory, Literature Reviews, Standardized Tests, Tables (Data), Test Construction, *Testing, Testing Problems

Identifiers—One Parameter Model, *Rasch Model, *Three Parameter Model

Equating studies using item response theory (IRT) are reviewed. The most well-known papers, as well as a sampling of lesser-known studies, are included. Accompanying tables list the papers and classify them according to the test used, models used, test length and type, sample size and type, method of assessment, equating design, and kinds of comparisons made. A majority of the equating research has focused on the Rasch, or one parameter logistic, model. Initial studies using the Rasch model investigated the invariance properties of the model: person-free item calibration and item-free person measurement. With tests of similar difficulty and samples of comparable ability, the research suggests that Rasch horizontal equating provides reasonable results. Research on other IRT models has focused on comparing different strategies using the same data set. With regard to vertical equating, most of the research has demonstrated the superiority of the three-parameter model over the Rasch model. Additional equating studies using Monte Carlo methods are reviewed. Finally, four issues relevant to test equating are discussed: assessing the adequacy of equating, sources of equating error, multidimensionality, and out-of-level testing. (PN)

Descriptors—Data Collection, Educational Objectives, Essay Tests, Ethical Instruction, *Evaluation Methods, *Moral Values, Objective Tests, Observation, Program Descriptions, *Program Evaluation, Quasiexperimental Design, Research Design, Research Problems, Secondary Education, Test Reliability, Test Validity, *Values Education

This handbook has been prepared to address one specific problem: How can the techniques of program evaluation be effectively applied to produce useful information about the operations and impact of moral education programs in secondary schools? The handbook is divided into five chapters. The introductory chapter describes the background and methods of the project which led to the handbook, discusses the major forms and functions of evaluation, and reviews the multiple purposes of program evaluations. Chapter 2 discusses the nature of moral education and presents various types of programs. Chapter 3 offers guidelines for designing evaluations of moral education programs. Chapter 4 then takes up the complex issues of specifying goals for moral education programs and identifying indicators of goal attainment. Chapter 5 addresses questions of data analysis. Following some final comments on the question of whether a school should introduce a moral education program, the volume concludes with several appendices: brief descriptions of four prototypes of moral education programs, a 20-page annotated bibliography of relevant literature, and additional sources of information concerning the development and evaluation of moral education programs. Descriptors—Cognitive Tests, Language Tests, Maturity Tests, Preschool Education, *Preschool Tests, Psychomotor Skills, School Readiness Tests, Screening Tests, *Test Norms, *Test Reliability, *Test Reviews, Test Selection, *Test Validity

This document reviews 49 assessment measures that were designed for, or could be used with, pre-school children between the ages of three and five. The assessments have been classified into the following categories: (1) cognitive skills, (2) language, (3) social adjustment and behavior, (4) physical skills, (5) developmental and clinical measures, (6) general tests and assessments, and (7) miscellaneous. Descriptions, reliability, validity, norms, and comments are presented for each test reviewed. Priority has been given to British measures, and to those measures which are accessible. Also included is a list of other sources of information about tests and assessments for young children, as well as a list of test publishers' names and addresses. (PN)

Survey of Academic Writing Tasks Required of Graduate and Undergraduate Foreign Students.

Educational Testing Service, Princeton, N.J.

Report No.—ETS-RR-83-18; TOEFL-RR-15

Pub Date—Sep 83

Note—114p.

Available from—Educational Testing Service, Research Publication, Room 226, Princeton, NJ 08541.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—Admission Criteria, *College Faculty, *Communicative Competence (Languages), *Foreign Students, Graduate Students, *Grammatical Acceptability, Higher Education, *School Surveys, Undergraduate Students, Writing Evaluation, *Writing Skills

Designed to define the academic writing skills required of beginning undergraduate and graduate

students, a survey of needed academic writing skills was completed by faculty in 190 academic departments at 34 American and Canadian universities with high foreign student enrollments. At the graduate level, six academic disciplines with relatively high numbers of non-native students were surveyed: business management, civil and electrical engineering, psychology, chemistry, and computer science. Undergraduate English departments were chosen to document the skills needed by undergraduate students. The faculty members surveyed appear to view the written communicative competencies of their students predominantly from the perspective of sociolinguistic competence, placing considerably less emphasis on grammatical competence. Although some important common elements among the different departments were reported, the survey data distinctly indicate that different disciplines do not uniformly agree on the writing task demands and on a single preferred mode of discourse for evaluating entering undergraduate and graduate students. Evaluation: A Proposal for Purpose and Use.

Pub Date—[83]

Note—11p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Change Strategies, Evaluation Methods, Evaluation Needs, *Evaluation Utilization, Evaluators, *Formative Evaluation, Program Administration, *Program Evaluation

This paper proposes a humanistic approach that may not be evaluation as commonly regarded, but it does have a much greater chance to enact program improvement. It assumes that program developers and directors really want their activities to be effective and relevant. The role of the evaluator is that of facilitator, that of a linking pin to transfer understanding rather than accountability, and that of a teacher and resource of analytic expertise. The evaluator must relinquish the role of judge. The relationship between the evaluator and the practitioner needs to be one of active cooperation. In considering this approach, evaluators need to ask themselves which outcome is most important: is it preferable to have a report, to have particular actions taken, or is it enough to have a system of evaluation accepted that increases awareness and innovation? Descriptors—Classroom Observation Techniques,

Elementary Secondary Education, Measurement Techniques, Performance Tests, *Staff Development, *Teacher Certification, Teacher Education, Teacher Effectiveness, *Teacher Evaluation, *Time Management

Teachers' knowledge of effective use of time research can be examined via a paper/pencil test; however, the degree to which teachers used the identified effective practices can only be observed and recorded. What is proposed here is an objective observation of teaching practices. Based upon research findings, criterion levels would be established for the percent of time particular activities or interactions should occur. For example, one study indicated that effective teachers spend 15 percent of their time on organizing/management activities, 50 percent on interactive on-task activities, and 35 percent on non-interactive on-task activities. After an observation, teachers would receive specific recommendations regarding behaviors to be increased or decreased. They would be provided assistance in changing these behaviors. The test would be a post-observation to see whether teachers' behaviors met the criteria for effective use of time after a period of time in which to practice in the classroom. This type of program has been implemented on a large scale. The model it provides has implications for teacher education and certification. (BW)

Improving the Predictive Validity of the Draw-A-Man Test as a Screening Device for School Readiness.

Pub Date—[82]

Note—25p.; A preliminary report of these findings was presented at the Annual Meeting of the Canadian Psychological Association (43rd, Montreal, Quebec, June 1982). Financial support for this investigation was provided by a grant from the Faculty of Social Sciences, University of Western Ontario.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Handicap Identification, *High Risk Students, *Kindergarten Children, *Predictive Validity, Primary Education, Scores, *Screening Tests, *Test Interpretation

Identifiers—*Draw A Man Test

An item analysis of Harris' scoring system for the Goodenough-Harris Draw-A-Man Test was conducted by comparing sets of protocols obtained in the early fall of kindergarten from children whose overall in-class academic performance placed them either in an at-risk category (N=21) or at the top of their class (N=38) by the end of the school year. The outcome showed that three items in Harris' system (item #9 - nose; item #30 - arm; item #46 - trunk) differentiated these two extreme groups and that by confining the scoring of additional protocols of the Draw-A-Man Test to these three items alone, an improvement over Harris' 73-item scale in predicting school achievement was obtained. However, since further evidence indicated that these three key items lose their predictive potential by the end of the kindergarten, it is strongly recommended that the use of this greatly abbreviated scoring system be limited to drawings made near the start of the kindergarten year. The Effect of a Change in Item Sequence Order on Performance in a Test, Re-Test Experiment.

Pub Date—[82]

Note—9p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Higher Education, Objective Tests, *Performance Factors, Scores, *Test Format, *Testing Problems, Test Results

Identifiers—*Item Position (Tests), Standard Deviation

This study utilized a test, re-test procedure to investigate what effects a change in the order, or sequence, of test items would have on student performance. College juniors (n=102) were given a

50-item multiple-choice and matching item test on the general subject of educational measurement. The items had no particular sequence, but had simply been taken at random from an item bank on the subject. Two weeks later the same students were retested; alternate rows of students received the experimental version, which differed from the original only in item sequence. It was expected that a learning effect would be present, resulting in higher scores and smaller standard deviations on the re-test. Results only partially aligned with expected results. While mean performance was higher on the re-test results, standard deviation did not follow expected results. This study concludes that the sequencing of items in a test is a factor which may be more complex than previously thought and needs careful study and consideration by teachers and test makers. Choice of Variables and Gender Differentiated Prediction within Selected Academic Programs. Research Report #105.

Iowa Univ., Iowa City. Evaluation and Examination Service.

Pub Date—10 Nov 83

Note—34p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, *College Entrance Examinations, Grade Point Average, Higher Education, *Mathematical Models, *Predictive Measurement, *Predictor Variables, Scores, *Sex Differences, Sex Discrimination, Test Bias

Identifiers—American College Testing Program, *Johnson Neyman Technique

The existence of differential prediction of two-year grade point average is reported for gender groups within programs of study at the University of Iowa. Academic records of all freshmen entering the University in 1978 in the fields of Business, Liberal Arts, Pre-Medicine, and those undecided as to major were analyzed with respect to American College Testing (ACT) Program Composite score and the ACT Mathematics Usage, English Usage, Social Studies Reading, and Natural Science Reading subtest scores, using a two-year cumulative grade point average as the criterion of academic success. Johnson-Neyman analyses indicate regions on the predictor score scales where differential prediction has practical impact within each program. A large portion of students is generally affected. A methodology is outlined for finding a prediction algorithm to reduce differential prediction while maintaining prediction potency. (Author/BW)

Review for Perceived Bias on ASVAB Forms 11, 12, and 13.

Educational Testing Service, Princeton, N.J.

Report No.—ETS-RM-83-4

Pub Date—Dec 83

Note—18p.

Available from—Educational Testing Service, Research Publications, R-116, Princeton, NJ 08541.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Aptitude Tests, Attitudes, *Military Personnel, Opinions, *Test Bias, Testing Problems, Test Items, *Vocational Aptitude

Identifiers—*Armed Services Vocational Aptitude Battery

The project reported here consisted of a sensitivity review of the items of Forms 11, 12, and 13 of the Armed Services Vocational Aptitude Battery (ASVAB). Because administration of this battery is a required step in the accession process, it should be free from perceived bias or offensiveness that could detract from the measurement process. In the percent study, two types of sensitivity reviews were conducted: one by Educational Testing Service (ETS) sensitivity reviewers and one by inductees during their first few days of Basic Training. This report summarizes the procedures and general results. In order to avoid compromising test security, specific item content is not reported here. Instead, examples and analogies are used to convey the kinds of responses encountered. (BW)

Assessment Instruments for Identification of Young Children with Behavioral Disabilities.

Pub Date—3 Jan 84

Note—55p.

Pub Type—Reference Materials - Bibliographies (131) - Reports - Evaluative (142)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Behavior Disorders, *Behavior Rating Scales, Check Lists, *Handicap Identification, Interviews, Measurement Techniques, Preschool Education, Test Reviews, *Tests, *Young Children

This paper is a discussion of the assessment instruments available for identification of young children with behavioral disorders. Behavioral disorders are defined and the problems encountered in the identification of such disorders among preschool aged children are discussed. A selection of assessment instruments including nine different developmental inventories, eight formal tests, and eight rating scales are examined. The use of both formal and informal observation and structured and unstructured interview techniques are presented. This paper concludes with a discussion of current practices in the utilization of assessment instruments in East-Central Iowa and recommendations for future utilization. Copies of the observation checklist and preschool parent interview forms used at Jane Boyd Community House, Cedar Rapids, Iowa, are appended. (Author/PN)

Computer Programs for the Semantic Differential: Further Modifications.

Pub Date—[84]

Note—85p.; For related documents, see ED 163 033 and ED 187 759.

Pub Type

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Adjectives, Attitude Measures, *Computer Programs, Models, *Semantic Differential, *Statistical Analysis, Statistical Significance, Test Interpretation

Identifiers—FORTRAN Programming Language

The original nine programs for semantic differential analysis have been condensed into three programs which have been further refined and augmented. They yield: (1) means, standard deviations, and standard errors for each subscale on each concept; (2) Evaluation, Potency, and Activity (EPA) means, standard deviations, and standard errors; (3) Osgood D values for all concepts; (4) the correlation of distance measures obtained with EPA scores with D values; and (5) tests of significance of D values with key reference concepts. The additional programming provides a converted standard score for each concept and tests of significance for D values on each concept. There are four new programs, providing semantic differential scale packets ready for use of respondents; a three-dimensional plot of how the concepts position themselves, based upon the EPA scores; t-tests between the means of two samples on E, P, and A scores; and correlations between scores on each concept with two samples. All but one of the programs are written in standard FORTRAN 77 for use on a Burroughs 6800. The remaining program, also written for use on a Burroughs 6800, is a FORTRAN IV program with a COBOL sort routine bound into it. (BW)

Descriptors—*Educational Assessment, Elementary Secondary Education, Models, Program Descriptions, *Program Effectiveness, Program Implementation, *School Districts, Test Construction, Testing, *Testing Programs, *Test Use

Identifiers—*Dallas Independent School District TX

The Dallas Independent School District (DISD) is rapidly progressing from the position of having an assessment program that does not work to the position of having an assessment program that does work. The perception that assessment is separate from instruction has changed to a view of assessment as part of a four-stage model including planning, instruction, assessment, and accountability. Some overt changes have occurred: (1) the measure-

ment instruments which make up the testing program have changed; (2) the administrative structure into which assessment data are fed has been reorganized; (3) the relationship between the Departments of Research and Evaluation and Curriculum and Instruction has substantially changed; and (4) public expectations relative to improving student achievement have increased. The governing principles of the DISD four-stage learning system are: as much control as possible should reside within the local building; flexibility and change must be allowed; and limited obtrusiveness is necessary for ease of implementation. (A description of the test development activities for survey and classroom tests is appended). (BW)

Efron's Bootstrap with Some Applications in Psychology.

Pub Date—Aug 83

Note—8p.; Paper presented at the Annual Meeting of the American Psychological Association (91st, Anaheim, CA, August 26-30, 1983).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Analysis of Variance, Error of Measurement, *Estimation (Mathematics), *Hypothesis Testing, Regression (Statistics), Research Methodology, Sampling, *Statistical Analysis, *Statistical Distributions

Identifiers—Efron (Bradley), *Efrons Bootstrap, General Linear Model, *Inference (Statistical), Repeated Measures Design

The wide availability of large amounts of inexpensive computing power has encouraged statisticians to explore many approaches to a basis for inference. This paper presents one such "computer-intensive" approach: the bootstrap of Bradley Efron. This methodology fits between the cases where it is assumed that the form of the distribution is known and cases where the sample provides no information about the form of the population distribution. A series of samples are drawn, randomly and with replacement. From each sample, the value of a parameter is estimated. The bootstrap conjecture is that the sampling distribution of the statistic being studied and sampling distribution found from this iterative process are essentially identical for a wide variety of statistics. Some areas of application for this approach include regression and fixed effects analysis of variance, the median general linear model, the repeated measures design, and errors of measurement. (BW)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Behavior Rating Scales, *Competency Based Teacher Education, Elementary Secondary Education, Feedback, Inquiry, Preservice Teacher Education, Student Behavior, Teacher Behavior, *Teacher Evaluation, Teacher Improvement, *Teaching Skills

Identifiers—*Inquiry Teaching Competency Assessment

This monograph presents an assessment instrument that utilizes teacher and student behavioral indicators to assess the quality of inquiry instruction. The instrument provides teachers with feedback which not only assesses the presence of critical teaching skills, but also serves as a valuable training aid for helping them perceive how their own behaviors and responses could be modified to more effectively facilitate student learning. It is equally useful as a training aid for preservice or in-service teacher training, in laboratory or classroom settings. The Inquiry Teaching Competency Assessment (ITCA) is being used in the Weber State College performance based teacher education program, where validation studies are being conducted to evaluate its effectiveness in improving teacher inquiry instruction. Concrete Operations as "Natural" Thinking.

Pub Date—15 Oct 83

Note—9p.; Paper presented at the Annual Meeting of the Northern Rocky Mountain Educational Research Association (1st, Jackson, WY, October 13-15, 1983).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cognitive Processes, *Developmental Stages, Elementary Secondary Education, Intuition, Logical Thinking, Neurological Organization, *Theories

Identifiers—Concrete Operations, Formal Operations, *Piagetian Theory, *Proter Theory

Proter Theory is a theory of learning which has been proposed by Leslie A. Hart (1975). The theory is based on the functions of the brain. Learning is seen as the formation of programs, which are simply sequences of instructions by which the brain directs the muscles, sense organs, or other portions of the neurological system. Programs which are related are organized into structures called prosters. The theory also identifies two types of thinking: SSM (symbol selection and manipulation) thinking which is conscious and step-by-step, and PAC (perception, analysis, choice) thinking which is intuitive or "natural." There may be some relationship between the PAC/SSM distinction and the distinction of concrete operational thought from formal operational thought in Piagetian theory. This relationship and its educational implications are discussed. (BW)

Identifiers—Confirmatory Factor Analysis, *Life Satisfaction Index A

This research aims to clarify the dimensionality of the Life Satisfaction Index A (LSIA). A multiple indicator structural equation model, which includes eleven items loading on three first-order factors and one second-order factor, is proposed to delineate the structure of LSIA. This model was empirically examined by using data from the 1974 NCOA-Harris survey, "Myths and Realities of Aging in America." The proposed model was supported and consistently replicated across four randomly divided subsamples. (Author)

Graphs in Scientific Publications.

Pub Date—[83]

Note—19p.

Pub Type—Opinion Papers (120) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Computer Programs, *Graphs, Guidelines, Research Tools, *Scholarly Journals, Scientific Research, *Surveys, *Use Studies

Identifiers—Science (Journal)

Two surveys were carried out to help increase knowledge of current graph usage in science. A detailed analysis of all graphs in one volume of the journal "Science" revealed that 30 percent had errors. Graphs are used more in some disciplines than in others; a survey of 57 journals revealed natural science journals use far more graphs than mathematical or social science journals. Usage studies such as these provide important information for developing four other areas: new graphical methods for data presentation, guidelines, software, and human graphical perception. (A brief appendix contains guidelines for graphs as they pertain to journals and to authors.) (Author/PN)

Descriptors—Cognitive Style, *College Students, Discussion (Teaching Technique), Educational Games, Higher Education, Learning Strategies, Lecture Method, Measurement Techniques, Peer Teaching, Programmed Instruction, *Questionnaires, *Student Attitudes, *Teaching Methods

Identifiers—*Learning Styles Inventory

The purpose of this study was to determine whether existing instrumentation is capable of identifying learning style differences within and among college students. Focusing upon methodology, rather than processing, the Renzulli/Smith Learning Style Inventory (RSLI) was administered to 115 sophomores and juniors. The RSLI was developed to assess the preferences of children for nine teaching methods: projects, simulations, drill and recitation, peer teaching, discussion, teaching games, independent study, programmed instruction, and lecture. It was previously validated with seventh- and eighth-grade students. The majority of the college students in this study showed high preferences for peer teaching, discussion, teaching games, programmed instruction, and lecture. Females tended to prefer teaching games and programmed instruction more than males. More average students preferred discussion than high-achieving students. More students from large schools preferred discussion than students from small schools. Areas for further research are outlined. (BW)

Descriptors—Estimation (Mathematics), Evaluation, Mathematical Models, *Measurement Techniques, *Research Methodology, *Testing, Testing Problems, Testing Programs, *Timed Tests

Identifiers—Biserial Correlation, *Speededness (Tests)

To evaluate test speededness and to derive implications for test program activity, this study reviewed the literature on speed and power, identifying four major approaches to the assessment of speed: the Gulliksen approach, the Cronbach and Warrington approach, the Stafford approach, and the approach of the Educational Testing Service (ETS) as described by Swineford. Two new models were formulated: the Reilly-Donlon approach and the biserial methods. These new methods provide correlations that are analogous to those of Cronbach and Warrington but derivable from a single, conventional administration of a test. The new methods depend centrally on the assumption of normality in the rates of work. Evidence from ETS program files in connection with this hypothesis was evaluated. Methods for estimating the parameters of the distribution of rates of work by graphic methods and the use of normal probability paper were studied. Extensions of these methods to two practical problems were explored: (1) The estimation of time available for review as an ancillary consequence of test speededness and (2) the estimation of the time demands of individual passages and items. The potential implications of omissions for the evaluation of test speededness were demonstrated. (Author/PN)

The development of an evaluation schema for school personnel must be based on the following stipulations: time, adequate financing, and external validation of techniques and methodologies. In planning an evaluation program, three questions dominate the scene throughout the literature. First, what shall be evaluated? Possible variables which can be evaluated include teacher background and organizational skills, communication ability, classroom product in the form of student achievement, ability to instigate meaningful and focused work in the classroom, and use of those effective components which reinforce teaching effectiveness. In the light of present knowledge, the evaluator should resort to a holistic method, rather than dissecting these variables into small components. Second, how and when can these variables be evaluated? The first phase of teacher evaluation must occur before entry into the profession. The evaluation of professional teachers should include the establishment of objectives, the choice of methods for assessing objectives, and the adaptation of evaluation time frames. Third, who should evaluate teachers? Some possibilities include school administrators, other teachers, the teacher being evaluated (self-evaluation), and students and parents. Further recommendations for evaluation planning are made. (BW)

Descriptors—Achievement Gains, *Guessing (Tests), Higher Education, Junior High Schools, *Scores, Standardized Tests, Teacher Made Tests, *Test Coaching, *Test Wiseness

This paper focuses on Smith's (1982) concept of test-wiseness strategies, describing several approaches that may maximize guessing on multiple-choice exams. Several previous studies indicated that the average level of performance increased when guessing was encouraged and decreased with instructions advising against guessing. Several studies were conducted to determine if test-wiseness can be taught. In each study, the test-wiseness training presented methods for using logical reasoning procedures in order to maximize guessing. In the first study, college students were administered the questions only from a standardized reading comprehension test (the reading selections were omitted). In the second study, in-class, teacher-made tests were used to measure change. In the third study, middle school social studies students were administered teacher-made tests. There were no strong effects in any of the studies. Factors affecting these outcomes are discussed. (BW)

Degrees, *Performance Factors, *Predictive Measurement, *Psychologists, *Scores
 Identifiers—*Graduate Record Examinations, *Scholastic Aptitude Test

This exploratory study is concerned with identifying several measures of career attainment for psychologists and with relating these measures to Scholastic Aptitude Test (SAT) and Graduate Record Examination (GRE) scores and to other relevant characteristics. The basic hypothesis of the study is that abilities measured at the time of admission to college or graduate school are related to career performance after earning the doctorate. The analysis sample for this study included 215 psychologists who had earned a doctorate in psychology in 1963-64, who had earned a bachelor's degree between 1954 and 1961, and who had retrievable test scores either on the SAT or on the Aptitude Test and an Advanced Test of the GRE. Measures of attainment included citation counts obtained from the Social Sciences Citation Index and the Annual Review of Psychology, publication counts obtained from Psychological Abstracts, and election to fellow status in the American Psychological Association. The small sample sizes (128 for SAT and 150 for GRE) and the limitation to one field do not provide an adequate basis for generalization. The results, however, are sufficiently promising to warrant further research. They also suggest that GRE Advanced Test scores (which correlated .41 with citation counts from the Social Science Citation Index) may be more closely related to career performance than are measures of aptitude. Descriptors—*Academic Ability, *Achievement Gains, *College Entrance Examinations, Higher Education, Quantitative Tests, *Scores, *Sex Differences, Test Wiseness, Verbal Tests

Identifiers—*Graduate Record Examinations, *Retesting

The purpose of this study was to obtain information on both the number of individuals who retest and their patterns of score gain (or decrement) by sex and ability. Individuals who retested only once were found to gain about 26-27 points on the Graduate Record Examination (GRE) verbal test and about 23 points on the GRE quantitative test. This finding is tempered by the fact that repeaters are a self-selected group whose average scores were below the mean on initial testing; average gains on retest by a random sample of all test takers almost certainly would be somewhat less. Individuals who retested more than once were, on the average, of lower ability than the single retest individuals. The multiple retesters gained less on the average than the higher ability single retest individuals. The amount of verbal gain was positively related to the length of time between the initial test and the first retest. This result was interpreted primarily as an increase in knowledge and to a lesser extent an increase in test-taking skills. There was no relationship between time lapse and quantitative gains. Identifiers—Outliers, *Test Appropriateness, Three Parameter Model

Appropriateness measurement is a general approach to the problem caused by multiple choice tests failing to measure accurately the ability of atypical examinees. The conceptual framework of appropriateness measurement is presented, and several statistical indices of the appropriateness of a multiple choice test for an examinee are noted. A series of interrelated experiments is used to demonstrate that appropriateness measurement is robust to errors in parameter estimation and to the presence of unidentified aberrant examinees in the test norming sample. Finally, studies with actual data are used to show that the three-parameter logistic model is sufficiently valid to support effective appropriateness measurement in applications with real examinees.  The Art Self-Concept Inventory: Development and Validation of a Scale to Measure Self-Concept in Art.

Pub Date—83
 Note—29p.
 Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Art, *Grade 6, Intermediate Grades, Questionnaires, *Self Concept Measures, Self Evaluation (Individuals), *Test Construction, *Test Reliability, *Test Validity

The Art Self-Concept Inventory (ASCI) was developed as a situation specific self-concept instrument to measure the students' ideas and feelings about themselves in the art context. Art self-concept was defined as students' perceptions of themselves as makers, as judges, and as enjoyers of art. To top these dimensions of art self-concept, items were generated for three corresponding subscales: art making, art judgment, and art enjoyment. Following a pilot study, the final form of the ASCI was administered to 208 grade 6 students. Item-total correlations were acceptable to high: Delta group response patterns showed strong upper left to lower right diagonality, and item means were near scale mid-point. Reliability estimates for the scale were very high. The instrument appears to possess both content and construct validity in that the items in the scale sample a range of art experiences and the instrument shows unidimensionality. In addition, it appears that all items over the three domains consistently differentiate between subjects who hold high self-concepts in the area of art and those who do not. (The 49-item instrument is included.) (PN)

Identifiers—*Evaluation Problems, *Graduate Record Examinations

A wide variety of potential indicators of graduate student performance are reviewed. Based on research literature, experience with recent and current research projects, and conversations with graduate faculty members and administrators, the various indicators are considered in two ways. First, they are analyzed within the framework of the traditional "criterion problem," that is, with respect to their adequacy as criteria in predicting graduate school performance. In this case emphasis is given to problems with the criteria that make it difficult to draw valid inferences about the relationship between selection measures and performance measures. Second, the various indicators are considered as an important process of the graduate program. In this case, attention is given to their adequacy as procedures for the evaluation of student performance—e.g., their clarity, fairness, and usefulness as feedback to students. Various general observations about the status of student evaluation practices are made, and particular attention is drawn to the view that many evaluation practices seem to be characterized by confusion with regard to their basic purpose. Finally, suggestions are offered for how assessment practices might be improved. (Author)

This is a report about the first two stages of a four-stage project designed to develop procedures to assess the accomplishments of applicants to graduate school. In the first stage, trial instruments were developed after thoroughly reviewing other attempts at assessing accomplishments and carefully considering the issues involved. Three prototypes were developed based on three approaches: a checklist approach, a semi-documented approach, and an open-ended portfolio approach. In the second stage, an instrument was developed that was designed to meet the operational and conceptual requirements of an inventory of documented accomplishments for graduate selection using as many of the positive features of earlier approaches in as simple a format as possible. The inventory, included in this document, contains items on the student's background, writing and publishing activities, contests and public performances, artistic or scientific objects produced, jobs, volunteer work, military activities, and three specific accomplishments. Identifiers—*Graduate Record Examinations, *Speededness (Tests)

This study investigates the effects of increasing the test time to reduce the speededness of the verbal and quantitative experimental sections of the Graduate Record Examinations (GRE) Aptitude Test. In December 1976, at approximately 550 domestic test centers, 20- and 30-minute versions of a verbal experimental test and of a quantitative experimental test were administered with the operational test. The effects of testing time on scores for minority-group versus majority-group examinees, on male versus female examinees, and on examinees by years elapsed since they received the baccalaureate degree are investigated. Although the 20-minute experimental tests are generally more speeded than the 30-minute tests, the ten additional minutes resulted in a small score gain for all groups, and differential score gains were not found between the subgroups. On the basis of the results of this study, the extension of testing time for the GRE Aptitude Test for the purpose of reducing intergroup differences is not indicated. (Author)

Identifiers—*Content Validity, *Graduate Record Examinations, *Test Content

Faculty members in departments of chemistry, computer science, and education were surveyed to collect information on the content representativeness of the Graduate Record Examination (GRE) Advanced Tests in those disciplines. Faculty respondents allocated percentages to each of the major content categories of the specifications for the tests to reflect the nature of undergraduate curricula appropriate for prospective graduate students. They also classified test items into those same categories. This study compared the distribution of content specified by the Committees of Examiners, the distribution of content produced by the respondents, and the distribution of test items by content categories as classified by the respondents. Agreement was generally good, although some differences emerged that might suggest minor changes in specifications or item composition. The method is documented in some detail (Appendix E) so that it can be applied periodically to other tests when desired. The information gathered by the method can be of value to the Committees of Examiners in keeping the tests abreast of trends and changes in their fields. (Author)

Identifiers—*Graduate Record Examinations, *Test Revision

Much of the effort involved in a major restructuring of the Graduate Record Examinations (GRE) Aptitude Test was intended to result in the creation of an analytical module to supplement the verbal and quantitative sections of the test, thus providing broadened measurement. Factor extension analysis was used in the present study to investigate further the characteristics of seven experimental analytical item types that had been administered in the experimental section of two operational forms of the Aptitude Test. The extension analysis included: (1) examining the loadings of analytical items on the factors extracted from operational forms, (2) computing the contribution made by operational factors to explaining both the intercorrelations among experimental items and the variance of each experimental test, and (3) analyzing the relationships among analytical items that were not explained by operational form factors. The seven analytical item types were shown to be differentially related to the dimensions underlying the current Aptitude Test, in terms of both their independence of verbal and quantitative factors and their relationship to specific abilities. Furthermore, all but one of the seven experimental analytical tests appeared to have at least one interpretable dimension that was distinct from any found in the operational form of the Aptitude Test. Identifiers—*Graduate Record Examinations, *Test Revision

A study was conducted in order to investigate the factor structure of the Graduate Record Examinations (GRE) Aptitude Test, which now includes an analytical module. Comparison of the factor structures of the Aptitude Test before and after modification suggested that the factor structure of the verbal and quantitative sections of the test has been relatively unaffected by changes made in order to introduce the analytical module. The restructured test does, however, have a distinct, identifiable analytical dimension that is strongly related to the verbal and quantitative dimensions underlying performance on the test. Separate analyses of the analytical section of two forms revealed dimensions in the analytical items, particularly in the "analysis of explanations" item type, that may have practical value for test development activities. A look at another analytical item type, "evaluation of evidence," being considered for inclusion in future forms of the Aptitude Test, suggested that the ability to answer these items depends more on general reading comprehension ability than on analytical ability as it is now measured in the restructured test. Extension of factor solutions to various background variables, such as major field of study, yielded additional evidence supporting the discriminant validity of the verbal, quantitative, and analytical factors found in the test. This exploratory study is concerned with identifying several measures of career attainment for historians and with relating these measures to Graduate Record Examination (GRE) scores and to other relevant characteristics. The basic hypothesis of the study is that abilities measured at the time of admission to graduate school are related to career performance after earning the doctorate. The analysis sample for this study included 83 historians who had earned a doctorate in history in 1963-64 or 1964-65, who had earned a bachelor's degree between 1954 and 1962, and who had retrievable test scores on the Aptitude Test and an Advanced Test of the GRE. Citation counts obtained from the Social Sciences Citation Index served as the main indicator of attainment. The rating of the graduate faculty in History for each historian's doctoral university as reported by Cartier (1966) was included in the study as a predictor. Because the sample size was quite small (83 historians), any conclusions based on these data must be quite tentative. Nevertheless, it is of interest that GRE-Verbal and GRE Advanced test scores and department quality ratings yield small positive correlations with citation counts from the Social Sciences Citation Index. These results are sufficiently promising to warrant further studies of similar design based on scholars who attained the doctorate in other years or who specialized in other fields. (Author)

Descriptors—Comparative Analysis, *Computers, Data Analysis, Data Processing, *Evaluation Criteria, Guidelines, *Institutional Research, *Microcomputers, Researchers, Research Needs, *Selection

Identifiers—*Mainframe Computers

The paper sets the stage for the effective and efficient use of computers in institutional research. The microcomputer and the mainframe computer are contrasted for those researchers who have a choice of where to process data. General computer use, specific microcomputer and mainframe computing guidelines, and an application utilizing both computer types are presented. General considerations touch upon attitudes, expectations, and organizational habits for the purpose of establishing what can or cannot be done with a computer. The guidelines highlight strengths and weaknesses in dealing with microcomputers and large mainframe computer systems and delve into areas of data control, data accessibility, standardization of procedures and documentation, system support and user education, hardware limitations, and software support. The discussion of the application shows how computing tools were chosen. (Author)

Descriptors—Classroom Observation Techniques, Elementary Secondary Education, *Evaluation Methods, *Mathematical Models, Measurement Techniques, Reliability, *School Effectiveness, *Time on Task

Identifiers—*Academic Efficiency

In this paper, academic efficiency is operationally defined and a methodology for measuring it at the school level is described. Academic efficiency is defined as the extent to which a school utilizes its time for the academic development of all its students. The measure of academic efficiency must include three elements: time, students, and academic development. The metric used is the student-minute; one student-minute is a minute spent by one student. Assuming that academic engagement is the legiti-

mate proxy of academic efficiency, the index of academic efficiency is the proportion of engaged student-minutes to total student-minutes. To calculate this index, six different types of data must be collected at the school level: total time available in school day, time scheduled for noninstructional activities, total enrollment, average number of students absent per day, average engagement rate, and average proportion of nonacademic instructional time per class. Procedures have been developed at the Mid-Continent Regional Educational Laboratory for sampling engagement rate and non-academic instructional time. (BW)

Descriptors—Adults, Career Counseling, Cognitive Ability, *Federal Programs, *Job Analysis, Longitudinal Studies, Perception, *Predictor Variables, Psychomotor Skills, Test Construction, *Testing Programs, *Test Validity

Identifiers—*General Aptitude Test Battery, Validity Research

This report cumulates the results of 515 validation studies carried out over a 45-year period by the United States Employment Service, and relates these findings to five systems of job classification and job analysis. Correction for sampling error shows that general cognitive, perceptual, and psychomotor ability are valid predictors of job proficiency for all jobs, though there is considerable variation in validity across jobs. Correction for sampling error shows that cognitive and perceptual ability are valid predictors of training success for all jobs and that psychomotor ability is a valid predictor for all but a few high-complexity jobs. The relevant information in each of the five job analysis systems turned out to be the same dimension: job complexity. This dimension has been assessed for all 12,000 jobs in the "Dictionary of Occupational Titles" and the validity generalization analysis performed here thus extends to all jobs in the current volume. Cognitive ability increases in validity as job complexity increases while psychomotor ability increases in validity as complexity decreases. Thus a shift in weight from cognitive ability to psychomotor ability across categories of job complexity produces average multivariate validity ranging from .49 to .59 for job proficiency and from .59 to .65 for training success. Adams, Morgan And Others
Evaluation Report on HOSTS Program in the
Portland Public Schools.
Portland Public Schools, OR. Research and Evaluation
Dept.

Pub Date—83

Note—40p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Achievement Gains, Elementary Education, *Individual Instruction, *Low Achievement, *Program Effectiveness, Program Evaluation, *Reading, *Tutors, Validated Programs

Identifiers—*Helping One Student To Succeed, *Portland School District OR

HOSTS, "Helping One Student To Succeed," is a nationally-validated Chapter I program adopted by 24 schools in the Portland School District. It was designed to help low performers learn to read by providing individualized instruction on a one-to-one basis through the use of trained volunteer tutors. The HOSTS curriculum is designed as a reading program that consists of six major skill areas: reading readiness, phonetic analysis, structural analysis, vocabulary development, comprehension, and study skills. This evaluation, conducted to investigate the effects of the program, compared the achievement gains of Chapter I students who were in the HOSTS program with three different populations: (1) Non-HOSTS, i.e., students in the same grades and schools who received other Chapter I reading instruction; (2) District Chapter I students; and (3) all District students. The achievement

growth of all HOSTS students in 1982-83 was compared with their achievement growth in 1981-82. Student achievement was measured by the results of the Comprehensive Test of Basic Skills and the Portland Achievement Levels Tests. Based on research findings, it was concluded that HOSTS produced positive, non-significant gains, results which are better than the average of other Chapter I supplementary programs, but are not significantly better. Adelson, Joseph And Others
The Development of Adolescent Thinking: Some
Views for Effective Schools.

Research for Better Schools, Inc., Philadelphia, Pa.
Spons Agency—National Inst. of Education (ED),
Washington, DC.

Pub Date—83

Note—50p; Papers presented at the Research for Better Schools Forum on Adolescence and Effective Schools.

Pub Type—Collected Works - Proceedings (021)
EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Adolescents, Attribution Theory, *Cognitive Development, Community, *Ethology, Laws, *School Effectiveness, Secondary Education, *Social Cognition, Urban Schools

Identifiers—Idealism

Adolescence was the focus of an Urban Development Forum, a component of the Research for Better Schools, that explored the factors of effective schooling in terms of their impact on young people in large, urban systems. This forum featured a major presentation by Joseph Adelson. Focusing his presentation on the cognitive growth in adolescence, he reported on two major investigations of young people—a cross-national project and a study of an American urban population—both of which involved in-depth interviews of teenage subjects and a major analysis of findings. Reporting to educators concerned with effective schools, he highlights five topics that are involved in the teenager's readiness to think fruitfully about social and humanistic matters: (1) the community, (2) the law, (3) principles, (4) grasp of psychology, and (5) understanding the social order. Four speakers commented on Adelson's presentation: David Elkin (a Piagetian by training and conception), Allan Glatthorn (a specialist in curriculum development), Ione Vargas (a dean of the School of Social Administration at Temple University), and Frederick McDonald (a senior research psychologist at Educational Testing Service). The papers of these five presenters are contained in this document and provide perspectives on adolescence and information for further educational thought. (PN)

Descriptors—*Adaptive Testing, *Computer Assisted Testing, Estimation (Mathematics), *Item Banks, *Latent Trait Theory, Mathematical Models, Maximum Likelihood Statistics, Quantitative Tests, Simulation, *Testing

Identifiers—*Ability Parameters, ACT Assessment, *Item Parameters, One Parameter Model, Three Parameter Model

A two-stage study was conducted to compare the ability estimates yielded by tailored testing procedures based on the one-parameter logistic (1PL) and three-parameter logistic (3PL) models. The first stage of the study employed real data, while the second stage employed simulated data. In the first stage, response data for 3,000 examinees were obtained for the 40 item ACT Assessment Mathematics Usage subtest. The first 2,000 cases were used to obtain item parameter estimates for both models. Using these estimates, 1PL and 3PL tailored tests were simulated using the response data for the remaining 1,000 cases. Both tailored testing procedures employed maximum likelihood ability estimation and maximum information item selection.

tion procedures. The two sets of ability estimates were then compared. In the second stage, response data for 3,000 cases were simulated using the 3PL item parameter estimates from the first stage as true parameters. True abilities were selected from the standard normal distribution. The first 2,000 cases were used for 1PL and 3PL calibration of the items, and the remaining 1,000 cases were used to simulate 1PL and 3PL tailored tests. The two sets of ability estimates were compared to each other and to the true ability parameters. Results of both stages of the study indicated that the 1PL and 3PL tailored tests yielded highly correlated ability estimates, and there was no apparent advantage in terms of ability estimation to using one of the models over the other. Because the 1PL procedure was less expensive to use, it was the recommended model for this application. (Author)

An Extension of the Two-Parameter Logistic Model to the Multidimensional Latent Space. American Coll. Testing Program, Iowa City, Iowa. Spons Agency—Office of Naval Research, Arlington, Va. Personnel and Training Research Programs Office.

Report No.—ONR83-2

Pub Date—Aug 83

Contract—N00014-81-K0817

Note—33p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Estimation (Mathematics), *Latent Trait Theory, *Mathematical Models, Maximum Likelihood Statistics, Measurement Techniques, *Statistical Analysis

Identifiers—Information Function (Tests), *Multidimensional Approach, *Two Parameter Model. Item response theory (IRT) has proven to be a very powerful and useful measurement tool. However, most of the IRT models that have been proposed, and all of the models commonly used, require the assumption of unidimensionality, which prevents their application to a wide range of tests. The few models that have been proposed for use with multidimensional data have not been developed to the point that they can be applied in actual testing situations. The purpose of this report is to present a model for use with multidimensional data and to discuss some of its characteristics. This discussion will include information on the interpretation of the model parameters, the sufficient statistics for the model parameters, and the information function for the model. In addition, the estimation of the parameters of the model using the maximum likelihood estimation technique is also discussed. (Author/PN)

A Guide to Statewide Assessment Results, October 1983.

Florida State Dept. of Education, Tallahassee. Student Assessment Section.

Pub Date—83

Note—46p.

Pub Type—Guides - Non-Classroom (055) - Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Educational Assessment, Elementary Secondary Education, Guidelines, *State Programs, Testing Programs, *Test Interpretation, *Test Results, *Test Use

Identifiers—Florida State Student Assessment Test Part II, *Florida Statewide Assessment Program

This publication is designed to aid teachers, principals, district staff, and other educators in reading, interpreting and using the data from the October 1983 Florida Statewide Assessment. This guide is divided into three main sections: an introduction; a discussion of the forms used to report results, and suggestions for interpretation and utilization of results. Reporting assessment data to various audiences is a critical feature of the Statewide Assessment Program. The Program gathers and reports student achievement data in reading, writing, and mathematics at grades 3, 5, 8, and 10. The appendices include the skills tested in the State Student Assessment Test, Part II; minimum performance standards and skills for grades 3, 5, and 8; and criteria for achievement of minimum performance standards and skills. Knowledge Use in Educational Development: Tales

from a Two-Way Street.

Research for Better Schools, Inc., Philadelphia, Pa. Spons Agency—National Inst. of Education (ED), Washington, DC.

Pub Date—Jan 81

Note—27p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Administrator Role, Basic Skills, Career Development, *Case Studies, Educational Development, *Educational Improvement, Educational Practices, Educational Research, Educational Resources, Elementary Secondary Education, Linking Agents, *Researchers, *Research Utilization, *Teacher Role

Development has traditionally been seen as part of a one-way street running from the researcher to the practitioner. Studies of the "mutual adaptation" of development products undercut this view of development and suggest that it should be seen as a two-way street that takes into account the practical knowledge of teachers and administrators. A participant observer study of two efforts at "collaborative" development in the fields of basic skills and career preparation illustrate the kinds of practical knowledge that practitioners bring to the process and the changes in development processes that result. The study concludes that the practical knowledge of practitioners, linking agents, and developers all contribute to the development process. In addition, development products need to provide enough flexibility to encourage intelligent local adaptation, but enough guidance to really provide educators with new knowledge. (Author/PN)

Nonbiased Psychoeducational Assessment: 1983.

New York State Education Dept., Albany. Bureau of Pupil Services.

Report No.—NYSED-83-7750

Pub Date—Nov 83

Note—28p.

Pub Type—Information Analyses (070) - Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Educational Assessment, Elementary Secondary Education, Followup Studies, Group Testing, Individual Testing, Models, Observation, *Psychological Evaluation, *School Psychologists, Student Evaluation, *Student Placement, *Test Bias, Testing Problems

This publication reviews issues and processes in the quest for less-biased, least-biased, non-biased assessment. It is intended to aid the school psychologist in assisting all individuals in placement or program decisions for school-age children. The first section articulates the common sources of bias in assessment and identifies concepts intended to minimize bias in the use of individual and group tests. The second section gives the technique of observation its appropriate status as an assessment tool. The next section presents some of the more frequently-used assessment models. The final section describes follow-up as the final cost-effective step in non-biased assessment. (PN)

Only a Phone Call Away: Local Educators' Views of Regional Educational Service Agencies.

Research for Better Schools, Inc., Philadelphia, Pa. Spons Agency—National Inst. of Education (ED), Washington, DC.

Pub Date—Jun 83

Note—73p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Administrator Attitudes, Data Collection, Delivery Systems, Educational Policy, *Education Service Centers, Elementary Secondary Education, *Information Dissemination, In-service Education, Interviews, Resource Centers, *School Districts, State School District Relationship, Technical Assistance

Identifiers—New Jersey, Pennsylvania

To learn more about the Regional Educational Service Agencies (RESA), Research for Better Schools initiated a multi-year study of RESAs in Pennsylvania and New Jersey. This report specifically describes local educators' perceptions about RESA services and the content areas in which RESAs offered help. It also suggests how successful service delivery occurred. This study is intended to inform general thinking and policy making about how to disseminate useful knowledge to schools. At

the same time, it is intended to provide useful information to RESA staff and to state officials responsible for RESAs. A secondary purpose is to compare RESAs with centrally-developed dissemination programs and to explore RESAs' potential to support or supplement such programs. (PN)

On the Simulation and Analysis of Measurement

Model Residuals.

Pub Date—11 Jan 84

Note—68p.; A paper presented at the Educational Testing Service, January 11, 1984. Based on "The Analysis of Rasch Model Residuals," doctoral dissertation, University of Chicago, 1983.

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Data Analysis, Evaluation Methods, Goodness of Fit, *Latent Trait Theory, *Models, *Research Methodology, Research Needs, Simulation, Statistical Analysis

Identifiers—Data Interpretation, Measurement Problems, *Rasch Model, *Residuals (Statistics)

The purpose of this research is to demonstrate that a systematic approach to the graphical analysis of Rasch model residuals can lead to an increased understanding of ordered response data, and that residual patterns do change in predictable ways, and that summary statistics need not be the only piece of evidence for assuring the fit between model and data. Three simple, idealized simulations and then two sets of real data are considered. The research concludes that (1) the measurement error uncovered in the residual analyses was not noticeable in the examination of person and item estimates, nor the person and item fit statistics; and (2) the tailored residuals provided a specific frame of reference within which the observed variation would be understood. Note—77p.; Some tables contain small print.

Available from—ERIC Clearinghouse on Tests, Measurement, and Evaluation, Educational Testing Service, Princeton, NJ 08541 (\$7.00).

Pub Type—Guides - Non-Classroom (055) - Information Analyses - ERIC Information Analysis Products (071)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Annual Reports, Elementary Secondary Education, Evaluation Utilization, Graphs, Guidelines, *Information Dissemination, Parent School Relationship, *Scores, Teachers, *Testing, *Test Interpretation, *Test Results

The purpose of this document is to address issues related to the release of test scores to a variety of audiences: parents, school board members, school staff, the news media, and the general public. Guidelines or recommendations for reporting test data are provided. The recommendations are based both on experiences in reporting test results and an informal review of a sample of test reports from school districts across the nation (see Appendix A). Annual reports on testing programs should include (1) descriptive information of the testing program, test content, and test scores; (2) test results for districts, as well as for individual schools; and (3) cautions concerning how the data should and should not be interpreted. Reports to parents will include the same information, but focused on an individual student. Reports to staff will focus on a class or a school. Suggestions for using test data for comparing schools, determining weak and strong areas, and determining if a school did as well as it should have are presented. Commonly used test terms, testing textbooks that include discussions of testing terms, and reports of test results cited in "Research and Evaluation Studies from Large School Districts 1982" are included in the appendices. (PN)

Validation of Two Measures of Acculturation for Chinese Americans.

Pub Date—Apr 83

Note—25p.; Paper presented at the Annual Meeting of the Western Psychological Association (San Francisco, CA, April 1983).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Acculturation, *Chinese Americans, Higher Education, Measurement Techniques, Mental Health, *Rating Scales, Social Behavior, Social Values, *Test Validity, Whites

Identifiers—*Behavioral Acculturation Scale (Szapocznik), *Chinese Traditional Modern Scale (Dawson)

Two acculturation measures, Szapocznik's (1978) Behavioral Acculturation Scale and Dawson's (1971) Chinese Traditional-Modern Scale, were adapted and applied to two college-aged groups of first and second generation Chinese Americans and one group of Caucasian Americans. Hypotheses concerned the empirical and construct validity of both measures relative to the Chinese American population. Results of the study supported both hypotheses for the behavioral acculturation measure, but only confirmed the empirical validity of the value acculturation measure. Conditional acceptance of the construct validity of the value acculturation measure seemed warranted after some discussion of the complex nature of the value acculturation process and a review of other research done with this scale. The two acculturation measures, taken together, provide a two-dimensional approach to the assessment of acculturation among Chinese Americans and are capable of quantifying the intergenerational/acculturational conflicts which arise in Chinese-American families and allow for the rigorous assessment of the impact of such conflicts on the mental health of that population. Descriptors—College Credits, English Curriculum, Higher Education, *Language Skills, Language Usage, Logical Thinking, *Predictive Validity, Reading Comprehension, Sentence Structure, Standardized Tests, *Student Placement, Testing Programs, *Test Validity, Vocabulary Skills, *Writing Evaluation

Identifiers—*Descriptive Tests of Language Skills, Multitrait Multimethod Techniques

Performance data on the Descriptive Tests of Language Skills (DTLS) for entering college students were collected through a pilot study of 4,234 students in 16 colleges. This study was also designed to permit several checks on the validity of the DTLS by examining the relationship of DTLS scores to the following criteria: English course grades, scores on essays administered concurrently with the DTLS prior to course enrollment, and scores on end-of-term essays. Results show that DTLS scores have a substantial concurrent relationship to carefully scored essays and that they predict writing course outcomes whether measured by end-of-course grades or a scored essay. Thus, these results lend support to the use of the DTLS as an aid in making decisions about the placement of students in introductory level college composition courses. The multitrait-multimethod matrix analysis did not provide evidence for the discriminant validity of the three DTLS that assess writing skills: Sentence Structure, Usage, and Logical Relationships. Whether this was due to a failure of the tests to measure relatively independent traits or to problems with the criteria used for this phase of the analysis is an open question. Background questions from the DTLS answer sheet and instructions for administering DTLS Exercises, the DTLS Exercises, and the DTLS Scoring Criteria are appended. (PN)

Descriptors—Achievement, Achievement Tests, Addition, *Data Collection, Educational Objectives, *Grade 3, *Longitudinal Studies, *Mathematics, Primary Education, Problem Solving, Sampling, Skill Development, Statistics, Subtraction

Identifiers—*Developing Mathematical Processes

This paper documents the achievement monitoring component of a three-year study on the acquisition of addition-subtraction problem-solving skills by young children. A set of performance objectives contained in or ancillary to ten instructional units on sentence-writing for verbal problems and algorithms specified test content. Tests measuring group progress toward these objectives were administered after each unit. Data for the tests given after the two units covered in the fall semester of grade 3 are presented in this paper. The scores for each objective, developed using matrix sampling procedures, indicated mastery of addition and subtraction without regrouping, mastery of the addition algorithm for numbers 0-99 and near-mastery of the subtraction algorithm for numbers 0-99. These results reflected the instructional emphasis. There was marked improvement on several of the problem-solving 0-99 and sentence-writing 0-99 objectives not previously mastered, though only one of these objectives was actually mastered. With the exception of the sub-joint-addend sentence-writing 0-20 objective, progress (or maintenance) on the objectives associated with the numbers 0-20 was excellent. (Author)

Descriptors—*Case Studies, Data Collection, Information Utilization, Literature Reviews, *Program Administration, *Research Design, Research Methodology, Research Problems, *Surveys

Identifiers—*Knowledge Utilization, Qualitative Research

The purpose of this review was to examine research designs in studying knowledge utilization. The results are based on 32 studies of knowledge utilization, and the report describes the various types of research designs and their strengths and weaknesses. Survey research methods are appropriate for dealing with either of two aspects of a qualitative research topic: issues of frequency, and issues of perception and attitude. Beyond these issues, survey strategies have limited applications in qualitative research. The case study was the most common research strategy used in these 32 studies. Although multiple-case studies are able to deal with the entire knowledge utilization process in an explanatory manner, they are not good tools for establishing the frequency or extensiveness of a particular phenomenon. Mixed designs are those in which a single investigation relies on both the survey and case study strategies. In general, these designs offer advantages that neither the survey alone nor the case study alone can provide. Four types of project management issues can affect the research design: project staff skills, project organization, resources available, and reporting requirements. Potential implications of these findings are discussed. (BW)

This technical report describes a series of three studies designed to instruct students in the relationship between texts, comprehension questions, and two sources of answer information—the text to which a given question refers and their own background knowledge. The focus of the technical report is on individual differences in the amount and type of instruction most beneficial to students from fourth through eighth grade. The studies demonstrated that for the younger students, a longer (i.e., 6-8 week) instructional program was necessary, with gradually decreasing amounts of instructional time required as the students' age level increased. The studies also represent a continuum in instructional research that begins with a training study conducted in classrooms by a university researcher, and moves to instructional studies implemented by classroom teachers in their own classrooms. Identifiers—*Unit Schools

The development of these Evaluative Criteria was proposed in 1980 after numerous requests for such an instrument were received from unit schools, independent schools, parochial schools, regional accrediting associations, and professional organizations. A national advisory committee was selected. Eleven schools were selected to participate in the field testing of this instrument. Results of the field test were presented to the advisory committee, reviewed, and the instrument was approved for publication. This instrument has been designed to be used in the self-study and evaluation process by individual schools containing both elementary and secondary levels. The Evaluative Criteria are organized in eleven sections: School and Community (Public Schools), School and Community (Nonpublic Schools), Philosophy and Objectives, Curriculum: Learning Areas, Curriculum: Overview, Individual Faculty Data, School Staff and Administration, Student Activities Program, Learning Media Services, Student Personnel Services, School Plant, and Plans and Priorities. The accompanying manual describes the organization of the Evaluative Criteria and provides directions for its use in the evaluation process. (BW)

Identifiers—*Wechsler Adult Intelligence Scale, Wechsler Bellevue Intelligence Scale, *Wechsler Intelligence Scale for Children, Wechsler Preschool Primary Scale Intelligence

The classification of intelligence has been a prime interest to many for over three-quarters of a century. The Wechsler scales of intelligence and the development of factor analysis have both played major roles in the shaping of psychometric thought. An examination of this joint history by means of a review of the factor analytic studies of the Wechsler scales reveals the trends and inconsistencies in this area of mutual concern. It is now appropriate and important to bring this literature together for a united treatment as much of it is disjointed and contradictory, with many researchers remaining unaware of recent developments. The rationale for investigating the factor structure of the Wechsler scales is presented. An introduction to the number of factors problem is offered, as well as discussion of the most frequent types of analyses. Reports of changes in the factor structures are presented, and finally, new directions for future research are introduced. (Author)

Identifiers—*Austin Independent School District TX, *Course Selection

Two sets of analyses were done to examine the "holding power" of ninth grade courses. The first looked at the courses taken by high-risk students who were in the ninth grade in 1978-79. The second set of analyses looked at the courses taken by high-risk students from a dropout study who were in the ninth grade in 1979-80. Only three courses were significantly related to staying in school or dropping out in both analyses. Varsity sports and photography were positively related to staying in school and enrollment in study hall was related to dropping out. The relationships described are unlikely to have occurred by chance, but the causes behind them remain obscure. (BW)

Descriptors—Adults, *Age Differences, Interviews, *Older Adults, Reliability, Research Methodology, *Research Problems, *Surveys
Identifiers—*Interviewer Effects, *Respondent Behavior

Using data collected through telephone interviews with a national sample of adults, this study searched for evidence as to whether interviewers have stronger effects on the responses given to a wide range of questions by older people than on the responses of younger people. Responses to 30 items for which significant interviewer effects had earlier been reported were examined. Significant age-

by-interviewer interactions were detected for eight of the 30 items. The set of eight items included both interviewer observations and the direct responses of interviewers, and, among the latter, responses to both open- and closed-ended questions. Older and younger respondents were examined separately to determine the nature of the age-by-interviewer interactions. No pattern was found for the interviewer observations, but for the direct responses to questions, the median interviewer effect was more than twice as strong for older respondents as for younger respondents. Based on all the evidence from this study, it appears that older respondents may be somewhat more susceptible to interviewer effects than younger respondents. (BW)

Identifiers—Peer Monitoring, Peer Teachers as Mirrors and Monitors Project

Detroit's Peer Teachers as Mirrors and Monitors Project is intended to validate cost effective methods for increasing Academic Learning Time (ALT) for students in grades one through four. A major problem in this research effort has been the design of valid and reliable measures of the components of ALT. One very important component of ALT is student and teacher use of time. This presentation addresses some of the issues involved in measuring student time-on-task, and teacher's use of time with students. Observation methods which produce valid and reliable data without interrupting classes or threatening teachers (too much) are discussed. Samples of observation instruments developed by the project are included, along with issues related to training observers and the establishment of definitions of behaviors to be observed so as to produce high inter-rater reliability. The MUPET Lab: Computer Assisted Management of Instruction.

Pub Date—[83]

Note—6p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Computer Assisted Instruction, Computer Assisted Testing, *Computer Managed Instruction, Feedback, *Grade 3, *Mathematics, *Microcomputers, *Models, Pilot Projects, Primary Education, Student Evaluation

Identifiers—*Jonesboro Public Schools AR

Project Computer-Assisted Instructional Management (C-AIM) is being pilot tested on third grade mathematics students in the Jonesboro Public Schools (Jonesboro, Arkansas). Each elementary building operates a MUPET Lab equipped with at least six Commodore Model 4016/4032 microcomputers, one Commodore Model 4040 dual disc drive, and one Commodore Model 4022 printer. These components are networked into a single system using the MUPET, an IEEE multiplexer allowing the microcomputers common access to the IEEE peripherals. If all machines are not required for test administration they may be used in the classroom for computer-assisted instruction. The intent of C-AIM is to provide a model by which microcomputers may be used to assist in the management of instruction by providing an interactive system for evaluating student progress on a predetermined set of objectives and providing immediate flexible access to the evaluations. The design includes having the microcomputing system available on demand to do testing with the capability of handling multiple user access to the dual disc drive and

printer. A test exists for each unit of material in the system. A unit may contain from 5 to 10 objectives. Each unit test has four randomly-generated test items for each objective of that unit. (PN)

Student Academic Engagement Rates. Final Report.

Spons Agency—National Inst. of Education (ED), Washington, DC.

Pub Date—Feb 83

Grant—NIE-G-80-0065

Note—241p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC10 Plus Postage.

Descriptors—*Academic Achievement, Attitude Measures, Classroom Observation Techniques, *Data Collection, Elementary Education, Intellectual Disciplines, Learning Theories, Student Attitudes, *Teacher Behavior, *Time Factors (Learning), *Time on Task

Identifiers—Iowa Tests of Basic Skills

The overall purpose of this project was threefold: (1) to gather task descriptive data concerning engagement rates of students across grade levels, abilities, classrooms, contextual factors, subject areas and task structures; (2) to link various teacher behaviors with student engagement rates, focusing on correlational results between a number of high inference variables and engagement rates of four different student ability groups across subject areas and grade levels; and (3) to integrate these findings into several theories (the teaching learning models of Bloom, Harnischfeger and Wiley, and Carroll) which explained or predicted the observational data. Observational data were gathered from eight schools, grades two through six, through approximately 500 full day observations spaced equally throughout a school year. Observers recorded high inference data about the teaching behaviors and low inference data concerning student engagement rates. In addition, the observations recorded the detailed sequencing of teacher activities, coupled with every third minute recordings of engagement rates of four different ability students in various activity structures, subject areas, and grouping arrangements. The dependent measures included the Iowa Tests of Basic Skills, an aptitude measure for entering students, and Des Moines Public Schools subject area tests in language arts, mathematics, and social studies. Identifiers—Austin Independent School District TX

The Office of Research and Evaluation (ORE) has been evaluating compensatory education programs in the Austin Independent School District for 10 years. This volume is an attempt to pull together many of those useful, intermittently timely findings into a handy reference volume. The contributions to this volume actually span the 10-year history of the ORE and are identified by name in the reference lists provided for each entry. Topics covered include major findings from 1982-83, impact on students, early childhood education, curriculum/techniques, parent involvement, and staff considerations. The final section of this volume discusses the role of evaluation in compensatory programs. (PN)

Identifiers—Austin Independent School District TX

In October 1983, 1,275 Austin Independent School District (AISD) secondary students completed a survey of their needs for social services. The survey was approved by the Board of Trustees in response to a request by the Social Policy Advisory Committee (SPAC). The purpose of the survey was to aid the SPAC in planning social services to meet the needs of youth in Austin and Travis County. Survey questions covering topics such as drugs, sex, and law abidance in addition to peer and parental support, were completed by a self-selected sample not considered representative of the entire AISD student population. The 335 items provided information on the students' outlook on life, school, and their futures. Complete results, including breakdown for high school and junior high school students, are contained in this report. (PN)

Sociocultural and Psychological Characteristics of the Korean People: A Teacher's Reference Guide in the Levels of the Elementary, Secondary and Postsecondary Students.

Pub Date—[78]

Note—48p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Asian History, *Cultural Background, Elementary Secondary Education, Family (Sociological Unit), *Korean Americans, *Korean Culture, *Personality Traits, *Religious Factors

Information and observations about Korean history, religion, philosophy, and culture, and their influence on Korean Americans' intellectual and psychological characteristics are provided in this paper. The author contends that although many Korean Americans have been in the United States for several generations, all members of this group reflect their cultural heritage and that, therefore, it is necessary to understand the heritage in order to understand this population. Self-identity, self-perception, and behavior patterns of Korean Americans are related, in particular, to the philosophical structures of eastern religions. The family system is also said to be influential. Finally, ways that Korean Americans perceive American culture and ways of life are discussed. (GC)

Identifiers—*Israel, Miftanim (Vocational Schools)

The word "miftan" means "threshold" in Hebrew. The Miftan as an educational framework was conceived in Israel as a response to the needs of marginal male youth who are about to drop out or who have dropped out of the regular school system. Currently 42 Miftanim are operating in that country. This report presents ethnographic data on three Israeli Miftanim—Miftan-Metro, Miftan Center-City, and Miftan-Orangedale. Chapter 1 examines processes by which pupils were referred to the Metro and Center-City Miftanim during 1976-77, and points out that each of these institutions used different approaches to recruitment and thus recruited somewhat different pupils. Chapters 2 through 6 look at Miftan-Metro in detail: aspects of socialization of two boys, the development of a social order independent of the institution's formal ideology, patterns of social relationships among the boys, conflicting approaches taken by different levels of staff (teachers vs. instructors), and problems among staff which hampered the implementation of the philosophy of the Miftan system. Chapters 7 through 9 deal with Miftan-Orangedale, discussing classroom behavior, workshop behavior, and staff relationships. Chapter 10 discusses Miftan Center-City, favorably comparing this institution to the other two. Chapter 11 highlights points of comparisons among the three Miftanim studied and discusses their implications for the Miftan system as a whole. Finally, Chapter 12 briefly reviews the ethnographic findings of this report in relation to more quantitative evaluation findings carried out in another phase of the Miftan research. (GC)

The Effect of the Single-Parent Family on Academic Achievement. A Review of Related Literature.

Pub Date—81

Note—13p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Children, Delinquency Causes, Educational Status Comparison, Elementary Secondary Education, *Family Influence, *Fatherless Family, Intelligence Quotient, *One Parent Family, *Parent Role, Socioeconomic Status

This is a literature review on the effect of the single-parent family on the academic achievement of children from such households. It is argued that, historically, society has discriminated against children from single-parent families, especially those of divorced parents. Research is cited which shows that: (1) children from one-parent households have lower levels of socio-emotional development and academic achievement; (2) students from two-parent families have higher reading comprehension than do students from one-parent families; (3) the academic achievement of black children in one-parent families is lower than that of white children from similar families; (4) boys are more affected by divorce and manifest more "acting out" behavior than girls; (5) low income, which is characteristic of one-parent families, is a factor in the probability of daughters dropping out of high school; (6) the female head of household is often less skilled and educated than the average man who acquires custody of his children; and (7) the father's role (or lack of it) makes a difference in children's behavior, especially boys. The need for further research on one-parent families is stressed. (AOS)

Education for Cultural Pluralism: A Progressive, Realistic Goal or Opportunistic, Utopian Rhetoric?

Pub Date—22 Apr 83

Note—26p.; Plenary address presented at the annual conference of the National Association for Asian and Pacific American Education (5th, Chicago, IL, April 22, 1983).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Asian Americans, *Bilingual Education, *Cultural Pluralism, Educational Trends, Elementary Secondary Education, Futures (of Society), Higher Education, *Multicultural Education, *Pacific Americans

The concept of cultural pluralism and how it is being applied to education, particularly in terms of

its implications for Asian/Pacific Americans, is addressed in this paper. First, historical background to the emergence of cultural pluralism as a concept in education (and its institutionalization as multicultural education) is briefly reviewed. The concept is then re-examined, with a look at some of its inadequacies and a proposal that it be broadened to "socioeconomic cultural pluralism." A retrospective analysis of how the Asian/Pacific American Movement fits into this broader context follows, along with a discussion of what Asian/Pacific Americans have learned from involvement in this movement in the 1960s and 1970s. Some of the current problems and challenges facing Asian/Pacific Americans, particularly in the field of education, are then discussed. Finally, ideas on future trends and alternative approaches to societal problems and the implications of these trends and approaches for the education of Asian/Pacific Americans are considered. (CMG)

Descriptors—*Civil Rights, Elementary Secondary Education, Equal Education, *Federal Legislation, Legal Responsibility, School Districts, *State Departments of Education, *State Legislation, *State School District Relationship, *Student Rights

This memorandum addresses the responsibility of State Education Agencies (SEAs) for insuring that local educational agencies do not violate students' civil rights. The SEA's duty is said to arise from two sources. First, in most if not all States, State law mandates that State education officials supervise and regulate the conduct of local school districts. This responsibility includes civil rights issues. Second, without reference to State laws, Federal obligations compel SEA's to assume civil rights enforcement responsibilities. Furthermore, this responsibility is an affirmative one. The SEA cannot wait for complaints to be brought, but must monitor and require correction as necessary. (The responsibilities under the laws of each State in the Miami Lau Center's service area are discussed separately. These States are Alabama, Delaware, the District of Columbia, Florida, Georgia, Kentucky, Maryland, Mississippi, North Carolina, Pennsylvania, South Carolina, Tennessee, Virginia, and West Virginia.) Identifiers—PF Project

This booklet for parents offers ideas for utilizing everyday situations in the home to help children improve in school, primarily in reading and mathematics skills. General suggestions are given for helping children to do their best by talking to them, reading to them, listening to them, praising them, watching television with them, keeping them healthy, and making sure they get to school on time. Activities are offered to help children with: knowing the names of things, naming sounds, following verbal directions, knowing letters and numbers, putting things in order, sorting things, following written directions, reading newspapers and magazines, understanding time, understanding measurement, understanding money, and knowing mathematics facts. It is stated that children need a quiet time and place for study. A bibliography of children's books lists 12 books or types of books for young children, 5 books or book series for pre-teens, and 8 books for teenagers. Suggestions are also given for other types of reading materials, games, other activities, and materials around the house that can be used for learning. (DC)

Identifiers—Career Centers, Urban Education Studies

This report presents the results of a survey of large school systems conducted between 1977-80. The purpose of the survey was to identify schools with promising programs and developments, especially those with the possibility of system-wide application. A total of 33 public school systems with 599 programs were studied. In the report, research procedures are briefly summarized, and some of the most successful programs are identified and described. Factors considered most crucial to program success are reported to have been: (1) strong commitment on the part of program staff and school principals; (2) local initiative and entrepreneurship in developing and sustaining the programs (largely funded through Federal sources); (3) continuous program evaluation leading to on-going staff development and adaption to student needs; and (4) significant departures from traditional schooling in order to adapt to individual needs in a pluralistic society. Characteristics of effective schools are summarized, with career centers and alternative schools given particular attention. Examples of school-community interaction are cited, and several of the more promising approaches to continuing education and increased professional competence such as teacher centers and management academies are described. New developments in the vital areas of systematic planning, management, and evaluation are reviewed, and elements necessary for system-wide renewal are summarized. (CJM)

Descriptors—*Adjustment (to Environment), Asian Americans, *Economic Progress, *Employment Experience, Family Income, *Indochinese, Job Performance, *Job Skills, Language Proficiency, *Refugees, Welfare Recipients

Relatively high levels of public assistance use, and low levels of labor force participation among recent arrivals, have focused attention on the ability of refugees to attain self-sufficiency reasonably soon after entering this country. A survey focusing on Southeast Asian refugees resettled in the United States since 1975 indicates that refugees increasingly participate in the labor force over time, but that employment is hindered by adverse conditions in the U.S. economy. Occupational backgrounds do not strongly affect the types of jobs secured, and refugees are distributed fairly evenly throughout the economy, with high technology jobs accounting for a surprisingly large share of jobs held by Indochinese. Former laborers, farmers, fishermen, homemakers, and students have the most difficulty finding jobs. Schooling and English language ability of the most recent arrivals is roughly comparable to that found in the early arrivals, although for cohorts arriving from 1978 to 1982, roughly 45 percent knew no English at all when they arrived. The major recipients of public cash assistance are households with many members, particularly dependent children; the use of public assistance by all refugees, however, diminishes over time as jobs are found. Descriptors—Acculturation, *Adjustment (to Environment), Asian Americans, Community Involvement, Crime, Cultural Traits, *Economic Progress, *Employment, *Indochinese, *Refugees, Unemployment

Identifiers—*Hmong People, *Rhode Island (Providence)

Despite suspicion in some quarters that refugee resettlement has been unduly expensive, evidence indicates that the Indochinese have made steady progress toward self-sufficiency. The majority of Hmong refugees in Providence, Rhode Island, for example, which has been "heavily impacted" by the large number of Indochinese who have become its newest residents, are self-supporting despite a high local unemployment rate. In Rhode Island as a whole, the unemployment rate of Indochinese is only 6.6 percent higher than that of other residents; several other States with high concentrations of refugees report similarly low dependency rates. Employers value the Indochinese' ability to meet production quotas and their disinterest in unions. Many refugees have started their own businesses and self-help groups. Crime continues to plague refugees no matter where they live, but efforts have been made in Portland, Oregon, and elsewhere to reduce language and other barriers between the Indochinese and vital emergency services. However, the Indochinese tend to remain isolated from the surrounding community whether it be a large or small one. (CJM)

Identifiers—Des Moines Public Schools IA, *Program Replication

In fiscal years 1978 and 1979 the Des Moines Title I math program served approximately 1100 students in 23 elementary schools. The program which used supplementary small group instruction for students in grades 2-6 who were performing below expected levels, had five components: (1) a management system guide; (2) individual student educational plan forms; (3) two resource books, one containing teaching strategies, the other keying commercial learning materials to the program's learning objectives; (4) two parent communication guides, one for parent use and one for teacher use; and (5) inservice materials. In FY 1978 and FY 1979 all the program's objectives were met, and the average gains for both fiscal years were greater than the gains for all other districts in Iowa. The continued successful results of the program, and the fact that its five components (developed for use in a system with diverse organizational settings and a variety of basal texts) are readily exportable, suggests that the program could be widely generalizable to educationally disadvantaged students in other school districts. It has, in fact, already been replicated in a number of other districts. To support the above points, the report presents information on the program's instructional and administrative sides, student selection methods, parent involvement, inservice activities, and replication. Evidence of the program's effectiveness is also presented. (CMG)

Identifiers—Des Moines Public Schools IA

During the 1979-80 school year, the Des Moines

Title I math program served over 1300 students in grades 1-8. Overall, the program met its objectives. The average percentile rank of students in grades 2-8 improved from fall to spring. Also, except for grades 4 and 7, gains exceeded the established criteria. Junior high school students' attitude toward learning became more positive over the year and for the first time junior high Title I students equalled or bettered non-Title I attendance rates. Motivation for the increased attendance rate may have been provided by the successful completion of student contracts. The instructional staff was successful in making home visits and personal contacts with parents during the first semester but not during the second semester. And finally, a random sample of parents indicated favorable attitudes toward the Title I program, although a need was found for improved communication between staff and parents on the selection of students and the purpose of the parent advisory council. Identifiers—Des Moines Public Schools IA

The Title I math program in Des Moines served 1483 students in grades 1-8, during the school year 1980-81. During this same year, the elementary program was identified by the National Dissemination Review Board as an exemplary program, indicating that it is effective and able to be replicated in other districts. The program had an impact on students' academic achievement, as evidenced by the improvement in average percentile rank from fall to spring. All grades except the fourth surpassed the established criteria. Secondary students indicated a more positive attitude toward learning at the end of the school year, as measured on an attitude instrument. They also had a better attendance rate than non-Title I students and completed the minimum required number of individual contracts. The elementary staff was successful in making personal contacts with parents the first semester. Secondary teachers did not achieve the objective but they did improve the percentage of parent contacts as compared with the previous year. Finally, parents indicated a favorable attitude toward the Title I program. (Author/CMG)

Identifiers—Des Moines Public Schools IA

In the 1981-82 school year, the Des Moines Title I math program served 1261 students in grades 1-8. The students mastered over 80 percent of the program objectives and achieved an increase in percentile rank from fall to spring. According to the results of attitude measurements, junior high school students' attitudes toward learning became more positive over the school year. Personal contacts between Title I teachers and parents of the students they serve occurred with the frequency necessary to

achieve all objectives except one. Attendance records indicated that secondary Title I students attended 88.9 percent of the days possible while non-Title I students at the same buildings attended 91.0 percent. The process of setting goals for students to work toward in the secondary program was reported as being a "motivator as well as a positive self-concept enhancer for students and teachers." (CMG)

Identifiers—Des Moines Public Schools IA

The Des Moines Chapter I math program served 1110 students in grades 1-8 during school year 1982-83. The total population of Chapter I students attained the established criteria for achievement gains but the gains for grades 7 and 8, taken alone, were lower than the goals. The same was true for mastery of math objectives. All parent contact objectives for Chapter I math students were achieved. Creation of a Chapter I data base allowed for computerized entry of enrollment, attendance, parent contact, and test data. It appears that initial problems with data entry have been worked out and that procedures implemented will result, in future years, in generation of required data with less teacher time required for data submission. Identifiers—Cambridge Job Factory Voucher Experiment MA, *Employment Subsidies, Employment Vouchers, Wilkes-Barre Job Research Voucher Experiment PA

In order to test the effects of financial subsidies on employment for disadvantaged youth, two experimental situations were set up: (1) a worker subsidy operating in Cambridge, Massachusetts, and (2) an employer subsidy operating in Wilkes-Barre, Pennsylvania. The first project, the Cambridge Job Factory Voucher Experiment, tested a voucher payment directly to youth combined with a job search assistance program. In order to separate the effects of these two treatments, two experimental groups (full-treatment and voucher only) and a control group were used. The second project, the Wilkes-Barre Job Search Voucher Experiment, tested the impact of making wage vouchers or tax subsidies available to employers hiring disadvantaged youth. To distinguish the new experimental vouchers from the Target Job Tax Credit (TJTC) already available to firms hiring 18-24 year olds, the new voucher was given only to firms hiring 16-17 year olds. The experimental design was set up in such a way that the new voucher could be compared with TJTC. The findings from the study suggest that employee wage subsidies do raise the employment

prospects of disadvantaged youth. Wage subsidies paid directly to youth are more effective than wage subsidies combined with other services such as job search assistance. The study finds no evidence to support the policy of employer-based wage subsidies for hiring disadvantaged youth, either in the form of vouchers or TJTC. (Author/CMG)

Identifiers—Comprehensive Employment and Training Act, *Youth Employment and Demonstration Projects Act

This report presents representative findings from the Youth Employment and Demonstration Project Act's (YEDPA) experiments and evaluations since 1977, focusing largely on the programs' impacts on participants. The report begins with a review of YEDPA-sponsored research on the nature, causes, and consequences of youth unemployment. Chapter 2 deals directly with CETA's formula-funded titles and asks whether the CETA system overall has worked for disadvantaged youngsters. Chapter 3 examines Federal efforts to help youth through intensive skill-training, and Chapters 4 and 5 cover work experience for out-of-school youth and in-school youth, respectively. Chapter 6 deals with efforts to help youth in the summer; Chapter 7 reviews efforts to assist disadvantaged youth through counseling with intensive placement, self-directed job search assistance, and school-to-work transition programs; and Chapter 8 synthesizes the evidence on work attitudes and knowledge areas. Chapter 9 considers the demand-side of the labor market by reviewing job creation strategies for youth. Finally, Chapter 10 reviews efforts to help poor youth through new institutional arrangements with the private sector, schools, and community groups. (Author/CMG)

Black undergraduate students' educational characteristics, experiences, and outcomes at six predominantly white, State-supported universities were examined in this study. Data were collected from 695 undergraduates by means of question-

naires. Findings show that black students in the study came from high schools where blacks were in the majority, and entered college with established histories of academic achievement. The majority were doing relatively well academically, although their grades were lower than in high school. Frequent exposure to racial discrimination was reported. Many students characterized general relationships between black students and white faculty and staff as negative. However, personal relationships with white faculty, staff, and students were rated good to excellent. Black students also reported that white faculty had difficulty relating to them and tended to avoid interaction with them outside of class. Most students believed white faculty to be concerned about their success but felt that they sometimes evaluated black academic performance unfairly. Socially, black students were at a severe disadvantage. Even though black organizations sponsored activities, over half the students reported infrequent participation in such activities. Most students were reasonably satisfied with the amount of financial aid they received. Finally, despite obvious problems, black students clearly possessed high perceptions of self. (CMG)

The Role of Native Language Instruction in Bilingual Education.

Intercultural Development Research Association, San Antonio, Tex.

Pub Date—Jan 84

Note—7p.

Journal Cit—Intercultural Development Research Association Newsletter, January 1984

Pub Type—Opinion Papers (120) — Collected Works - Serials (022)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *Bilingual Education, Elementary Secondary Education, *Intellectual Development, *Language Acquisition, Limited English Speaking, *Native Language Instruction, *Self Esteem

In the context of increasing criticism of bilingual education and the use of native language instruction, it must be remembered that they are based on a sound rationale. First, they address the need for continued learning as the child moves from one language to the other. Second, they address the need to diminish the alienation which children feel when pushed into an unfamiliar language situation and to develop a positive self-concept. And third, they recognize the importance of new discoveries about the critical role of language acquisition and utilization in the intellectual development of the child. Despite overwhelming pedagogical evidence in favor of bilingual education and native language instruction, however, criticism continues unabated. The criticism can be put into three categories: (1) emotional-negative reactions to the use of a language other than English in American schools; (2) misinformation; and (3) attitudinal-based on past discriminatory attitudes about the place of racial and ethnic minorities and the belief held by some that equal educational opportunity is not desirable. None of the proposed alternatives, however, based as they are on the traumatic and disastrous programs of the pre-bilingual era are acceptable. Bilingual education with language instruction in the native language still appears to be the best option for children with limited English proficiency. (CMG)

Descriptors—*Children's Rights, *Civil Rights Legislation, *Disabilities, Equal Protection, Government Role, Hospitals, *Medical Services, *Neonates, Parent Child Relationship, *Parent Rights, State Legislation

Identifiers—*Parental Consent for Minors

A recent ruling in the Baby Jane Doe case held

that as parents are ultimately responsible for a child, and as in this case, the parents were not recipients of Federal assistance, neither they nor the hospital following their instructions to withhold treatment from their handicapped newborn are subject to Federal provisions about discrimination on the basis of handicap (Section 504 of the 1973 Rehabilitation Act). This argument is seriously flawed. Although our laws recognize that children's rights are generally best safeguarded by parents, these rights are independently protected by Federal constitutional and statutory guarantees. State child neglect and abuse laws also recognize that parents' and children's rights are not always coterminous and provide for governmental and judicial intervention in certain circumstances. The law extends these protections on an equal basis to "individuals" without reference to age, infirmity, or incapacity. Thus, a hospital cannot use the excuse of parental non-consent, but has a legal responsibility to initiate appropriate action to override parental authority in certain circumstances. Furthermore, a hospital and its staff can effectively discriminate against a handicapped child through the advice and information given to the parents concerning the child's condition and prognosis. Given this reality, Federal access to hospital records is the absolute minimum protection due to the handicapped infant under Section 504. (CMG)

Identifiers—National Longitudinal Survey Youth Labor Market Ex

This is a report on a study of how Hispanic youth fare in the labor market, based on data from the 1979 and 1980 National Longitudinal Surveys of Youth Labor Market Experiences. Chapter 1 reviews some of the major factors (low educational attainment, language problems, influx of foreign workers, cultural problems, and discrimination) that have been suggested as reasons for the economically disadvantaged status of Hispanics. Chapter 2 provides a socioeconomic and demographic profile of Hispanic youth, and Chapter 3 presents labor force participation rates, unemployment rates, and employment/population ratios relative to other groups and among Hispanics themselves. Chapter 4 examines the various dimensions of unemployment among Hispanics, including financial hardship, job search methods, types of jobs sought, and length of time required to find work. Chapter 5 provides a profile of employed Hispanics, while Chapter 6 summarizes government sponsored employment and training for youth. Chapter 7 focuses on attitudes toward work and military service, as well as delinquent behavior by Hispanic youth. The last chapter explores the need for specific employment policies directed toward Hispanic youth. Options outlined include the human capital approach, the market approach, the special youth characteristics approach, and the affirmative action approach. The report concludes that early intervention into the employment problems of young Hispanic workers will produce important social benefits. (CJM)

tional Quality, Elementary Secondary Education, *Equal Education, *Federal Government, Financial Support, *Government Role, Standardized Tests, Test Validity

Identifiers—*Reagan Administration

It is now widely recognized, after the publication of four reports on the subject, that public education in the United States is in a state of crisis. This policy paper contends, however, that much of the debate on these reports has been based on distortions of their contents and challenges the current Administration's position which holds that public education has been harmed by increasing Federal aid and court decisions in the area of equal opportunity. It is emphasized that the goals of equal education and educational excellence are inseparable. Excellence entails developing the talents of all to the fullest, and this is said to be impossible in the face of discrimination. Excellence is also impossible without adequate funding, and in this regard a larger Federal role (rather than a reduced one) is called for. Other areas in which Federal involvement is held to be essential include testing (to ensure validity) and curriculum (to ensure that all public school students, particularly blacks, have the opportunity to develop competencies leading to success in school, the job market, and the community). Descriptors—Access to Education, *Business, *Business Responsibility, Change Strategies, *Conferences, Elementary Secondary Education, *Equal Education, *Equal Opportunities (Jobs), Ethnic Discrimination, *Hispanic Americans, *Labor Force Development

The mutual interests identified by participants in this conference on the business community and Hispanic Americans, and suggestions for actions by corporations and individuals to further those interests all fit under three key terms: awareness, access, and inclusion. Participants agreed that awareness of Hispanics' dynamic population growth in the United States and what this means for the economy, the work force, the consumer market, and supporting institutions of society—lags behind the reality. Hispanics themselves and aware members of the business community must work to spread the message. It was also felt that access to jobs, education, training, credit, capital, and leadership opportunities for Hispanics must be dramatically improved. Business, rather than sitting passively and waiting for schools to deliver suitable employees must step up efforts to recruit, train, and promote Hispanic workers and professionals. Finally, participants concurred that along with access must come inclusion, meaning that the business community must work to avoid any pattern of discrimination and be committed to seeking out Hispanic job candidates, suppliers, and subcontractors who can meet the needs of business. Descriptors—Bilingual Education, *Change Strategies, Economic Change, *Educational Improvement, Educational Status Comparison, Education Work Relationship, Elementary Secondary Education, *Hispanic Americans, *School Business Relationship, *School Community Relationship

The major conclusion of a conference on Hispanic-Americans and education was that partner-

ships among businesses, school, and the Hispanic community can make a big difference in improving the educational preparation of young Hispanics for success in a fast-changing economy. It was also recognized that the future for Hispanics in the United States is an increasingly vital part of the national interest, and that educational institutions cannot meet the challenge alone, but need collaborative support from the business and Hispanic communities. After an introductory section, the report gives short summaries of the issues discussed: the problems of a changing economy, pervasive problems in education, leaks in the educational pipeline, school-to-work transition, and the corporate stake in the Hispanic future. A discussion on the place of Hispanic culture and the Spanish language in American society, with emphasis on concerns and fears about bilingual education, is also summarized. Three composite approaches to addressing identified needs that emerged from the discussions are described: the local school and community approach, the systemic approach, and the human resource development approach. And finally, recommendations for action by corporations and the business community and by the Hispanic leadership and community are offered. A list of conference participants is provided. (CMG)

Identifiers—*New York (New York)

This report on the Puerto Rican population of New York City is organized into three sections. The first begins by discussing the Puerto Rican population in the context of the growth and distribution of the total population of Spanish/Hispanic origin or descent. Changes in this relationship between 1970 and 1980 are presented. The redistribution of the Puerto Rican population in the United States during the last decade is shown in table form and discussed briefly. Finally, the spatial redistribution of the Puerto Rican population within New York City by borough and community since 1950 is examined. Section II presents full count 1980 Census data for the city and for the Puerto Rican population. Nineteen pairs of tables of demographic and housing characteristics are included, contrasting and comparing the Puerto Rican population and housing

characteristics with those of the city as a whole. Section III, presenting 1970 and 1980 full count subject matter for the citywide Puerto Rican population and housing units, contains 10 tables and analyses. The tables were designed to maximize the only information from the 1970 Census which is comparable to that of 1980. It is noted that all Census data in this report must be considered preliminary pending the outcome of litigation over a possible population undercount. (Author/CMG)

The District of Columbia's Multi-Arts Service Program, whose first year of implementation (1982-83) is evaluated here, is a multi-disciplinary program in music, dance, theater, and visual arts designed for public school students in grades K-9. The program's primary objectives are to increase student awareness of and interest in the arts, student recognition of the arts as a vital force in their lives, and student interest in pursuing the study of the arts. The assemblies, lecture-demonstrations, and workshops of which the program is composed are developed and presented by teachers and students from Duke Ellington School of the Arts. The program's three primary objectives were achieved during this first year, primarily as a result of participation in the lecture-demonstrations. Inadequate bus service complicated implementation of the latter. The workshops were not held due to late implementation of the program and scheduling difficulties. (CMG)

Identifiers—Basic Skills Centers DC, *District of Columbia Public Schools

Basic Skills Centers in the District of Columbia's public schools are intended to provide supplementary, individualized reading and math instruction for 7th and 8th graders who are two or more years below grade level in those areas. This Chapter 2 program superseded an earlier Title II program and was implemented in 1983. According to this report, by June of 1983, Basic Skills Centers were established and operating in 100 percent of the target schools and served 1,445 students in reading and 999 in math. Although skills improvement objectives were not met, the data showed some improvement in those areas. The percentages of students who attained mastery varied widely from school to school, ranging from zero to 100 percent in reading and from 30 to 100 percent in math. These data suggest that achievement of the program's objectives is possible if the reasons for greater achievement in some schools can be identified and reproduced in lower-achievement schools. Descriptors—*Educational Change, *Educational Improvement, *Educational Quality, Elementary Secondary Education, Federal Government, Financial Support, Government Role, *Public Education

At a time of far-reaching change in our society, numerous national reports have criticized the American public education system as inadequate to meet the challenge and have called for reforms aimed at achieving excellence. Contrary to the general view, however, there is evidence that public education is already in the midst of a "rising tide of excellence." Many weaknesses still exist, but excellence has once again become part of the agenda in hundreds of school districts around the nation. This is clear when we look, for example, at higher standards being imposed on students around the country, widespread efforts to increase daily attendance, and tougher teacher certification laws. Although it will be difficult, due to the increasing politicization of public education, the Federal government's attempt to decrease its role in education, and the lack of adequate funding, it is up to responsible school leaders to keep the momentum going. Criticism and advice must be dealt with constructively, and concentration should be placed on meeting local goals that school boards, staff, and the community have jointly determined as essential to the improvement of local schools. As part of the School Action Effectiveness Study, 406 Milwaukee inner-city, unemployed dropout youths were surveyed seven months after intake into an employment counseling and placement cen-

ter. Personality characteristics were assessed at intake. At follow-up, personality characteristics, employment and schooling status, and self-reported police contacts were measured. Hierarchical multiple regression analyses controlling for previously measured personality suggest that employment has no effect on "psychological health" or "interpersonal competency." One of the five measures of employment status (fulltime work in the last six months) explained a significant 2 percent of the variance in "rebellious autonomy" at follow-up. Return to school had significant negative effects on psychological health and interpersonal competency for this dropout sample. Self-reported arrests were associated with age, gender, and interpersonal competency; there was no relationship between employment and delinquency in these data. These results have implications in terms of options available to dropout youth. (Author)

This document describes the objectives and focus of a workshop convened by UNESCO in 1982 to design and develop frameworks for training national curriculum specialists, and presents three "workshop products," i.e., reports on policy resulting from the workshop. Part one outlines purpose of the workshop and lists the participants from eight countries: Afghanistan, Bangladesh, China, India, Pakistan, the Philippines, Viet Nam, and Thailand. The major objective addressed by participants was to enhance curriculum developers' ability to support improved learning by children from disadvantaged environments. A UNESCO official's welcoming address, which focused on education for the disadvantaged in developing countries, is also included in this section. Part two contains the three policy papers. These are entitled (1) "Identification of Problems Hindering Achievement by Disadvantaged Learners and Actions to Improve Learning"; (2) "Exemplar Training Framework in Respect of Intervention in the Specification of Intended Learning Outcomes"; and (3) "Exemplar Training Framework in Respect of Intervention in the Specification for the International System and Guidelines for Teacher Education." ED 241 635 UD 023 388
A Report to the Federal District Court on the Status of Desegregation.
Columbus Public Schools, Ohio.

Pub Date—1 Jul 83

Note—328p.; Prepared by the Department of Internal Monitoring for the Superintendent of Schools. A number of pages may be marginally legible due to type.

Pub Type—Numerical/Quantitative Data (110) — Reports - Research (143)

EDRS Price - MF01/PC14 Plus Postage.

Descriptors—Attendance, *Compliance (Legal), *Desegregation Effects, Discipline, Educational Finance, Elementary Secondary Education, Enrollment, Extracurricular Activities, Parent Participation, Performance, School Community Relationship, *School Desegregation, School Districts, School Safety, Staff Development, Student Mobility, Student Transportation

Identifiers—*Columbus Public Schools OH

This document constitutes a report on the status of racial desegregation in the Columbus, Ohio, City School District during the period from August 30, 1982, through June 10, 1983. Information and statistical data are presented on matters that have been of interest to the Federal District Court, the Board of Education, and the community at large. Areas covered include student enrollment, student mobility, attendance, discipline, participation in co-curricular activities, transportation, and academic performance. Information is also provided on school safety and security, parent and community

involvement, staff development and human relations activities, monitoring and problem resolution, and the status of outside funding and general District finance. Where available, current data are compared to similar data from the past four school years. (GC)

Making It on Their Own: From Refugee Sponsorship to Self-Sufficiency.

Church World Service, New York, NY.

Pub Date—Dec 83

Note—141p.; Conducted in collaboration with Cal-culogic Corporation.

Pub Type—Numerical/Quantitative Data (110) — Reports - Research (143)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—*Adjustment (to Environment), *Church Role, Community Involvement, Cultural Differences, Economic Opportunities, *Economic Status, *Employment, Language Proficiency, *Refugees, *Relocation, Social Mobility, Surveys, Welfare Recipients

Identifiers—*Sponsors

In 1983, a survey was conducted by the Church World Service (CWS) Immigration and Refugee Program to determine how well refugees recently resettled through this organization were adjusting to this country and the extent of their sponsors' contribution to the resettlement effort. A total of 1,666 sponsors and 523 refugees returned the questionnaire. Results indicated that (1) over a reasonable period of time, most refugees were finding jobs; (2) refugees' use of public assistance is significantly lower than is commonly believed; (3) over time, most refugees are achieving self-sufficiency; and (4) CWS sponsors and congregations have contributed an estimated \$133 million in cash, goods and services, and time over the past three-and-a-half years. In addition to discussing these findings and presenting recommendations for improving resettlement procedures, this report contains extensive statistical information on refugee employment, economic indicators, English proficiency, use of public assistance, secondary migration, and contributions by sponsors and congregations. Appendices present demographic characteristics of the refugees, survey methodology, and comments by refugees and sponsors. (CJM)

Supplement to the Curriculum Guide for Social Studies: Vietnamese-Speaking Students. Kindergarten-Primary Two. Working Draft.

Chicago Board of Education, Ill.

Pub Date—80

Note—72p.

Language—English; Vietnamese

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Asian Americans, Bilingual Instructional Materials, Cultural Awareness, Curriculum Guides, Primary Education, *Social Studies, *Teaching Methods, Vietnamese, *Vietnamese People

This supplementary guide for use with K-2 Vietnamese-speaking students in Chicago public schools is keyed by page number to the standard social studies curriculum guides for these grades. The purpose of the activities in the guide, which are in Vietnamese, is to increase students' awareness and knowledge of the social environment in the United States through their active participation in the presentation of information concerning their own culture. Major concepts dealt with are the neighborhood and the community. Where appropriate, background information on the Vietnamese life style and culture that might prove useful to the teacher is given in English. (CMG)

Supplement for Chinese-Speaking Students for Curriculum Guide in Reading. Level F. Working Draft.

Chicago Board of Education, Ill.

Pub Date—79

Note—283p.

Language—English; Chinese

Pub Type—Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC12 Plus Postage.

Descriptors—Behavioral Objectives, Bilingual Instructional Materials, Chinese, *Chinese Americans, Cultural Awareness, Curriculum Guides, Learning Activities, Primary Education, *Reading Instruction, *Teaching Methods

This supplement to Chicago's standard curriculum guide in reading is for use with primary level Chinese-speaking students. It is designed to help

students to develop the skills needed to function in a regular English program of instruction. Teaching/learning strategies are presented in Chinese. Objectives, teacher directions, and other pertinent information are in English. There are numerous references within the activities to culturally relevant stories, proverbs, and other materials that help to perpetuate students' cultural heritage. Sample units are followed by a section on the fundamental skills of Chinese word learning, in which objectives and skills are listed, teaching/learning strategies are suggested, and answers and/or criteria are given. Next comes a section on objectives common to Chinese and English for comprehension, study skills, and literature. Finally, there is a section on key objectives in Chinese, also for comprehension, study skills, and literature. (CMG)

A contrastive analysis approach is used in this supplementary math curriculum guide for Spanish-speaking second and third grade students in Chicago public schools. Lessons are presented for those objectives for which the instructional strategies used in the United States differ from those used in Spanish-speaking countries. (Objectives for which the methodology is the same are taught from the standard math curriculum.) Every lesson has four parts: (1) an explanation of the differences in instructional strategies used in Spanish-speaking countries and the U.S.; (2) a student activity, in Spanish, to reinforce students' skills in using their native language and methodologies; (3) suggestions for facilitating students' transition from their native methodology to the U.S. methodology; and (4) a transitional activity which provides students with practice in solving problems using both methodologies and languages. Major topics covered are place value, operations with whole numbers, and measurement. An English-Spanish vocabulary list is provided. (CMG)

Asian American Middleman Minority Theory. The Constructional Framework of an American Myth. Draft.

Pub Date—Jan 84

Note—60p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Career Choice, *Chinese Americans, *Group Status, *Japanese Americans, *Minority Groups, Social Theories, *Socioeconomic Status

Identifiers—*Middleman Minority Groups, *Model Minority Groups

This paper questions the applicability of middleman minority theory to Chinese and Japanese Americans. The constructional elements of the theory, in its American form, are analyzed in the context of Chinese and Japanese American economic, social, and political conditions. The ethnic group triad (elite-middleman minority-masses) is identified and viewed against actual dyadic ethnic relations. The "model minority" thesis is seen as a link between the presumed middle-class status of the two Asian American groups and the existence of a competitive discriminatory pathology, the primal ingredient of which is proof of one's deprived minority status. This hierarchy of relative social deprivation is suggested as the structural mechanism through which a socioeconomic status bias serves as the estimation of the status of minority groups. (That bias is emphasized by the conspicuous absence of its sociopolitical counterpart, sociopolitical status.) Lastly, the theory is reduced to its central theme: occupational "liquidity" as a function of sojourning. The assumption that Chinese and Japanese Americans are "sojourners," or "strangers," whose occupational preferences are determined by that orientation is challenged. It is argued that the classification and depiction of those two groups as "middleman minorities" are untenable, inaccurate,

and based on myth. (Author/CMG)

Descriptors—*Educational Attainment, *Education Work Relationship, Family Characteristics, Postsecondary Education, *Siblings, Social Stratification, Socioeconomic Background, Statistical Analysis, *Statistical Bias

It is a truism of research on social stratification that the effects of socioeconomic or family background on educational attainment lead to biases in the simple regression of occupational status (or other putative outcomes of schooling) on educational attainment. Using a structural equation model of sibling resemblance in educational attainment and occupational status, Hauser and Mossel have found minimal evidence of family bias in the effects of postsecondary schooling on occupational status in a sample of Wisconsin brothers. In order to resolve this seemingly anomalous finding, the present analysis compares the Hauser-Mossel findings with those in larger samples of sibling pairs of the same and of mixed sex in the Wisconsin Longitudinal Study and with pairs of brothers in Olneck's Kalamazoo study. In the course of the analysis, some methodological problems in cross-population comparisons of structural equation models are solved. The comparative analysis shows that family bias in the effects of schooling on occupational status may be much less than is commonly believed and that very large samples may be needed to measure it reliably. Moreover, the analysis suggests that estimates of family bias are very sensitive to the specification of response variability in schooling. (Author)

Note—50p.; Many pages have small print; Revised version of paper presented at the annual meetings of the American Sociological Association (Detroit, MI, 1983).

Available from—Center for Demography, University of Wisconsin-Madison, 3224 Social Science Building, Madison, WI 53706 (no cost).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Birth Order, *Educational Attainment, Family Size, Postsecondary Education, *Predictor Variables, *Siblings, *Success

The idea that birth order influences intellectual development and social success has recently been revived, despite the accumulated evidence that birth order effects are often negligible or artifactual. In this paper, the association of birth order with educational attainment is examined among 9,000 Wisconsin high school graduates of 1957 and among their full siblings, including more than 30,000 men and women. Whether selection within the sample of high school graduates, post-secondary educational attainments of those graduates, or educational attainments within full siblings are considered, there are no significant or systematic effects of birth order on educational attainment when other relevant variables have been controlled. Educational attainment appears to increase with birth order when family size is controlled, but this happens because secular increases in schooling have occurred within as well

as across families. (Author)

Three witnesses gave testimony at this hearing on restoring \$150 million in entitlement funding to Federal child nutrition programs. They were Ernest Morial, Mayor of New Orleans, representing the U.S. Conference of Mayors' Task Force on Joblessness and Hunger; Faith Gravenmier, representing the American School Food Service Association; and Lynn Parker, representing the Food Research and Action Center. All three, besides offering suggestions for using the restored funds in their oral testimony, presented prepared statements for inclusion in the record. Morial also presented, in his oral testimony, omnibus anti-hunger legislation prepared by the Conference of Mayors and, for inclusion in the record, a survey of human services in 1982 and eight case studies of hunger in American cities prepared by the Conference of Mayors. The cities covered in the survey include Cleveland, Denver, Detroit, Nashville, New Orleans, Oakland (CA), Rochester, and San Antonio. (CMG)

Identifiers—*District of Columbia Public Schools

The subject of this hearing was the partnership between the District of Columbia's public schools and several private companies. This partnership resulted in the establishment of a school curriculum giving high school students exposure to specific career training and also orientation to the workplace. The training was in the fields of pre-engineering, the health professions, communications, business and finance, and hotel management and the culinary arts. Oral testimony describing the programs (which included schools within schools) and their impact was presented by a student and a faculty member from a participating school, by the superintendent of schools, and by a representative of the participating corporations. Prepared statements were also submitted for the record by the last three witnesses. The chairman of the subcommittee submitted a copy of a newspaper article by Jacob Javits discussing the role of business in innovative education and training programs. (CMG)

Descriptors—*Breakfast Programs, Elementary Secondary Education, *Eligibility, *Federal Programs, Financial Support, Hearings, *Lunch Programs, Nutrition, Program Evaluation

Identifiers—*Income Verification, *Reagan Administration

The first witness in this oversight hearing on the school lunch program, the Assistant Secretary for Food and Consumer Services (Department of Agriculture), presented the findings of a study on child nutrition programs mandated by Congress and discussed the Reagan Administration's view of the status of the programs as a whole, including its policy on income verification for potentially eligible children. The Administration's position, and particularly its position on verification, was criticized in oral and prepared statements by witnesses representing the Children's Defense Fund, the Food Research Action Center, and the American School Food Service Association. The director of food services for Columbus, Ohio, made an oral statement describing the situation in Columbus and criticizing the Administration's verification stand. Material for the record was submitted by the American Legion, the Pittsburgh Public Schools, and the Society for Nutrition Education. (CMG)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Birth Rate, Census Figures, *Demography, Migration, *Population Trends, *Research Methodology

Identifiers—American Samoa, Guam, Mortality Rates, Pacific Trust Territory, Puerto Rico, Virgin Islands

This report presents estimates of the population for July 1, 1970, to 1982 for Puerto Rico, the Virgin Islands of the United States, American Samoa, Guam, the Northern Mariana Islands, and the remainder of the Trust Territory of the Pacific Islands. Census counts for 1970 and 1980 are also shown for each of the areas. In addition, the report presents the components of population change for these areas for the 1970-80 and 1980-82 periods—natural change (births minus deaths) and net migration (the number of persons migrating to a particular area minus the number migrating from the area). Information is provided on the different methodologies used to derive data for each area, limitations of the estimates, and data sources. (Author/CMG)

EDRS Price - MF01/PC10 Plus Postage.

Descriptors—Achievement Need, Attitudes, Economic Opportunities, *Economic Status, *Expectation, *Motivation, Parent Attitudes, *Parent Influence, *Poverty, *Self Actualization, Theories, Welfare Recipients

Identifiers—Intergenerational Analysis

Whether there is a causal link from attitudes to economic success is investigated in this study, which uses data from the Panel Study of Income Dynamics. A theory of motivation is proposed which has two components: motives, generalized dispositions to approach or avoid a class of incentives, and expectancies, an individual's assessments of the chances that his or her own performance will lead to a desired outcome. A positive motive, need for achievement, and a negative motive, fear of fail-

ure, are investigated. Generalized expectancies are measured by a personal efficacy index. Future orientation is also measured. An intergenerational analysis of the data focuses on whether motivational deficits among poor parents cause their children to remain at a low level of economic attainment, while an intragenerational analysis examines whether motivational deficits are responsible for poor adults remaining poor. Findings show modest or insignificant effects of motives on economic outcomes and, with one exception, no consistent effects of expectancies on outcome (the exception being an intergenerational one in which parental expectancies are important for young white women). Appended to the narrative are extensive tabular data and descriptions of the study methodology and variables. (CMG)

This paper provides an overview of the legal standards for faculty integration and an analysis, based on case study research in four cities, of the issues that have arisen in the implementation of these standards by the Federal Office for Civil Rights. Part I reviews the major legal issues and puts them into a historical perspective. Part II develops the implementation issues, drawing upon faculty desegregation experiences in Los Angeles, Chicago, Philadelphia, and New York. The concluding section, Part III, considers recent judicial decisions and administrative policy changes and their implications. (GC)

Identifiers—Australia, France, Great Britain, Italy, United States

Innovative practices in education and local development in Western Europe, Australia, and the United States are described and analyzed in this report. Part One reviews urban problems, their impact on education, and the need for a new approach.

Part Two explores how schools and institutes of adult education can provide information about the local community and in the process teach children and adults how to analyze the community's situation and needs. It also describes community service projects that both address the problems of local development and help individual students to choose careers. Examples given include involvement in social services programs and housing rehabilitation programs. Part Three discusses a variety of projects in which schools and colleges concern themselves with improving the local community's economic situation. Examples presented here are school-based youth enterprises, school-business consulting activities, employment training and skills training programs, and college contributions at the teaching, research, and service levels. Part Four stresses the need for an effective alliance between education and development and offers suggestions for aiding this alliance through changes in teaching methods and curricula. Finally, general issues for analysis and themes for further work are indicated. (CMG)

Descriptors—Culture Conflict, *Employer Attitudes, Employment Interviews, Employment Qualifications, *Indochinese, *Job Performance, Language Proficiency, *Personnel Evaluation, *Refugees

Identifiers—*Utah
Eighty Utah companies currently hiring Indochinese refugees and 73 identified simply as "general employers" took part in a study of employers' reactions to Indochinese refugees as job applicants and as employees. The study used questionnaires and oral interviews directed at personnel managers and supervisors and some language proficiency tests of refugees. Reactions to the refugees were largely positive, with refugees who were employees being perceived more favorably than employees in general. Some problems related to language and (to a minor degree) cultural differences were identified. Personnel managers appeared to use information obtained through interviews less in the evaluation of refugees than in the evaluation of job applicants in general. This may have been due both to the difficulty of obtaining information and to the fact that personnel managers relied more on the reputation of refugees as a group in making evaluations. In terms of language, employers had relatively high expectations about the level of language proficiency that a refugee job applicant should demonstrate for a successful interview; listening was shown to be the most important language skill on the job, followed by speaking, reading, and writing. Appended to this report are the study questionnaire, interview schedule, cover letter, responses to the questionnaire, and an excerpt from "Program Design Considerations for English as a Second Language." Identifiers—*Chambers of Commerce

Brief descriptions of individual models of business/education cooperation in ten U.S. cities are presented in this report. The models were either developed under the aegis of local Chambers of Commerce or depict major urban partnerships of which the Chambers are a part. Cities with such programs include Boston, Cincinnati, Dallas, Hartford, Minneapolis, New Orleans, New York City, Pittsburgh, San Francisco, and Seattle. The first part of the report summarizes data on the goals and structure of the cooperative programs and on the

administrative structures of the various Chambers of Commerce involved. The second part describes the individual programs. (GC)

Identifiers—*Hmong People, Minnesota (Saint Paul), Wisconsin

This guide is intended for use with two videotapes—"Pain and Promise" and "Fitting In"—that address the educational needs of Hmong and Lao students. Information presented in the guide includes brief descriptions of the social organization, religions, languages, and educational backgrounds of Lao and Hmong refugees. Differences and similarities between the two groups are also outlined. Indochinese bilingual program models in the three school districts featured in the videotapes (St. Paul, Minnesota; and Sheboygan and Madison, Wisconsin) are described. Problems from the perspectives of Indochinese students and the schools are then reviewed, and solutions are considered. An extensive list of references (publications; slides, videotapes, and films; and sources for Lao, Hmong, and general Indochinese materials) is also provided. (GC)

Identifiers—Pennsylvania (Philadelphia)

This report describes a program which grew out of a study that explored writing and literacy skills in Anglo, Black, and Hispanic high school students in

North Philadelphia. Section One describes writing in the lives of adolescents as viewed within the home, community, noninstitutional, and broader sociopolitical settings. Particular emphasis is given to ethnographic data collected and used to identify and describe sociocultural factors affecting students' writing both in the community and in the school. Themes related to literacy, such as bilingualism, bidialectalism, informal language, and the role of writing in the workplace, are also discussed. Section Two focuses on writing in the classroom as it is viewed by educators. Educational strategies that were developed and employed to teach functional writing to urban students are detailed. The introduction of music to the writing curriculum is described as one of the major strategies implemented. Other ways that ethnographers can share their complementary approaches to develop and enhance students' literacy skills are stressed. The report's conclusion focuses on the integration of school and social relationships in the successful development of writing and all learning skills. The text is followed by an extensive bibliography; several case studies of Anglo, Black, and Hispanic learners/writers; and samples of writing from community and school contexts. (CJM)

Identifiers—Child Care Food Program, *Income Verification, Nutrition Education and Training Program, *Reagan Administration, Special Supplemental Food Program Women Infants Child

The first witness in this hearing was the Assistant Secretary for Food and Consumer Services, Department of Agriculture, who presented the Reagan Administration's 1984 budget proposals for cuts in child nutrition programs. The proposals included changes in the school lunch program, a freeze on the funding level of the WIC program, elimination of the Nutrition Education and Training Program, stepped up income verification measures, and the consolidation of the School Breakfast Program, the Child Care Food Program, and the Summer Food Service Program into a block grant format. Testimony criticizing the administration's proposals and their effect on program participation and availability was given by representatives of State and local governments, professional associations, and private groups, and by individuals. Seven papers commissioned by the National Institute of Education in order to clarify the state of recent knowledge about the effects of school desegregation on the academic achievement of black students are contained in this report. The papers, which analyze 19 "core" empirical studies on this topic, include: (1) "What Have Black Children Gained Academically from School Integration? Examination of the Meta-Analytic Evidence," by Thomas D. Cook; (2) "The Evidence on Desegregation and Black Achievement," by David J. Armor; (3) "Is Nineteen Really Better Than Ninety-Three?" by Robert L. Crain; (4) "School Desegregation as a Social Reform: A Meta-Analysis of Its Effects on Black Academic Achievement," by Norman Miller and Michael Carlson; (5) "Blacks and 'Brown': The Effects of School Desegregation on Black Students," by Walter G. Stephan; (6) "Desegregation and Education Productivity," by Herbert J. Walberg; and (7) "School Desegregation and Black Achievement: An Integrative View," by Paul M. Wortman. The 19 core studies examined in these papers were selected, based on their content and quality, from 157 works that looked at black students' academic achievement in desegregated schools. Authors of the selected works are Lewis V. Anderson, Jerome Baker, Orrin H. Bowman, Patricia M. Carrigan, El Nadel Clark, Charles L. Evans, E. F. Iwanicki and R. K. Gable, Robert Stanley Klein, M. A. Laird and G. Weeks, George J. Rentsch, L. W. Savage, Daniel S. Sheehan, Irene W. Slone, Lee Rand Smith, the Syracuse City School District, E. W. Thompson and U. Smidchens, D. W. Van Every, Herbert J. Elementary Social Studies Curriculum Guide. Grade 3. Communities.
ED 241 444

Community Attitudes

An Assessment of Perceptions towards Children and Family Issues: A Study of How Rural Citizens Perceive Child Abuse and Neglect. Final Report. ED 241 206

Community Needs Assessment, 1982, with Sub-Population Data Tables. ED 241 077

Public Input into Planning for Municipal Service Provision: A Method and Case Study. Studies in Rural Adjustment. Report No. 14. ED 241 208

Community Based Education

Concerns in Establishing and Maintaining a Community Based Adult Literacy Project. ED 240 295

Educational and Career Services Community Outreach Program. Final Report, 1982-83. ED 240 344

The Role of Volunteers in Adult Literacy Programs. ED 240 294

Community Benefits

The Economic Impact of Schenectady County Community College on Schenectady County, 1981-82. ED 241 078

Community Characteristics

Models for Serving Rural Children with Low-Incidence Handicapping Conditions. ED 241 200

Social Studies: Local History. ED 241 370

Community Colleges

The Economic Impact of the Virginia Community College System from 1966 to 1974. ED 241 098

Hispanics and the Extended Opportunity Programs and Services in California Community Colleges. ED 241 214

Improving Opportunities for Earning the Baccalaureate Degree for Urban Students. ED 241 074

International Dimensions in Community College Education. ED 241 119

Literacy Needs and Developments in American Community Colleges. ED 240 291

Virginia Community College System Master Plan, 1982-1990. ED 241 087

Community Development

The Development of Relevant Indicators for Planning, Monitoring and Evaluation of Country Efforts for Promoting Youth's Role in Development. Report of the Expert Group Meeting (Manila, Philippines, December 13-20, 1980). ED 241 211

Education, Urban Development and Local Initiatives. ED 241 663

Community Education

Community Events Planning Packet: National Community Education Day, Wednesday, November 16, 1983. ED 241 071

Rural Education: A New Awareness. Proceedings of the Multi-State and Rural and Small School Conference (Tifton, Georgia, November 15-16, 1982). ED 241 228

Using a Professional Conference Model to Teach Adolescents about School-Age Parenthood. ED 240 444

Community Health Services

Hope for High Risk Infants and Their Families: A Glimpse at Three Demonstration Projects. ED 241 218

Community Information Services

Final Report to the National Commission on Libraries and Information Science from the Community Information and Referral Services Task Force. ED 241 014

Model Information and Referral Systems: A Bridge to the Future. ED 241 045

Community Involvement

The "Flavor" of the Social Ecology Paradigm in Use: Building on Mutual Social Support in Preventing Drug Abuse. ED 240 427

"The Play's the Thing"—In Which One Finds Himself and Others. ED 240 619

Project CAST. An Adventure in the World of Work. ED 240 824

Should a Special Educator Entertain Volunteers: Interdependence in Rural America. ED 241 201

Community Planning

Education for Land Use Planning: Manual. ED 241 227

Community Programs

Concerns in Establishing and Maintaining a Community Based Adult Literacy Project. ED 240 295

Developing Community Housing Services for Blind and Deaf-Blind Students Who Have Completed Our Training Programs—What Is Our Professional Responsibility? ED 240 793

Development Communication Report. No. 44. ED 240 988

Educational and Career Services Community Outreach Program. Final Report, 1982-83. ED 240 344

The Role of Volunteers in Adult Literacy Programs. ED 240 294

Community Services

Issues in the Transition from School to Adult Services: A Survey of Parents of Secondary Students with Severe Handicaps. Specialized Training Program. Model School and Community Services for People with Severe Handicaps. ED 240 381

Public Input into Planning for Municipal Service Provision: A Method and Case Study. Studies in Rural Adjustment. Report No. 14. ED 241 208

Community Study

Busy as a Bee in an Economic Community: A Year Long Study for First Graders in Economics. ED 241 363

Social Studies: Local History. ED 241 370

Commuting Students

Dealing with Diversity. ED 241 116

Comparative Analysis

The Great Essay/Multiple Choice Debate: Different Strokes for Different Folks. ED 241 117

The Use of Standards and Comparative Space Data for Space Allocation. ED 240 971

The Utility of HEGIS Data in Making Institutional Comparisons. Postsecondary Education Research Reports. ED 240 959

Comparative Education

Graduate Medical Education in the European Region. EURO Reports and Studies 77. ED 240 889

Medical Laboratory Science: An International Comparison for Credentials Evaluators. ED 240 916

The Role of Social Studies in Education for Peace and Respect for Human Rights in Asia and the Pacific. Report of a Regional Meeting of Experts (Bangkok, Thailand, December 16-22, 1980). ED 241 405

Compatibility (Information)

Compatibility Issues Affecting Information Systems and Services. ED 241 018

Compensatory Education

Multi-Arts Service Program, E.C.I.A. Chapter 2. Final Evaluation Report, 1982-83. ED 241 629

Report of Evaluation, Chapter I Mathematics Program, 1982-83. ED 241 617

Report of Evaluation, Title I Mathematics Program, 1979-80. ED 241 614

Report of Evaluation, Title I Mathematics Program, 1980-81. ED 241 615

Report of Evaluation, Title I Mathematics Program, 1981-82. ED 241 616

Title I, ESEA, Compensatory Mathematics Program, Submitted to Joint Dissemination Review Panel (N.I.E. and U.S.O.E.). ED 241 613

What We Know about Compensatory Education: A Compendium. What Does Work? What Does Not Work? What Role Does Evaluation Play? ED 241 600

Competence

Competence in Serving Children: Credentials Protectionism and Public Policy. ED 240 441

Correlates of Client Satisfaction at Trainee and Professionally Staffed Counseling Centers. ED 240 465

How to Develop a Better Guidance Program. ED 240 677

Competency Based Education

Abilities That Last A Lifetime: Outcomes of the Alverno Experience. ED 240 943

Arkansas' Curriculum Guide. Competency Based Shorthand. ED 240 363

Arkansas' Curriculum Guide. Competency Based Typewriting. ED 240 362

Competency Based Adult Education: A Process Model. ED 240 391

Curriculum Development Guidelines for Wisconsin. Guidelines for Curriculum Development for the Wisconsin Competency-Based Occupational Curriculum Data System. ED 240 358

Development and Field Test of Competency Based Instructional Material for a Career Mobility Program for Licensed Practical Nurses. Final Report. ED 240 348

Proficiency-Based German Language Programs. ED 240 833

Competency Based Guidance

How to Develop a Better Guidance Program. ED 240 677

Competency Based Teacher Education

Assessment of Inquiry Competencies in a Performance-Based Teacher Education Program. ED 241 555

Assess Student Performance: Knowledge. Second Edition. Module D-2 of Category D—Instructional Evaluation. Professional Teacher Education Module Series. ED 240 313

Develop a Lesson Plan. Second Edition. Module B-4 of Category B—Instructional Planning. Professional Teacher Education Module Series. ED 240 314

New Strategies for Vocational Teacher Education: Technology and Methodology. ED 240 357

Competency Needs

Competency Requirements for Library and Information Science Professionals. ED 241 037

Competition

Access to Student Loans. Hearing before the Subcommittee on Education, Arts and Humanities of the Committee on Labor and Human Resources. United States Senate, Ninety-Eighth Congress, First Session. ED 240 961

California State Spelling Championship Word Lists [and Spelling Bee Planning Information]. ED 240 583

Competition vs. Recreation in the Early Development of Women's Basketball, 1891-1922. ED 241 518

The Designated Tournament: A Northwest Experiment. ED 240 657

The Effect of Speaking Position on Success in Forensics Competition. ED 240 656

School Award Programs: Putting Effective School Research into Practice. ED 240 744

Competitive Selection

The Select High School Tournament: Rewarding Excellence. ED 240 649

Texas Future Farmers of America Poultry Judging Handbook. Revised. ED 240 261

Compliance (Legal)

Copyright: School and "Fair Use". ED 241 068

Faculty Desegregation: The Law and Its Implementation. ERIC/CUE Urban Diversity Series, Number 86. ED 241 662

Grove City College et al. v. Bell, Secretary of Education, et al. ED 240 958

Lau Compliance Policy Development. ED 241 608

A Report to the Federal District Court on the Status of Desegregation. ED 241 635

Comprehension Monitoring

Strategic Activity in Story Comprehension at Two Levels of Reader Proficiency. ED 240 503

Computation

"Help Wanted, Inquire Within": Estimation. Activities and Thoughts That Emphasize Dealing Sensibly with Numbers through the Processes of Estimation. (Grades 1-6). Title I Elementary Mathematics Program. ED 241 254

Computer Assisted Instruction

Academic/Instructional Computing in the Community and Junior College: Its Role and Its Institutional Implications. ED 241 096

Babe in Toyland-or, How I Stopped Looking and Learned to Start Living with a Computer. ED 240 595

Computer-Based Foreign Language Instruction in Illinois Schools: A Review of Literature, Some Preliminary Observations, and Recommendations for Consideration by the Illinois State Board of Education. ED 240 832

Computers and Composition: An Overview. ED 240 546

Computers in Composition Instruction. ED 240 702

Computers in Education: Implications for Schools and Colleges. ED 240 930

Computers in the Schools: Methods of Utilization and Action Recommendations. ED 241 479

Computers on Campus: Working Papers. ED 240 947

Creating the Classroom's Communicative Context: How Parents, Teachers, and Microcomputers Can Help. Reading Education Report No. 47. ED 240 509

Ideas for Reading and Writing Courseware: Needs and Development Opportunities for Educational Computer Software in Reading, Writing, and Communication Skills. Executive Summary. ED 240 498

Ideas for Reading and Writing Courseware: Needs and Development Opportunities for Educational Computer Software-Reading, Writing, and Communication Skills. ED 240 499

Incorporating the Microcomputer into the Traditional English Classroom. ED 240 612

Introduction to Computers in Education for Elementary and Middle School Teachers. ED 240 706

Master Plan for the Virginia Community College System Computing Services. ED 241 088

Microcomputer Instruction in Special Education and the Fine and Practical Arts. Part III. ED 240 705

Microcomputers/Adult Basic Education: A Project Directed at Implementing CAI for Adult Learners and Identifying Courseware for GED/ABE Programs. Report No. 1. Implementing Computer Assisted Instruction in Adult Basic Education Programming: Observations in a Rural Setting. Report No. 2. Selected Courseware for GED/ABE Programming. ED 240 326

Microcomputers for Classroom Instruction. Part I. ED 240 662

Precollege Computer Literacy: A Personal Computing Approach. Second Edition. ED 240 703

Proceedings of the Annual Penn State Microcomputer Information Exchange Conference (2nd, University Park, Pennsylvania, March 11-12, 1983). ED 240 978

QUILL Reading and Writing with a Microcomputer. Reading Education Report No. 48. ED 240 516

School Administrator's Introduction to Instructional Use of Computers. ED 240 700

Teacher's Guide to Computers in the Elementary School. Revised. ED 240 705

Using Computer Assisted Instruction in a Reading and Study Skills Course. ED 240 522

Using Microcomputers for Instruction in Humanities and Social Sciences. Part II. ED 240 663

Using Microcomputers to Support Instruction in an Introduction to Education Course. ED 241 532

Computer Assisted Testing

An Evaluation of One- and Three-Parameter Logistic Tailored Testing Procedures for Use with Small Item Pools. ED 241 580

Computer Centers

Computer Literacy Project. A General Orientation in Basic Computer Concepts and Applications. ED 240 986

Computer Literacy

Academic/Instructional Computing in the Community and Junior College: Its Role and Its Institutional Implications. ED 241 096

Computer Literacy: A Model Plan for Teacher Education in the Area of Instructional Applications of Computers. Summary, Conclusions, and Recommendations. ED 240 995

Computer Literacy. Focus 11. ED 240 982

Computer Literacy for Teacher Educators: A Prerequisite for the 21st Century. ED 241 508

Computer Literacy Project. A General Orientation in Basic Computer Concepts and Applications. ED 240 986

Computer Metaphors: Approaches to Computer Literacy for Educators. ED 240 704

Computers in the Schools: Methods of Utilization and Action Recommendations. ED 241 479

Introduction to Computers in Education for Elementary and Middle School Teachers. ED 240 706

Microcomputers in Classrooms: Implications for Teacher Education. ED 241 490

Precollege Computer Literacy: A Personal Computing Approach. Second Edition. ED 240 703

Small Towns and Small Computers: Can a Match Be Made? A Public Policy Seminar. ED 241 229

Teacher's Guide to Computers in the Elementary School. Revised. ED 240 705

Computer Managed Instruction

Computers in the Schools: Methods of Utilization

and Action Recommendations. ED 241 479

Curriculum Development Guidelines for Wisconsin. Guidelines for Curriculum Development for the Wisconsin Competency-Based Occupational Curriculum Data System. ED 240 358

The MUPET Lab: Computer Assisted Management of Instruction. ED 241 598

Computer Oriented Programs

Academic/Instructional Computing in the Community and Junior College: Its Role and Its Institutional Implications. ED 241 096

Arkansas' Curriculum Guide. Competency Based Computerized Accounting. ED 240 361

Computers in Education. A Report to the Honourable Robert Fordham M. P., Minister of Education, Victoria. ED 240 987

Computers in Mathematics Education. 1984 Yearbook. ED 241 310//

Computers on Campus: Working Papers. ED 240 947

Developing a Computer Curriculum. Inservice Series No. 17. ED 241 316

Educational Technology in Voc Ed. Information Series No. 268. ED 240 385

An Introduction to Computing: Content for a High School Course. ED 240 701

Introduction to Microcomputers. Inservice Series No. 16. ED 241 315

Managing Cooperative Vocational Education Programs Using the Microcomputer. ED 240 405

Master Plan for the Virginia Community College System Computing Services. ED 241 088

MICRO-VERS. Microcomputer Software for the Vocational Education Reporting System. User's Guide and Reference Manual. Version 1.0 Apple II. ED 240 354

MICRO-VERS. Micro-computer Software for the Vocational Education Reporting System. User's Guide and Reference Manual. Version 2.0 Apple II. ED 240 355

Parent's Guide to Computers in Education. ED 240 707

- Contexts**
California State Spelling Championship Word Lists [and Spelling Bee Planning Information].
ED 240 583
- Context Clues**
Discourse Context, Word Identification and Reading Ability.
ED 240 535
The Specification of High Frequency Words as a Function of Word Shape and Contextual Restriction.
ED 240 513
- Context Effect**
Young Children's Use of Spatial Context in Memory.
ED 241 176
- Continuing Education**
Continuing Education in an Age of Uncertainty: Meeting Human Service Needs in Impacted Communities.

- ED 241 226
Lifelong Learning and Adult Education. Special Issue in Memory of CIHED Advisory Board Member J. Roby Kidd.
ED 240 257
Professional Continuing Education: Participatory Characteristics of Allied Health Practitioners.
ED 241 097
Strategy Planning in Continuing Nursing Education.
ED 240 939
- Contracts**
Things a Board Ought Never Bargain.
ED 240 724
- Control Systems (Mechanical)**
Energy Management Controls. Course Syllabus.
ED 240 343
- Controversial Issues (Course Content)**
Censorship: Challenges, Concerns and Cures.
ED 241 413
Revolution.
ED 241 439
- Cooperation**
Black Literacy in South Africa—A Comparison of the Contribution of the Public and the Private Sector.
ED 240 494
Learning in a Cooperative Play Community.
ED 241 467
The State of the Art of Rural Special Education.
ED 241 202
- Cooperative Education**
Agricultural Machinery - Equipment. Agricultural Cooperative Training. Vocational Agriculture. Revised.
ED 240 263
Agriculture Cooperative Training Group Instruction Handbook. Revised.
ED 240 258
Agriculture Cooperative Training Student Workbook. [Revised].
ED 240 259
Consultants and Cooperative Education: The Northeastern English Department Business Connections.
ED 240 915
Managing Cooperative Vocational Education Programs Using the Microcomputer.
ED 240 405
Milk Processing Plant Employee. Agricultural Cooperative Training. Vocational Agriculture.
ED 240 260
Vocational Agriculture Handbook for Agriculture Cooperative Training.
ED 240 265
- Cooperative Learning**
Circles of Learning. Cooperation in the Classroom.
ED 241 516
- Cooperative Planning**
Circles of Learning. Cooperation in the Classroom.
ED 241 516
Issues in Vocational Education.
ED 240 312
Regional Resource Sharing: A Strategy for Improving Western Higher Education in an Era of Limits.
ED 240 890
- Cooperative Programs**
Business-Education Cooperation: A Review of Selected Urban Programs.
ED 241 665
A Collaborative Preservice Program Involving 15 Rural LEAs and The College of Saint Rose.
ED 241 235
Curriculum Articulation with Secondary Institutions.
ED 241 108
Developing a Strategy. Supporting Economic Development: A Guide for Vocational Educators.
ED 240 281
Handbook for Business/Industry/Education Partnerships. Bulletin 1983, No. 29.
ED 240 301
Implementation of the Job Training Partnership Act. Hearings before a Subcommittee of the Committee on Government Operations, House of Representatives.

Author Index

This index lists documents under the name(s) of their author(s). The index is arranged in alphabetical order by the person's last name.

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Author ————— Norberg, Kenneth D.

Title ————— Iconic Signs and Symbols in Audiovisual Communication. An Analytical Survey of Selected Writing and Research Findings. Final Report.

ED 013 371 ————— Accession Number

Abraham, Michael R.
Sequencing Language and Activities in Teaching High School Chemistry. A Report to the National Science Foundation.

The first part of the paper discusses the importance of the study and the objectives of the research. It then proceeds to a literature review, followed by a description of the methodology used in the study. The results of the study are presented in the next section, followed by a discussion of the findings and their implications. The paper concludes with a summary of the main points and a list of references.

Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Institution ————— **Sacramento State College, Calif.**

Title ————— **Iconic Signs and Symbols in Audiovisual Communication. An Analytical Survey of Selected Writings and Research Findings. Final Report.**

ED 013 371 ————— **Accession Number**

Publication Type Index

This index lists documents under the Publication Type that has been assigned to them to characterize their form or organization, as contrasted to their subject matter.

As shown in the example below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section. The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The Publication Types are displayed in a classified index arrangement, according to the outline below.

Category Code	Category Name
(040)	Dissertations/Theses
Title	Iconic Signs and Symbols in Audiovisual Communication. An Analytical Survey of Selected Writings and Research Findings. Final Report.
	Accession Number
	ED 013 371

Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education (RIE)*. Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to its ED number and hence to its location in *RIE*.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index:

AA —ERIC Processing and Reference Facility	JC —Junior Colleges
CE —Adult, Career, and Vocational Education	PS —Elementary and Early Childhood Education
CG —Counseling and Personnel Services	RC —Rural Education and Small Schools
CS —Reading and Communication Skills	SE —Science, Mathematics, and Environmental Education
EA —Educational Management	SO —Social Studies/Social Science Education
EC —Handicapped and Gifted Children	SP —Teacher Education
FL —Languages and Linguistics	TM —Tests, Measurement, and Evaluation
HE —Higher Education	UD —Urban Education
IR —Information Resources

THESAURUS ADDITIONS AND CHANGES

The following additions and modifications have been made to the ERIC controlled vocabulary since October 1983. They are, therefore, not included in the 10th (1984) edition of the *Thesaurus of ERIC Descriptors*.

ADAPTIVE TESTING

Feb. 1984

- SN Testing that involves selecting test items according to the examinee's ability as shown by responses to earlier test items
- UF Flexilevel Testing
Response Contingent Testing
Stradaptive Testing
Tailored Testing

ANDRAGOGY

Mar. 1984

- SN The art and science of the facilitation of adult learning, distinguished from child-oriented "Pedagogy" in terms of learner self-direction, application of knowledge and experience, learning readiness, orientation to the present, and problem-centeredness
- UF Androgogy

Computerized Adaptive Testing

- USE ADAPTIVE TESTING: COMPUTER ASSISTED TESTING
(Replaces "Computer Adaptive Testing" as USE Reference)

Computerized Tailored Testing

- USE ADAPTIVE TESTING: COMPUTER ASSISTED TESTING
(Replaces "Computer Tailored Testing" as USE Reference)

DISLOCATED WORKERS

Mar. 1984

- SN Workers who have lost their jobs because of economic and technological changes in a business or industry, e.g., plant closings or relocation, increased competition, automation, or market fluctuations
- UF Disemployment
Displaced Workers

EARLY RETIREMENT

Mar. 1984

- SN Withdrawal from one's occupation or career at an earlier age or time than is mandatory or customary

EDUCATIONAL ASSESSMENT

Jan. 1974

- SN (Scope Note Changed) Determining and interpreting the attainment of educational objectives (nationwide, statewide, or locally) for use in educational planning, development, policy formation, and resource allocation (note: do not confuse with "Educational Diagnosis" or "Testing")

High Technology

USE TECHNOLOGICAL ADVANCEMENT

Illegal Immigrants (Del Feb84)

USE UNDOCUMENTED IMMIGRANTS

MARITIME EDUCATION

Feb. 1984

- SN Learning/teaching activities concerned with building, operating, and navigating boats, ships, and other floating structures, as well as related harbor and dock technology

MARXIAN ANALYSIS

Mar. 1984

- SN Application of Marxist concepts, principles, and models in any field (e.g., educational or historical or literary criticism)
- UF Marxist Criticism

MARXISM

Mar. 1984

- SN Body of social, economic, and political thought originating with Karl Marx and Friedrich Engels—distinguished by the labor theory of value, the principles of dialectical materialism and economic determinism, and the doctrine of revolutionary change leading to a classless society
- UF Dialectical Materialism

MONTE CARLO METHODS

Mar. 1984

- SN Statistical simulation techniques using random numbers to derive probabilistic approximations to the solutions of problems—used especially for complex problems with many variables or interrelationships

NONTENURED FACULTY

Feb. 1984

- SN Academic staff who have not received tenure (permanence of position) at their school or institution—includes those awaiting tenured appointments and those who are ineligible for tenure
- UF Nontenured Teachers
Untenured Faculty

OCEANOGRAPHY

Mar. 1980

- SN (Scope Note Changed) Science that deals with the oceans and other large bodies of water, including their exploration, preservation, use, and interactions with air, dry land, and all life forms

ROBOTICS

Mar. 1984

- SN Study, design, and use of robots, mechanical devices that can be programmed to perform tasks of manipulation and locomotion under automatic control
- UF Industrial Robotics
Robots

SMALL ENGINE MECHANICS

Mar. 1984

- SN Assembly, operation, and repair of reciprocating internal-combustion engines used on lawnmowers, garden tractors, chain saws, and other portable power equipment—small engines are generally air-cooled and under 20 horsepower

UNDOCUMENTED IMMIGRANTS

Feb. 1984

- SN Persons residing in a foreign country without proper authorization, having entered that country by unlawful means or having violated the provisions of their visas
- UF Alien Illegality
Illegal Aliens
Immigrant Illegality

Undocumented Workers

- USE FOREIGN WORKERS; UNDOCUMENTED IMMIGRANTS

GENERAL INFORMATION

1. PRICE LIST

The prices set forth herein may be changed without notice; however, any price change will be subject to the approval of the National Institute of Education Contracting Officer.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty (30) days from date of invoice. Payment shall be without expense to CMIC.

3. REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMIC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure or delay (a) is due to events beyond the control of CMIC including, but not limited to, fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments; (b) is due to failures of performance of subcontractors beyond CMIC's control and without negligence on the part of CMIC; or (c) is due to erroneous or incomplete information furnished by Customer.

5. LIABILITY

CMIC's liability, if any, arising hereunder shall not exceed restitution of charges.

In no event shall CMIC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

6. WARRANTY

CMIC MAKES NO WARRANTY, EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7. QUALITY

CMIC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMIC. Best available copy will be supplied.

8. CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMIC.

9. DEFAULT AND WAIVER

a. If Customer fails with respect to this or any other agreement with CMIC to pay any invoice when due or to accept any shipment as ordered, CMIC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.

b. No course of conduct nor any delay of CMIC in exercising any right hereunder shall waive any rights of CMIC or modify this Agreement.

10. GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

11. DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$200.00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the actual cost and postage. A monthly statement of the account will be furnished.

12. STANDING ORDER ACCOUNTS

Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of Resources in Education may do so by depositing \$2000.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

13. PAPER COPY (PC)

A paper copy (PC) is xerographic reproduction, on paper, of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

14. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the International Postal Rates in effect at the time the order is shipped. To determine postage allow 75 microfiche or 75 (PC) pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

OTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

STANDING ORDERS

Subscription orders of microfiche copies of all ERIC reports announced in each issue of Resources in Education average \$160.00 per month.

Dialog Information Services, Inc.**DIALORDER™ SERVICE****SCOPE OF SERVICE**

EDRS supplies **only** the ED-numbered items in the ERIC database. ERIC ED-numbered documents have three levels of availability: 1) Document available in **both** microfiche (MF) and paper copy (PC) form, 2) Document available only in MF form, or 3) Document not available from EDRS. The prices and level are shown with each ED record in the ERIC database.

.ORDER ERIC **must** include document form desired (MF or PC) as special instructions.

The "ship to" and "bill to" address will be supplied by DIALOG. Requests for an address other than those with your DIALOG account must be supplied as special instructions. EDRS service is worldwide.

OPTIONS AVAILABLE

Order is shipped 48 hours after receipt of order. Type of delivery should be requested, e.g., airmail, United Parcel Service, Federal Express, etc. All shipments are F.O.B. Arlington, Virginia.

CHARGES AND TERMS

Cost of document either in MF or PC is contained in ED record abstract data. Add \$.50 per document ordered plus postage. Payment upon receipt of invoice in U.S. funds only.

Deposit accounts desired.

All postage charges are F.O.B. Arlington, Virginia, and will be billed on invoice.

MISCELLANEOUS

Supplier will retrieve orders daily from the DIALOG DIALORDER Service. No payments necessary to CCC.

CONTACT

Once an order has been retrieved by EDRS and a date and time appear in the .LIST TRANSMITTED column, all questions concerning the order should be directed to:

EDRS
P.O. Box 190
Arlington, VA 22201

Telephone: 703/841-1212

— see ordering procedures on verso —

*Trademark Reg. U.S. Pat. & Trademark Office.

ERIC-1 (November 1979)

Only ERIC report documents (i.e., ED numbered items only) are supplied by the ERIC Document Reproduction Service. To be sure that you are requesting only publications that are available from EDRS, the following procedures are recommended:

```

1 → ? BEGIN 1

```

- 1 . BEGIN I in the ERIC file.
- 2 . Enter accession numbers for which full document copies are requested; or perform search according to normal DIALOG procedures, KEEPing records in set 99 for order. Be sure to check first whether the document is available from EDRS. (This information is given in each ERIC ED-numbered record.)
- 3 . TYPE set 99 in a short format to view for accuracy. Delete unwanted items using KEEP-EDnnnnnn if necessary.
- 4 . Enter .ORDER ERIC (MF or PC) (number of copies) (special shipping instructions, if any). All ERIC orders must include an indication of MF or PC.

System Development Corporation (SDC)

ORDER ERIC

Reports from the *Resources in Education (RIE)* portion of the ERIC database, available from the ERIC Document Reproduction Service (EDRS), are available through the SDC Electronic Maildrop. The online ORDER ERIC Command can be used to order these documents. (Documents indexed in *Current Index to Journals in Education (CIJE)* can be ordered through University Microfilms. See ORDER UMI.)

Here are the important details for using ORDER ERIC:

- **Deposit Account.** A deposit account is not required but users may establish one through EDRS at the address given below.
- **Ordering and Shipping Information.** Include the following:
 - Deposit Account Number (if established) or
 - Billing information (if deposit account is not used): name, organization and complete address.
 - Ship to: same as billing information, or name, organization, and complete address. ERIC EDRS ships microfiche documents via airmail. Paper copies are shipped via United Parcel Service. If special shipping is required, indicate on one line, e.g., SHIP VIA: UPS BLUE LABEL.
 - Purchase Order Number (optional). Enter MY P.O. NUMBER IS: and the number.
- **Document Information.** Include the following on one line:
 - Accession Number (ED Number) (see ORDER UMI for articles [EJ numbers] from CIJE).
 - Document form, i.e., MF for microfiche, HC for hard copy.
 - Number of copies.
- **Rates.** Prices of documents are indicated in the Availability (AV) field of ERIC citations or unit records.

EDRS checks its Electronic Maildrop each day and most orders are filled within 48 hours of receipt.

Start Your Own Personal Library on Microfiche

A small investment can provide you with your own personal library of over 1400 documents addressing the hottest topics in education over the past eight years. Each year you can add to this personal library (at minimal cost) an additional hundred plus documents to keep you current with developments in the field of education.

Each year the 16 clearinghouses comprising the ERIC (Educational Resources Information Center) network publish information analysis products (IAP's) which analyze and synthesize for practitioners the current thinking on high-interest topics of the day, as reflected

in the education literature. These IAP's have been reproduced on microfiche, packaged in Mini-Files for easy retrieval and storage, and made available to educators at an economical price. Included with each Mini-File is a publication that provides abstracts of all the IAP's in that year's Mini-File and a series of indexes for locating the IAP's by subject, author, and institution.

You can order all the IAP's produced during a single year, (with the exception of those for 1975-1977, which have been combined in one Mini-File) or the complete set of six Mini-Files spanning the past eight years (1975-1982).

From the 1982 Mini-File Collection, for example, read what the literature is saying about:

- Collective Bargaining, Strikes, and Financial Costs in Public Education
- Counseling for Stress Management
- Recommended English Language Arts Curriculum Guides, K-12
- Computer Literacy in Higher Education
- Effects of Teacher Behavior on Preschool Children: A Review of Research
- Career Education: Collaboration with the Private Sector
- Calculators, Computers, and Classrooms
- Error Correction Techniques for the Foreign Language Classroom
- Student Alienation, Student Behavior, and the Urban Schools
- Computer Systems for the Urban School Administrator: A Guide for Decision Making
- Strategic Planning, Management, and Decision Making
- Alternative Programs for Disruptive Youth
- Lifelong Learning: Formal, Nonformal, Informal, and Self-Directed

ERICTAPES ERICTOOLS

HAVE A COMPUTER?

LOOK AT ERICTAPES!

The Educational Resources Information Center (ERIC) data base is available on magnetic tape in a variety of options from ORI, Inc. Under special authorization from the National Institute of Education, U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC data base provides coverage of the significant literature in the field of educational resources. Report literature (announced in *Resources in Education*) is covered from 1966 to date, and journal article literature (announced in *Current Index to Journals in Education*) is covered from 1969. Monthly, quarterly, and annual updates are available for both *RIE* and *CJIE*, so that the files may be kept current.

The basic files are available in the ERIC (IBM 360 OS) Format. These files include the complete resume, (document description, indexing, and abstract or annotation) of each document announced in the respective journal, in accession number order. A variety of peripheral files, including

Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and almost any segment of the master files is obtainable on Special Order.

The files may be purchased individually or as a collection, and substantial discounts are available on annual subscriptions for updates. The files are written on new, high-quality, 9-track tapes (600-1200, or 2400-ft., as appropriate) at either 1600 or 800 BPI and are guaranteed. Prices per tape reel start as low as \$75.

NO COMPUTER?

LOOK AT ERICTOOLS!

For organizations without access to a computer,* ERICTOOLS provide manual multi-viewpoint access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The *Title Index* provides access by document title. The *Source Directory* provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

The documents are available individually and on annual subscription at a discounted price. Prices start from as low as \$20 for some individual documents.

*Many of these documents are also valuable tools for computer searches.

For additional information, complete and mail the reply form or call: **ERICTAPES/ERICTOOLS**
ORI, Inc., 4833 Rugby Avenue, Suite 301, Bethesda, Maryland 20814, (301) 656-9723

REPRODUCTION RELEASE (Specific Document)

I. DOCUMENT IDENTIFICATION

Title: _____
 Author(s): _____
 Corporate Source (if appropriate): _____ Publication Date: _____

II. REPRODUCTION RELEASE

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education (RIE)*, are usually made available to users in microfiche and paper copy (or microfiche only) and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce the identified document, please CHECK ONE of the options and sign the release below.

CHECK

ERIC Network Components

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in *Resources in Education (RIE)*. They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for *RIE*; these information analysis products are also announced in *Resources in Education*.
